Department of Technical Education

State Board of Technical Education & Training, Telangana

Course Title : Advanced English	Course Code : 18C-201F
Semester : II	Course Group : Foundation
Teaching Scheme in Periods (L:T:P:) : 36:24:0	Credits : 3
Methodology : Communicative Language Teaching + Assignments	Total Contact Hours : 60 periods
CIE : 60 Marks	SEE : 40 Marks

Prerequisites: Basic knowledge of English Language

COURSE OUTCOMES

	At the end of the course the students will have the ability to:
201.1	learn homonyms and one word substitutes and use them in professional interaction
201.2	listen for specific purpose and use appropriate prepositions.
201.3	acquire values through stories and reports
201.4	write resumes, reports and make notes
201.5	work in pairs and groups confidently
201.6	analyse errors and make communication flawless

CO-PO Matrix

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	Mapping POs
201.1	2	2	2	--	1	--	--	3	3	3	1,2,3,5,8,9,10
201.2	2	2	1	2	--	--	--	3	3	3	1,2,3,4,8,9,10
201.3	2	2	--	1	1	1	2	3	3	3	1,2,4,5,6,7,8,9,10
201.4	2	2	2	2	1	--	2	3	3	3	1,2,3,4,5,7,8,9,10
201.5	2	2	2	--	1	--	2	3	3	3	1,2,3,57,8,9,10
201.6	2	2	--	--	--	--	--	3	3	3	1,2,8,9,10

COURSE CONTENTS

UNIT – 1 SPEAKING   **Duration: 10 Periods**

1. Expressing Obligation
2. Fixing and Cancelling Appointments
3. Extending and Accepting Invitations
4. Giving Instructions

5. Asking for and Giving Directions

UNIT - 2: LISTENING   **Duration: 6 Periods**
   6. The Here and Now!

UNIT –3: VOCABULARY   **Duration: 6 Periods**
   7. How to Learn a New Word

   8. Synonyms, Antonyms and One word Substitutes

UNIT -4: GRAMMAR   **Duration: 12 Periods**
   9. Reported Speech

   10. Error Analysis - I

   11. Error Analysis - II

   12. Error Analysis - III

UNIT - 5: READING   **Duration: 6 Periods**

   13. An Environmental challenge

   14. The Will to Succeed

   15. Waiting for Mr. Clean

UNIT- 6: WRITING   **Duration: 20 Periods**
   16. Data Interpretation- I

   17. Data Interpretation- II

   18. Data Interpretation- III

   19. Writing a Resume

   20. Writing a Cover Letter

   21. Note Making

   22. Writing a Report

Specific Learning Outcomes:

On completion of the course the students will be able to:

- express obligation, fix and cancel appointments, extend –accept and decline invitations.
- give instructions and directions
- identify and use prepositions

- learn homonyms and use one word substitutes

- read and understand main ideas and answer the questions

- understand and write reported speech

- identify and correct common errors

- interpret data

- learn to prepare cover letter and resume

- make notes and write reports

Internal evaluation

Test	Units	Marks	Pattern
Mid Sem 1	Speaking Listening	20	Part A 5 Short answer questions Part B 2 Essay questions out of 3 Questions Part C 2 Essay questions out of 3 Questions
Mid Sem 2	Vocabulary Grammar	20	Part A 5 Short answer questions Part B 2 Essay questions out of 4 Questions Part C 2 Essay questions out of 3 Questions
Slip Test 1	Speaking Listening	5	2 Essay Questions out of 3 Questions
Slip Test 2	Vocabulary Grammar	5	2 Essay Questions out of 3 Questions
Assignment	One assignment per one semester	5	Different group assignments of Higher order Questions that develop problem solving skills and critical thinking should be given
Seminars	One seminar per one semester	5	
	Total	**60**	

Suggested Student Activities:

- Listen to a song and answer the questions
- Listen to a passage/conversations/dialogues/speeches and answer the questions
- Group Discussions
- Student Presentations
- Seminars
- Talk about a movie/review
- Talk about a book
- Narrating a story

- Chain stories
- JAM on topics like environment, pollution, ethics, morals, responsibilities of citizens
- Speak about incidents/events/memories/dreams/role model
- Interview with famous personalities
- Cricket commentary
- Reading for main ideas
- Reading for specific details
- Summarizing
- Picture description
- Writing a recipe
- Surprise test
- Compare and contrast two people/pictures/news items/ideas etc
- Surveys
- Filling forms
- e-mail etiquette

Part C	0	2/3	20
Total	5	4/6	40

Time : 1 ½ Hours   Total Marks : 40

PART – A   **5 X 2 = 10**

Instructions:

   i)   *Answer all the following questions:*
   ii)   *Each question carries two marks.*

1. Write two sentences, one with 'must' and another with 'have to', to express obligations.
2. Fill the blanks with suitable prepositions.
   a) He came home _____ a car.
   b) Kiran mixed coffee _____ a spoon.
3. How do you invite your neighbor to attend a seminar on global warming?
4. Fix an appointment with the dentist at 5.30 p.m.
5. Fill the blanks with the suitable prepositions given below:

   Among, between, by, with, from, at, for

   a) She distributed sweets _____ her two brothers.
   b) Mohan died _____ cancer.

PART- B   **2 X 5 = 10**

Instructions:

   i.   *Answer any two questions.*
   ii.   *Each question carries five marks.*

6. Write a dialogue between you and the receptions about the cancellation of an appointment you have with the doctor.
7. Give directions to your friend to reach to the park from your house.
8. Write a paragraph describing your polytechnic using at least five prepositions.

PART- C   **2 X 10 = 20**

Instructions:

   i.   *Answer any two questions.*
   ii.   *Each question carries ten marks.*

9. Fill the blanks with the suitable prepositions.
   a) He looked _____ me.
   b) Listen _____ my instructions carefully.
   c) Geetha suffered _____ fever.
   d) Bhagya threw a stone _____ the well.

e) Prathap kept a ladder _____ the wall.
f) We played cricket _____ five hours.
g) My books were stolen _____ Kiran.
h) We will go to library _____ 15th of this month.
i) Shailaja has been reading a novel _____ 10.00 a.m.
j) We bought this television _____ 2014.

10. Give instructions on how to send an e-mail to your friend.
11. a). Fix an appointment with your M.L.A. next Sunday at 4.00 p.m. to discuss the problems in your village.
b). Cancel the same appointment as you are going to leave for Adilabad on some urgent personal work.

Time : 1 ½ Hours   Total Marks : 40

<div style="text-align:center">

PART – A   5 X 2 = 10

</div>

Instructions:

      i)   Answer all the following questions:

      ii)   Each question carries two marks.

1. Write one word substitutes for the following expressions.
   a) A place where books are available to be borrowed and for reference.
   b) That which cannot be heard.
2. Write the synonyms of the following words:
   a. Rich
   b. Happy
3. Change the following into indirect speech.
   a. Vinod said, "I have gone to Bhadrachalam yesterday."
   b. Gopal said to Mamatha, "I will play cricket tomorrow."
4. Change the following onto direct speech.
   a. David said to Madhavi, " Give me your calculator now."
   b. Jayanth said to Fathima, " Where are you going?"
5. Correct the words given in italics in the following sentences.
   a. Lalitha *go* to Nanded tomorrow.
   b. Adarsh sat *besides* Vikas.

<div style="text-align:center">

PART-B   2 X 5 =10 marks

</div>

Instructions:

      1. Answer any two questions.

      2. Each question carries 5 marks.

6. How should a new word be learnt?
7. Correct the following sentences.
   a. It is very hot to go outside.
   b. Shiva works hardly.
   c. She is more cleverer than Bhaskar.
   d. Vidya is senior than Indira.
   e. Praveen is angry on his sister.
8. Change the following into indirect speech.
   a. She said to him, "When will you go to temple?"
   b. Radhika said to her brother, "Will you pay the examination fee tomorrow?"
   c. Vasu said, " I do not eat non-vegetarian food."
   d. Rafi said to Mathews, "Show me your record."

e. Pramod said to Sandhya, " My brother will bring fruits tomorrow from Karimnagar."

PART-C   2 X 10 =20 marks

Instructions:

 1. Answer any two questions.

 2. Each question carries ten marks.

9. Mention any five ways of learning a new word.
10. Change the following dialogue into a paragraph.
 Ajay: Hai Sudha! How are you?
 Sudha" I am fine. How are you?
 Ajay: I am fine too. Where are you going now?
 Sudha: I am going to market.
 Ajay: What do you want to buy there?
 Sudha: I want to buy fruits and vegetables.
 Ajay: Do you know the mobile number of Suresh?
 Sudha: No. I don't have his mobile number. Why do you need his number?
 Ajay: I want to invite him for my sister's birthday.
11. Correct the following sentences.
 a. Every student has to bring their textbook tomorrow.
 b. She is having a house.
 c. We are living in this house for the last ten years.
 d. This machine works perfectly.
 e. He is the taller student in my class.
 f. Music classes begin from 27th July.
 g. She is weak and she can run fast.
 h. The door was painted by a small brush.
 i. Where your brother is studying?
 j. He awaited for the bus here yesterday.

Time: 3 Hours   **Total Marks: 80**

PART – A

Instructions: 10 X 2 = 20

> i.   *Answer all the following questions.*
>
> ii. *Each question carries two marks.*

1. Fill the blanks with the suitable expressions of obligation:

    a) We _____wear helmet while riding a two wheeler.

    b) A student _____ be in time to college.

2. Fill the blanks with suitable prepositions:

    a) He went to polytechnic _____ a bicycle.

    b) They have been waiting _____ a bus since 8.00 a.m.

3. Write the antonyms of the following words:

    a) Legal

    b) Honest

4. Change the following sentences into direct speech:

    a. He said that he had a beautiful house.

    b. The visitors thanked the guide.

5. What do you write about the following ones in your resume?

    a. Your skills

    b. Your work experience

6. What do you write about the following ones in your resume?

    a. Your interests and activities

    b. Your educational qualifications

7. Read the following paragraph and answer the questions given in questions no. 7 and 8.

Subhas Chandra Bose was born in a Bengali Kayasth family on January 23, 1897 in Cuttack (Odiya Baazar), Orissa, to Janakinath Bose, and Prabhavati Devi. He was the ninth child of 14. He studied in an Anglo school at Cuttack (now known as Stewart School) until standard 6. He then shifted to Ravenshaw Collegiate School of Cuttack. From there he went to the prestigious Presidency College

where he studied briefly. His nationalistic temperament came to light when he was expelled for assaulting Professor Oaten for his anti-India comments.

His high score in the Civil Service examinations meant an almost automatic appointment. He then took his first conscious step as a revolutionary and resigned the appointment on the premise that the best way to end a government is to withdraw from it. At the time, Indian nationalists were shocked and outraged because of the Amritsar massacre and the repressive Rowlatt legislation of 1919. Returning to India, Bose wrote for the newspaper Swaraj and took charge of publicity for the Bengal Provincial Congress Committee. His mentor was Chittaranjan Das, spokesman for aggressive nationalism in Bengal. Bose worked for Das when the latter was elected mayor of Calcutta in 1924. In a roundup of nationalists in 1925, Bose was arrested and sent to prison in Mandalay, where he contracted tuberculosis.

Answer the following questions.

    a. Where was Subhas Chandra Bose born?

    b. Who were his parents?

8. Answer the following questions

    a. Why was Bose expelled from Presidency College?

    b. Why was he sent to Mandalay?

9. Read the following paragraph and answer the questions given in questions no. 9 and 10.

Dr. Rajendra Prasad, son of Mahadev Sahai, was born in Zeradei village, in the Siwan district of Bihar, on 3 December 1884. He was the youngest in a large family, & was close to his mother and eldest brother. He was known as "Rajen" to his family and friends. His father, Mahadev Sahay, was a scholar of both the Persian and Sanskrit languages, while his mother, Kamleshwari Devi, was a religious woman. Zeradei's population was diverse, with both Muslims and Hindus living in relative harmony.

When Rajendra Prasad was five years old, his parents put him under a Mawlawi, an accomplished Muslim scholar, to learn the Persian language, followed by Hindi and arithmetic. After the completion of traditional elementary education, Rajendra Prasad was sent to the Chhapra District School. At the age of 12, Rajendra Prasad was married to Rajavanshi Devi. He, along with his elder brother Mahendra Prasad, then went on to study at T.K. Ghosh's Academy in Patna.
Since childhood, Rajendra Prasad was a brilliant student. He placed first in the entrance examination to the University of Calcutta and was awarded Rs.30 per month as a scholarship. In 1902, Rajendra Prasad joined the Presidency College. He was initially a student of science and his teachers included Jagadish Chandra Bose and Prafulla Chandra Roy. Later he decided to focus on the arts. Prasad lived with his brother in the Eden Hindu Hostel

Answer the following questions:

    a. Where was Rajendra Prasad born?

    b. What was he known as?

10. Answer the following questions.
    a. Where did he learn the Persian language?
    b. Where was he awarded Rs. 30 per month as a scholarship?

PART- B   4 X 5 = 20

Group 1   **2 X 5 = 10**

Instructions: *1. A*nswer any two of the following questions.

             2. Each question carries five marks.

11. Write instructions on how to prepare tea.

12. Write a cover letter to the Managing Director, Vijaya Cement Works, Godavarikhani as you wish to apply for the post of Assistant Executive Engineer.

13. Correct the following sentences.
    a. They congratulated Aravind for his success.
    b. Though Anand is poor, but he is honest.
    c. I wish I have a laptop.
    d. Nafeesa and me are playing shuttle badminton.
    e. Hari is having a car.

Group 2   **2 X 5 = 10**

Instructions: *1. A*nswer any two of the following questions.
             2. Each question carries five marks.

14. Write a report on the industry you have visited last week.

15. Observe the following table and write a paragraph analyzing the information given in it.

Table showing the number of students admitted in different courses in Private Engineering colleges in the past four years.

Year	ECE	EEE	Mechanical	Civil	CSE
2017	54065	36255	21600	34000	13436

2016	49008	36255	20900	29000	22687
2015	45032	36255	20600	14500	32008
2014	38060	36254	20300	14500	38065

PART-C   **4 X10 = 40**

Group 1   **2 X 10 = 20**

Instructions: **1. Answer any two of the following questions.**

2. Each question carries ten marks.

17. Write a resume to apply for the post of AEE in the Department of Tribal Welfare, Government of Telangana.

18. Write instructions for the following:

   a. Opening an account in a bank.

   b. Taking a bus pass for six months

19. Correct the following sentences.

   a. One of my friend met me yesterday.

   b. Anitha is going to park everyday at 6.00 p.m.

c. Myself went to Hyderabad last month.

d. If you read well, you get the first rank.

e. There was many students in the hall.

f. Prasad wants to quickly write the examination.

g. We ran fastly to catch the bus.

h. Pallavi prefers milk than coffee.

i. When did Kamala went to Hyderabad?

j. Harika returned back my book.

Group 2   **2 X 10 = 20**

Instructions: **1. Answer any two of the following questions.**

2. Each question carries ten marks.

20. Write a report to your Principal on the industrial visit by you to BHEL, Patancheruvu, Hyderabad.

21. Read the following paragraph and make notes:

In1920, the Congress meeting was held at Nagpur under the leadership of Gandhiji. It was attended by 15000 delegates and the Congress Constitution was amended and resolutions were taken to fight Swaraj by nonviolent methods and undo the injustice done to Punjab and Turkey.

This movement was called Non-Cooperation Movement. Renunciation of honorary titles like 'Sir' given by British, boycott of legislatures, schools and colleges, courts, tendering resignation to government jobs nonpayment of taxes to government were the important programmes of this movement. Gandhi returned his Kaiser-i-Hind title in August, 1920. There were strikes, hartals and burning of foreign goods all over the country. Many Indian were killed in firings and many other were jailed.

In Kerala, a rebellion broke out by Mophlah peasants and it was suppressed brutally. Though Gandhiji warned the people many times not to resort to violent methods, on 5th February, 1922 in Chauri-Chaura in Uttar Pradesh people resorted to violence. When policemen opened fire on peaceful demonstrations, the angry people set ablaze the police station and 22 policemen were killed. Gandhiji stopped the movement because it lost its nonviolent nature. On 10th March, 1922 Gandhiji was arrested fir six years.

22. Read the following passage and answer the questions that follow:

Subhas Chandra Bose was born in a Bengali Kayasth family on January 23, 1897 in Cuttack (Odiya Baazar), Orissa, to Janakinath Bose, and Prabhavati Devi. He was the ninth child of 14. He studied in an Anglo school at Cuttack (now known as Stewart School) until standard 6. He then shifted to Ravenshaw

Collegiate School of Cuttack. From there he went to the prestigious Presidency College where he studied briefly. His nationalistic temperament came to light when he was expelled for assaulting Professor Oaten for his anti-India comments.

His high score in the Civil Service examinations meant an almost automatic appointment. He then took his first conscious step as a revolutionary and resigned the appointment on the premise that the best way to end a government is to withdraw from it. At the time, Indian nationalists were shocked and outraged because of the Amritsar massacre and the repressive Rowlatt legislation of 1919. Returning to India, Bose wrote for the newspaper Swaraj and took charge of publicity for the Bengal Provincial Congress Committee. His mentor was Chittaranjan Das, spokesman for aggressive nationalism in Bengal. Bose worked for Das when the latter was elected mayor of Calcutta in 1924. In a roundup of nationalists in 1925, Bose was arrested and sent to prison in Mandalay, where he contracted tuberculosis.

Questions:
  i.   When and where was Subhas Chandra Bose?
 ii.   Who was his mentor?
iii.   How did Subhas Chandra Bose participate in National Movement after coming back to India?
 iv.   Why didn't he join civil Services?
  v.   What is the synonym of 'aggressive'?

Course Title **: ENGINEERING MATHEMATICS**		Course Code **: 18C-202F**
SEMESTER	**: II**	Course Group **: COMMON**
Teaching Scheme (L : T : P) : **36 :24 : 0 (** in Periods)		Credits : **3 Credits**
Type of Course	**: Lecture + Assignments**	Total Contact Periods : **60**
CIE : **60 Marks**		SEE : **40 Marks**
Programme : **Common to all Engineering Diploma Programmes**		

Pre requisites

This course requires the basic knowledge of Algebra, Trigonometry in Mathematics at Secondary school level and Basic Engineering Mathematics at Diploma 1st Semester level

Course Outcomes: COs

At the end of the course, the student will have the ability to:

CO 1	Formulate the equations of Straight Line , Circle and Conic Sections
CO 2	Evaluate the Limits of different Functions
CO 3	Determine the Derivatives of Various Functions
CO 4	Find the Successive Derivatives and Partial Derivatives of Functions
CO 5	Use Differentiation in Geometrical and Physical Applications
CO 6	Find Maxima and Minima.

Course Contents:

Co-ordinate geometry

Unit – I   Duration: **10 Periods (L: 6.0 – T:4.0)**

1. **Straight lines:** Write the different forms of a straight line – point slope form, two point

form, intercept form, normal form and general form - Find distance of a point from a line, acute angle

between two lines, intersection of two non-parallel lines and distance between two parallel lines -

perpendicular distance from a point to a line - Solve simple problems on the above forms

2. **Circle:** Define locus of a point, circle and its equation. Find equation of the Circle given (i) Centre and

radius, (ii) two ends of a diameter (iii) Centre and a point on the circumference (iv) three non collinear

points and (v) Centre and tangent equation - general equation of a circle - finding Centre, radius -

tangent, normal to circle at a point on it - simple problems.

Unit – II   Duration: **8 Periods (L: 4.8 – T:3.2)**

3. **Conic Sections:** Define a conic section, focus, directrix, eccentricity, axes and latus rectum – Find equation of a conic when focus directrix and eccentricity are given. Properties of parabola, ellipse and hyperbola - standard forms with Vertex (Centre) at the Origin and Axis (Axes) along Co – Ordinate Axes only – Simple Problems.

Differential Calculus

Unit-III   **Duration: 12 Periods (L: 7.2 – T:4.8)**

4.   **Functions & Limits :** Concept of Limit- Definition- Properties of Limits and Standard Limits (without

proof) - $\lim\limits_{x \to a} \dfrac{x^n - a^n}{x - a}$, $\lim\limits_{x \to 0} \dfrac{\sin x}{x}$, $\lim\limits_{x \to 0} \dfrac{\tan x}{x}$, $\lim\limits_{x \to 0} \dfrac{a^x - 1}{x}$, $\lim\limits_{x \to 0} \dfrac{e^x - 1}{x}$, $\lim\limits_{x \to 0}(1+x)^{\frac{1}{x}}$, $\lim\limits_{x \to \infty}\left(1+\dfrac{1}{x}\right)^x$ - Simple

Problems . Evaluate the limits of the type $\lim\limits_{x \to l} \dfrac{a x^2 + b x + c}{\alpha x^2 + \beta x + \gamma}$ and $\lim\limits_{x \to \infty} \dfrac{f(x)}{g(x)}$

5. **Differentiation – I :** Concept of derivative - definition from first principle as $\lim\limits_{h \to 0} \dfrac{f(x+h) - f(x)}{h}$ -

different notations - derivatives of elementary functions like x^n , a^x, e^x, log x, sin x, cos x, tanx, Secx, Cosecx and Cotx. Derivatives of sum, product, quotient, scalar multiplication of functions - problems. Derivative of function of a function (Chain rule) with illustrative examples such as

(i) $\sqrt{t^2 + \dfrac{2}{t}}$ (ii) $x^2 \sin 2x$ (iii) $\dfrac{x}{\sqrt{x^2 + 1}}$ (iv) $\log\big(\sin(\cos x)\big)$.

Unit – IV   **Duration: 12 Periods (L: 7.2 – T:4.8)**

6. **Differentiation – II:** Derivatives of inverse trigonometric functions, derivative of a function with respect to another function, derivative of parametric functions, derivative of hyperbolic, implicit functions, logarithmic differentiation – problems in each case. Higher order derivatives - examples – functions of several variables – partial differentiation, Euler's theorem-simple problems.

Applications of Derivatives:

Unit – V   **Duration: 8 Periods (L: 4.8 – T:3.2)**

7. **Geometrical Applications: Geometrical** meaning of the derivative, equations of Tangent and normal to a curve at any point on the curve. Lengths of tangent, normal, sub tangent and subnormal to the curve at any point on it. Angle between two intersecting curves - problems.

Unit – VI   **Duration: 10 Periods (L: 6 – T:4)**

8.   **Physical Applications: Physical** applications of the derivative – Explain the derivative as a rate of change in distance-time relations to find the velocity and acceleration of a moving particle with examples. Explain the derivative as a rate measure in the problems where the quantities like volumes, areas vary with respect to time- illustrative examples– Simple Problems.

9. **Maxima & Minima: Applications** of the derivative to find the extreme values – Increasing and decreasing functions, finding the maxima and minima of simple functions - problems leading to applications of maxima and minima.

1. www.freebookcentre.net/mathematics/introductory-mathematics-books.html
2.E-books:www.mathebook.net

Specific Learning Outcomes

Coordinate Geometry

Unit – I

1.0   Solve the problems on Straight lines

1.1   Write the different forms of a straight line – point slope form, two point form, intercept form, normal form and general form

1.2   Solve simple problems on the above forms

1.3   Find distance of a point from a line, acute angle between two lines, intersection of two non-parallel lines and distance between two parallel lines.

2.0   Solve the problems on Circles

2.1   Define locus of a point, circle and its equation.

2.2   Find the equation of a circle given

(i)   Centre and radius

(ii)   Two ends of a diameter

     (iii)   Centre and a point on the circumference

     (iv)   Three non collinear points

     (v)   Centre and tangent

2.3   Write the general equation of a circle and find the centre and radius.

2.4   Write the equation of tangent and normal at a point on the circle.

2.5   Solve the problems to find the equations of tangent and normal.

Unit – II

3.0   Appreciate the properties of Conics in engineering applications

3.1   Define a conic section.

3.2   Understand the terms focus, directrix, eccentricity, axes and latus rectum of a conic with illustrations.

3.3   Find the equation of a conic when focus, directrix and eccentricity are given

3.4   Describe the properties of Parabola, Ellipse and Hyperbola

3.5   Solve problems in simple cases of Parabola, Ellipse and Hyperbola.

Differential Calculus

UNIT - III

4.0   Use the concepts of Limit for solving the problems

4.1   Understand the concept of limit and meaning of $\lim\limits_{x \to a} f(x) = l$ and state the properties of limits.

4.2   Mention the Standard limits $\lim\limits_{x \to a} \dfrac{x^n - a^n}{x - a}$, $\lim\limits_{x \to 0} \dfrac{\sin x}{x}$, $\lim\limits_{x \to 0} \dfrac{\tan x}{x}$, $\lim\limits_{x \to 0} \dfrac{a^x - 1}{x}$, $\lim\limits_{x \to 0} \dfrac{e^x - 1}{x}$, $\lim\limits_{x \to 0} (1 + x)^{\frac{1}{x}}$,

$\lim\limits_{x \to \infty} \left(1 + \dfrac{1}{x}\right)^x$ (All without proof).

4.3   Solve the problems using the above standard limits

4.4   Evaluate the limits of the type $\lim\limits_{x \to l} \dfrac{a x^2 + b x + c}{\alpha x^2 + \beta x + \gamma}$ and $\lim\limits_{x \to \infty} \dfrac{f(x)}{g(x)}$

5.0   Appreciate Differentiation and its meaning in engineering situations

5.1   State the concept of derivative of a function y = f(x) – definition, first principle as $\lim\limits_{h \to 0} \dfrac{f(x+h) - f(x)}{h}$ and also provide standard notations to denote the derivative of a function.

5.2   State the significance of derivative in scientific and engineering applications.

5.3   Find the derivatives of elementary functions like x^n , a^x, e^x, log x, sin x, cos x, tanx, Secx, Cosecx and Cot x using the first principles.

5.4   Find the derivatives of simple functions from the first principle.

5.5   State the rules of differentiation of sum, difference, scalar multiplication, product and quotient of functions with illustrative and simple examples.

5.6 Understand the method of differentiation of a function of a function (Chain rule) with illustrative examples such as

(i) $\sqrt{t^2 + \dfrac{2}{t}}$ (ii) $x^2 \sin 2x$ (iii) $\dfrac{x}{\sqrt{x^2 + 1}}$ (iv) $\log(\sin(\cos x))$.

Unit – IV

6.0 Appreciate Differentiation and its meaning in engineering situations

6.1 Find the derivatives of Inverse Trigonometric functions and examples.

6.2 Understand the method of differentiation of a function with respect to another function and also differentiation of parametric functions with examples.

6.3 Find the derivatives of hyperbolic functions.

6.4 Explain the procedures for finding the derivatives of implicit function with examples.

6.5 Explain the need of taking logarithms for differentiating some functions with examples like $[f(x)]^{g(x)}$.

6.6 Explain the concept of finding the higher order derivatives of second and third order with examples.

6.7 Explain the concept of functions of several variables, partial derivatives and difference between the ordinary and partial derivatives with simple examples.

6.8 Explain the definition of Homogenous function of degree n

6.9 Explain Euler's theorem for homogeneous functions with applications to simple problems.

Applications of Differentiation

UNIT - V

7.0 Understand the Geometrical Applications of Derivatives

7.1 State the geometrical meaning of the derivative as the slope of the tangent to the curve y=f(x) at any point on the curve.

7.2 Explain the concept of derivative to find the slope of tangent and to find the equation of tangent and normal to the curve y=f(x) at any point on it.

7.3 Find the lengths of tangent, normal, sub-tangent and sub normal at any point on the curve y=f(x) .

7.4 Explain the concept of angle between two curves and procedure for finding the angle between two given curves with illustrative examples.

Unit – VI

8.0 Understand the Physical Applications of Derivatives

8.1 Explain the derivative as a rate of change in distance-time relations to find the velocity and acceleration of a moving particle with examples.

8.2 Explain the derivative as a rate measurer in the problems where the quantities like volumes, areas vary with respect to time- illustrative examples.

9.0 Use Derivatives to find extreme values of functions

9.1 Define the concept of increasing and decreasing functions.

9.2 Explain the conditions to find points where the given function is increasing or decreasing with illustrative examples.

9.3   Explain the procedure to find the extreme values (maxima or minima) of a function of single variable - simple problems yielding maxima and minima.

9.4   Solve problems on maxima and minima in applications like finding areas, volumes, etc.

Suggested Student Activities

1. Student visits Library to refer Standard Books on Mathematics and collect related material.

2. Quiz

3. Group discussion

4. Surprise tests

5. Seminars

6. Home assignments.

STATE BOARD OF TECHNICAL EDUCATION & TRAINING, TELANGANA

DIPLOMA EXAMINATIONS, MODEL PAPER, II SEMESTER

ENGINEERING MATHEMATICS

TIME: 3 Hours   Max. Marks: 80

PART – A   Marks: 10 X 2 = 20

*NOTE: 1) Answer **ALL** questions and each question carries **Two** marks.*
2) Answers should be brief and straight to the point and shall not exceed three
simple sentences

1. Find the slope of the curve $y = x^2 + 2x - 1$ at (1, 2)
2. Write the formula to find the equation of Normal to a given curve at a point (x_1, y_1)
3. Write the condition for orthogonality of two intersecting curves?
4. Find the velocity of a particle when $S = t^2 + 3t - 4$ at t = 1sec .
5. Find the acceleration of the particle when S = t² – 6t + 8 (t is in sec.) at the instant where the velocity is zero.
6. Define increasing and decreasing functions.
7. Find the distance between parallel lines 2x + 3y + 5 =0 and 2x + 3y + 9 = 0
8. Find the centre of the circlex^2+ y² – 6x + 4y – 12 = 0.
9. Evaluate $\displaystyle \underset{x \to 0}{Lt} \frac{2x^3 - 3x^2 + 1}{9x^2 + 8x + 7}$
10. Differentiate x^3 + sinx w.r.t. x

PART – B

Group -1   Marks: 2 X 5 = 10

*NOTE: 1) Answer any **Two** questions and each question carries **Five** marks*
2)The answers should be comprehensive and the criteria for valuation is the content
but not the length of the answer.

11. Find the equations of the tangent and normal to the curve y = x² + 2x – 1 at (1,2)

12. The volume of spherical balloon is increasing at a rate of 40 cu.cm/sec. Find the rate of

increase of its surface area and radius at the instant when its radius is 10 cms.

13. Find the Maximum and Minimum values of 4x³ – 3x²– 18x + 12

Group -2   Marks : 2 X 5 = 10

*NOTE: 1) Answer any **Two** questions and each question carries **Five** marks*
2)The answers should be comprehensive and the criteria for valuation is the content
but not the length of the answer.

14. Find the equation of the Circle passing through the points (0, 0), (a,0) and (0, b).

15. Find $\dfrac{dy}{dx}$, If $y = Sin(x^2 + 2x + 1)^3$

16. A Circular metal plate expands by heat so that its radius is increasing at the rate of

0.02 cm per second. At what rate its area is increasing when the radius is 20 cm?

<div align="center">PART – C</div>

Group-1
<div align="right">Marks: 2 X 10 = 20</div>

*NOTE:1) Answer any **Two** questions and each question carries **Ten** marks*
2)The answers should be comprehensive and the criteria for valuation is the content
but not the length of the answer.

17. Show that the curves $y^2 = 4ax$ and $xy = c^2$ $cut\ each\ other\ orthogonally$

$$if\ \ c^4 = 32a^4$$

18. An inverted cone has a depth of 10 cm., base radius is 4 cm , water is poured in to the

cone at the rate of 1 cc/sec . Find the rate at which the level of water is increasing

when the height of the water level is 6 cm .

19   A rectangular sheet of metal of dimensions 8cm X 5 cm , equal squares are cut off from

the corners and the flaps are then folded up to form an open rectangular box . Find the

side of the square cut off so that the box may be of greater capacity. What is the

maximum capacity of the box so made.

Group-2
<div align="right">Marks: 2 X 10 = 20</div>

*NOTE:1) Answer any **Two** questions and each question carries **Ten** marks*
2)The answers should be comprehensive and the criteria for valuation is the content
but not the length of the answer.

20. Find the Centre, Vertices, Eccentricity, Foci, Lengths of axes, Length of Latus Rectum,

and equations of Directrices of the Hyperbola $\dfrac{x^2}{25} - \dfrac{y^2}{16} = 1$

21 a) Find the derivative of logSinx w.r.t Cotx

b) Find $\dfrac{\partial^2 z}{\partial x^2}$ & $\dfrac{\partial^2 z}{\partial y^2}$, if $z = x^3 + y^3 - 3axy$

22. a) Find the angle between the curves $y = x^2$, $y = 4 - x^2$

b) Find the lengths of the tangent, normal, sub-tangent and sub-normal for the curve

$y = x^3 - 3x^2 - 8x - 2$ at (3, 4)

<div align="center">@ @ @</div>

STATE BOARD OF TECHNICAL EDUCATION & TRAINING, TELANGANA
BOARD DIPLOMA EXAMINATIONS
MID SEM –I, MODEL PAPER, II SEMESTER
ENGINEERING MATHEMATICS

TIME: 1: 30 Hours   Max. Marks: 40

PART – A   Marks: 5 X 2 = 10

*NOTE: 1) Answer **ALL** questions and each question carries **Two** marks.*
2) Answers should be brief and straight to the point and shall not exceed three
simple sentences

1. Find the distance between parallel lines 2x + 3y + 5 =0 and 2x + 3y + 9 = 0
2. Find the slope of the straight line 3x + 4y + 9 = 0
3. Find the radius of the circle x^2+ y^2 – 6x + 4y – 12 = 0.
4. Find the focus and length of latus rectum of the parabola y^2 = 8x
5. Find the Length of major and minor axes of the Ellipse $\frac{x^2}{16} + \frac{y^2}{9}$ = 1

PART – B   Marks: 2 X 5 = 10

*NOTE: 1) Answer any **Two** questions and each question carries **Five** marks*
2)The answers should be comprehensive and the criteria for valuation is the content
but not the length of the answer.

6. Find the point of intersection of the lines x – 3y + 6 = 0 and 2x + 3y – 10 = 0 .

7. Find the equation of the Circle passing through the points (0, 0), (1,0) and (0,2)

8. Find the equation of the Parabola with focus at (2 , -3) and whose directrix is

   3x – 4y + 16 = 0

PART – C   Marks: 2 X 10 = 20

*NOTE: 1) Answer any **Two** questions and each question carries **Ten** marks*
2)The answers should be comprehensive and the criteria for valuation is the content
but not the length of the answer.

9a) Find the angle between the lines 2x – y + 3 = 0 and x +y – 2 = 0

 b) Find the equation of the straight line passing through the point (2 , -5) and perpendicular
to the line 7x + 2y – 1 = 0 .

10 Find the equations of the Tangent and Normal to the Circle $x^2 + y^2 - 6x - 3y - 2 = 0$

   at (2 , -2)

11. Find the Centre, Vertices, Eccentricity, Foci, Lengths of axes, Length of Latus Rectum,

   and equations of Directrices of the Hyperbola $\frac{x^2}{16} - \frac{y^2}{9} = 1$

Course Title	Applied Physics	Course Code	18C-203F
Semester	II	Course Group	Core
Teaching Scheme in Pds/Hrs(L:T:P)	30:15:0 Hrs 40:20:00 Pds	Credits	3
Type of course	Lecture+ Assignments	Total Contact Hrs	60Pds
CIE	60 Marks	SEE	40 Marks

Pre requisites: Basic High school science, basic mathematics

Course Objectives: After studying this course, the student will be able to understand and appreciate the role of Engineering Physics in different areas of engineering and technology.

Course outcomes: On successful completion of the course, the student will have the ability to attain below Course outcomes (CO):

	Course Outcomes	Linked POs	Teaching Hours
CO 1	Apply knowledge of waves and sound in engineering problems.	PO1,PO2	10
CO 2	Apply knowledge of Simple Harmonic Motion to solve engineering problems	PO1, PO2	10
CO 3	Use modern instruments in engineering	PO1, PO2,PO3, PO4	10
CO 4	Use various magnetic materials in engineering equipments	PO1, PO2,PO3	10
CO 5	Use various electrical measuring instruments as tools in engineering	PO1, PO2,PO3, PO4	10
CO 6	Apply Electronics principles in engineering problems	PO1, PO2,PO3, PO4	10

APPLIED PHYSICS
Course Contents

1. **UNIT – 1 WAVES AND SOUND**   **Duration: 10 periods (L:6.0 – T: 4.0)**

Wave motion – definition and characteristics – audible range – infrasonic and ultrasonic – longitudinal and transverse waves – examples – Relation between wavelength, frequency and velocity of a wave – derivation –stationary waves- beats - applications of beats - Doppler effect – list of applications – ultrasound and radar in medicine and engineering as special emphasis - echo –definition - applications - relation between time of echo and distance of obstacle –derivation- Reverberation and time of reverberation - Sabine's formula - Free and forced vibrations - Resonance - Conditions of good auditorium - noise pollution – definition – effects and methods to minimize noise pollution - problems

2. UNIT – 2   SIMPLE HARMONIC MOTION   Duration: 10 periods (L:6.0 – T: 4.0)

Periodic motion - Simple Harmonic Motion (SHM)– definition - examples - Conditions for SHM – Projection of circular motion on any diameter of a circle is SHM - Expressions for Displacement, Velocity and Acceleration of a particle executing SHM – derivations - Time period, frequency, amplitude and phase of particle in SHM - Ideal simple pendulum – time period of simple pendulum – derivation - laws of simple pendulum -Seconds pendulum - problems.

3.   UNIT – 3   MODERN PHYSICS   Duration: 10 periods (L:6.0 – T: 4.0)

Photo electric effect - Einstein's photo electric equation – Work function and threshold frequency - laws of photo electric effect - applications of photo electric effect – photo cell - concept of Refraction of light - critical angle and total internal reflection - principle of Optical fiber - Applications of optical fiber – LASER – definition and characteristics – principle of LASER - spontaneous and stimulated emission-population inversion-examples of LASER – Uses.

4. UNIT-4   MAGNETISM   Duration: 10 periods (L:6.0 – T: 4.0)

Magnetic field - magnetic lines of force -properties - Uniform and Non-uniform magnetic field – Magnetic length, pole strength – magnetic induction field strength- definition - Coulomb's inverse square law of magnetism - expression for moment of couple on a bar magnet placed in a uniform magnetic field – derivation - expression for magnetic induction field strength at a point on the axial line of a bar magnet -derivation- Dia, Para and Ferro magnetic materials – examples - related problems.

5.   UNIT-5   ELECTRICITY AND MEASURING INSTRUMENTS
                                        Duration: 10 periods (L:6.0 – T: 4.0)

Ohm's law –Ohmic and non ohmic conductors – examples - Temperature dependence of resistance – coefficients of resistance with examples - Specific resistance – units – conductance- moving coil galvanometer - conversion of galvanometer into ammeter and voltmeter with diagram (qualitatively) – Kirchhoff's current and voltage laws in electricity – Expression for balancing condition of Wheatstone's bridge – derivation – Meter bridge –working with neat diagram –Superconductivity-definition-superconductors-definition and examples-applications- related problems.

6. UNIT – 6   ELECTRONICS   Duration: 10 periods (L:6.0 – T: 4.0)

Solids – definition – energy bands in solids- valence band, conduction band and forbidden band – Energy band diagram of conductors, insulators and semiconductors – concept of Fermi level - Intrinsic semiconductors - examples - Concept of holes in semiconductors - Doping - Extrinsic semiconductor - P-type and N-type semiconductors - PN Junction diode – Forward Bias and Reverse Bias - Applications of PN diode - Diode as rectifier – principle – principle of Light Emitting Diode and solar cell.

Specific learning outcomes:

Upon completion of the course the student shall be able to

1. know the concept of Waves and Sound

1.1 Define wave. Explain the characteristics of wave (frequency, wavelength, amplitude)
1.2 Explain audibility range of sound.
1.3 Define infrasonic and ultrasonic sounds.
1.4 Define longitudinal and transverse wave motion. Write examples for each. Distinguish between them.
1.5 Derive the relation between wavelength, frequency and velocity of wave ($v = n\lambda$)
1.6 Define stationary waves.
1.7 Explain the phenomenon of beats. List the applications of beats.
1.8 Explain Doppler Effect. List the applications of Doppler Effect.
1.9 Application of Doppler Effect in medicine and engineering - ultrasound and radar.
1.10 Define echo. List the applications of echo.
1.11 Derive the relation between time of echo and distance of obstacle.
1.12 Explain Reverberation and time of reverberation.
1.13 Write Sabine's formula and explain the terms.
1.14 Define free and forced vibrations.
1.15 Define resonance with examples.
1.16 State the conditions of a good auditorium.
1.17 Define noise pollution.
1.18 List the effects and methods to minimize noise pollution.
1.19 Solve related numerical problems.

2. know the concept of Simple Harmonic Motion

2.1 Define periodic motion
2.2 Define Simple Harmonic Motion (SHM)
2.3 List the examples of SHM.
2.4 State the conditions of simple harmonic motion
2.5 Projection of circular motion on any diameter of a circle is SHM.
2.6 Derive the expressions for Displacement, Velocity and Acceleration of a particle executing SHM.
2.7 Define the terms time period, frequency, amplitude and phase of particle in SHM
2.8 Define Ideal simple pendulum and derive the expression for time period of simple pendulum.
2.9 State the laws of simple pendulum.
2.10 Define seconds pendulum.

2.11   Solve related numerical problems.

3.   know the concept of Modern Physics

3.1   Explain Photo electric effect.
3.2   State Einstein's photo electric equation.
3.3   Define terms work function and threshold frequency.
3.4   State laws of photo electric effect.
3.5   List the applications of photo electric effect.
3.6   Define critical angle.
3.7   Define Total internal reflection.
3.8   State conditions for Total internal reflection
3.9   What is Optical fiber? and explain working principle of optical fiber
3.10   List the applications of optical fiber.
3.11   Explain the principle of LASER.
3.12   Define spontaneous and stimulated emission.
3.13   Define population inversion.
3.14   List the examples of LASER.
3.15   List the uses of LASER.

4   know the concept of Magnetism

4.1   Define magnetic field.
4.2   Define magnetic lines of force.
4.3   State the properties of magnetic lines of force.
4.4   Define Uniform and Non-uniform magnetic field.
4.5   Define the terms magnetic length and pole strength of a bar magnet.
4.6   Define magnetic induction field strength.
4.7   State and explain Coulomb's inverse square law of magnetism.
4.8   Derive the expression for moment of couple on a bar magnet placed in a uniform
         magnetic field.
4.9   Derive the formula for magnetic induction field strength at a point on the axial line of a bar magnet.
4.10   Define Dia, Para and Ferro magnetic materials with examples.
4.11   Solve related numerical problems.

5   know the concept of Electricity and measuring instruments

5.1   State Ohm's law – Define ohmic and non ohmic conductors with examples
5.2   Explain temperature dependence of resistance – types of temperature coefficients with examples
5.3   Define specific resistance. Write its units.
5.4   Define conductance.
5.5   Write the formulae for effective resistance in series and parallel combination of resistors.
5.6   State and explain Kirchhoff's current and voltage laws in electricity.
5.7   Explain moving coil galvanometer.
5.8   How a galvanometer is converted to ammeter and voltmeter?
5.9   Derive an expression for balancing condition of Wheatstone's bridge with legible sketch.
5.10   Explain briefly Meter Bridge with neat diagram.
5.11   Define superconductivity.
5.12   Define superconductor. Give examples.
5.13   List the applications of superconductors.
5.14   Solve related numerical problems.

6   know the concepts of Electronics and applications

6.1   Define solid.
6.2   Define valence band, conduction band and forbidden band.
6.3   Explain conductors, insulators and semiconductors on the basis of energy band diagram.
6.4   Explain the concept of Fermi level.
6.5   Define intrinsic semiconductors.
6.6   List the examples for intrinsic semiconductors.
6.7   Explain the concept of hole in semiconductors.
6.8   Define doping
6.9   Define extrinsic semiconductors.
6.10   Explain P-type and N-type semiconductors.
6.11   Explain PN Junction Diode (formation only).
6.12   Explain forward and reverse bias of PN diode (biasing and flow of majority and minority carriers with diagram only)
6.13   List applications of PN Diode.
6.14   Explain the principle of diode as a rectifier.
6.15   Explain working principle of Light Emitting Diode (LED)
6.16   Explain the working principle of solar cell.

APPLIED PHYSICS

Time: $1\frac{1}{2}$ Hours]   [Max Marks: 40

PART-A

Answer **ALL** questions. Each question carries two marks.   5 x 2 = 10

1. Write Sabine's formula and explain terms in it.
2. An observer listens echo from a distant hill in 10 sec. If velocity of sound in air is 340 m/s find distance between observer and hill.
3. Define transverse and longitudinal wave motion.
4. Define SHM and give examples.
5. Find length of seconds pendulum.

PART-B

Answer any **TWO** questions. Each question carries five marks.   2 x 5 = 10

6. Define noise pollution and write methods to reduce noise pollution.
7. Define Doppler effect and write its application.
8. Write conditions for SHM.

PART-C

Answer any **TWO** questions. Each question carries ten marks.   2 x 10 = 20

9 (a) Define beats and write its applications.   (5)

 (b) Write conditions for good auditorium.   (5)

10 (a) Derive formula for velocity and acceleration in case of SHM.   (6)

  (b) A body under SHM is represented by y = 10 Sin(6t) in meter. Find its maximum velocity and maximum acceleration.   (4)

11 (a) Define ideal simple pendulum. Find expression for time period in case of simple pendulum.   (7)

  (b) State laws of simple pendulum.   (3)

Time: $1\frac{1}{2}$ Hours]   [Max Marks: 40

PART-A

Answer **ALL** questions. Each question carries two marks.   5 x 2 = 10

1. Define photo electric effect.
2. Define threshold frequency.
3. Define magnetic length of a bar magnet.
4. Find the magnetic moment of a bar magnet of length 20 cm and pole strength is   5 A-m.
5. Write any two properties of bar magnet.

PART-B

Answer any **TWO** questions. Each question carries five marks.   2 x 5 = 10

6. Write Einstein's photo electric equation and explain the terms in it.
7. What conditions are required for total internal reflection to take place.
8. State and explain Couloumb's inverse square law.

PART-C

Answer any **TWO** questions. Each question carries ten marks.   2 x 10 = 20

9 (a). State the laws photo electric effect.   (6)
  (b). Write the applications of photo electric effect.   (4)
10(a). Discuss the expression for moment of a couple on a bar magnet placed in a uniform magnetic field.   (6)
  (b). A bar magnet of length 20 cm and pole strength 5 A-m makes an angle 30^0 with a uniform magnetic field of induction 100 tesla. Find the moment of couple on it.
                                                                              (4)
11(a). Derive the expression for magnetic induction field strength at a point on the axial line.   (7)
  (b). Calculate the magnetic induction due to a short bar magnet of magnetic moment 0.5 A m^2 at a distance of 20 cm on the axial line from the mid point of magnet.
                                                                              (3)

BOARD DIPLOMA EXAMINATION, (C-18)

MODEL PAPER

SECOND SEMESTER EXAMINATION

APPLIED PHYSICS

Time: 3 Hours]   [Max Marks: 80

PART-A   **10 x 2 = 20**

Instructions: (1) Answer **ALL** questions.
               (2) Each question carries **TWO** marks.

1. Define terms reverberation and reverberation time.
2. Define terms time period and frequency in case of SHM.
3. Write Einstein Photo electric equation. Explain terms involved in it.
4. Define uniform magnetic field and non uniform magnetic field.
5. Define ohmic and non ohmic conductors.
6. Define specific resistivity.
7. Define super conductors and give examples.
8. Define conduction band and valence band.
9. Define intrinsic and extrinsic semi conductors.
10. Write applications of PN Diode.

PART-B

GROUP-1   **Answer any TWO questions**   **2 x 5 = 10**

11. Define echo. Derive formula for minimum distance to listen echo.   (1+4)
12. Define noise pollution. Write four bad effects of noise pollution.   (1+4)
13.   Derive expression for couple acting on a bar magnet placed inside a uniform magnetic field.
    (5)

GROUP-2   **Answer any TWO questions**   **2 x 5 = 10**

14.   Explain conversion of galvanometer into ammeter and voltmeter with the help of
    diagrams.   (2+3)
15. Draw energy band diagrams for conductors, insulators and semi conductors.
16. Explain the working of solar cell.

PART-C

GROUP-1   **Answer any TWO questions**   **2 x 10 = 20**

17 (a) Derive expression for time period in case of simple pendulum.   (7)

(b) Find the length of seconds pendulum on the surface of moon (g on the moon = 1/6 th of g on the earth)   (3)

18 (a) Define Dia, para and ferro magnetic materials.   (3)

(b) Derive formula for magnetic induction field strength at a point on the axial line of bar magnet.   (7)

19 (a) State and explain Kirchhoff's law.   (6)

(b) Two wires of same material are having lengths in the ratio 2:3 and radii 1:2. Find the ratio of their resistances.   (4)

GROUP-2   **Answer any TWO questions**   **2 x 10 = 20**

20 (a) Derive an expression for balancing condition of Wheatstone's bridge.   (7)

(b) Three currents 1 mA, 3 mA and x mA are flowing towards a junction and two currents   2 mA and 3 mA are flowing away from the junction. Find the value of x.   (3)

21 (a) What is doping? Explain formation of P-type and N-type semi conductors.   (7)

(b) Explain principle of diode as rectifier.   (3)

22 (a) What is PN diode? Draw diagrams for forward and reverse bias.   (6)

(b) Explain the working principle of Light Emitting Diode (LED)   (4)

Course Title: **Engineering Chemistry and Environmental Studies**	Course Code : 18-**Common-204F**
Semester : **Semester II**	Course Group : Common
Teaching Scheme in hours (L:T:P) : 3**0:15:00**	Credits : **3**
Type of course : **Lecture + Assignments**	Total Contact Hours : **60 periods**
CIE : **60 Marks**	SEE : **40 Marks**

Prerequisite:

Basic knowledge of chemistry in secondary education.

Course Objectives: After studying this course the student will be able to understand and appreciate the role of Chemistry and environmental studies in different spheres of industries.

Course Outcome:

On successful completion of the course, the students will have ability to attain below Course Outcomes (CO):

CO	Course outcome	CL	Linked PO	Teaching periods
CO1	Understand and explain the different metallurgical processes, alloys and applications of alloys	R/U/A	1,2,9,10	**10**
CO2	Understand and explain corrosion and preventive methods of corrosion	R/U/A	1,2,9,10	**10**
CO3	List out the different methods of preparation and industrial uses of plastics, rubber and fibers. vulcanization of rubber and its applications	R/U/A	1,2,5,6,7, 10	**12**
CO4	Classify the fuels and explain basic terms of fuel, outline the composition and industrial use of gaseous fuels	R/U/A	1,2,10	**8**
CO5	Under stand and Explain Galvanic cell, emf of cell - electro chemical series-Applications of Galvanic cells, batteries and cells and distinguish the Galvanic and electrolytic cell	R/U/A	1,2,5	**12**
CO6	Explain the causes, effects and controlling methods of air and water pollutions.	R/U/A	1,2,5,7	**8**
	Total Periods			60

Legends: R = Remember, U= Understand, A = Apply

ENGINEERING CHEMISTRY AND ENVIRONMENTAL STUDIES
COURSE CONTENTS

UNIT - I: Metallurgy: (10 periods)
Characteristics of Metals - distinguish between Metals and Non Metals- Ore, Gangue, Flux, Slag - Concentration of Ore -Froth floatation - Methods of Extraction of crude Metal - Roasting, Calcination, Smelting – Alloys-purpose of making alloys - Composition of Brass, German silver, Nichrome, Stainless steel and Duralumin

UNIT – II: Corrosion: (10 periods)
Introduction - factors influencing the rate of corrosion - electrochemical theory of corrosion - composition, stress and concentration cells- rusting of iron and its mechanism - prevention of corrosion - coating methods, Paints-constituents and characteristics of paints -cathodic protection.

UNIT – III: Polymers: (12 periods)

Introduction - polymerization - types of polymerization - addition, condensation with examples - plastics - types of plastics - advantages of plastics over traditional materials - Disadvantages of using plastics - preparation and uses of the following plastics: 1. Polythene 2. PVC 3. Teflon 4.
Polystyrene 5. Urea formaldehyde 6. Bakelite - Rubber - Elastomers –Preparartion of Butyl rubber, Buna-s, Neoprene rubber and their uses-Fibres-Preparation and uses of fibres-Nylon 6,6-Polyester.

UNIT – IV: Fuels: (8 periods)
Definition and classification of fuels- characteristics of good fuel - Calorific value-HCV and LCV-Calculation of oxygen required for combustion of methane and ethane - composition and uses of gaseous fuels- a) water gas b) producer gas, c) natural gas, d) coal gas, e) Bio gas
and f) acetylene.

UNIT – V: Electro Motive Force   (12 periods)

Galvanic cell – standard electrode potential – electro chemical series -emf of cell- Batteries-Types of batteries-Fuel cells.

UNIT – VI: ENVIRONMENTAL STUDIES-II :   (8 periods)

Introduction- classification of air pollutants based on origin and states of matter-Air pollution - causes-Effects - control methods - Water pollution - causes - effects - control measures.

Reference Books :

1.   Engineering chemistry – Jain & Jain – Dhanpat Rai Publishing Company.
2.   A Text book of Engineering Chemistry – S.S.Dara – S.Chand Publications.
3.   Environmental Studies – A.K.De.
4.   Environmental Studies, R. Rajagopalan, 2nd Edition, 2011, Oxford University Press
5.   Intermediate Chemistry I and II – Telugu Academy TS

Specific Learning Outcomes:

Upon completion of the course, the student will have ability to

UNIT – I: METALLURGY
1.1. List the Characteristics of Metals.
1.2. Distinguish between Metals and Non Metals
1.3. Define the terms 1.Mineral, 2.Ore, 3. Gangue, 4. Flux and 5.Slag
1.4. Describe Froth Floatation method of concentration of ore.
1.5. Describe the methods involved in extraction of crude metal- Roasting, Calcination and
      Smelting.
1.6. Define an Alloy
1.7. Explain the purpose of making of alloys
1.8. Write the Composition of the following alloys:1.Brass, 2.German silver, 3.Nichrome
      4. Stainless steel, 5. Duralumin
1.9. List the uses of following Alloys: Brass, German silver, Nichrome, Stainless steel,
      Duralumin
UNIT – II: CORROSION

2.1. Define the term corrosion
2.2. Explain the Factors influencing the rate of corrosion
2.3. Explain the concept of electrochemical theory of corrosion
2.4. Describe the formation of a) composition cell, b) stress cell c) concentration cell
2.5. Define rust and explain the mechanism of rusting of iron with chemical reactions.
2.6. Explain the methods of prevention of corrosion:
    a) Protective Coatings i) Metallic coatings (Anodic and cathodic coatings) ii) Inorganic
       coatings iii) Organic coatings, paint, constituent of paint and characteristics of good paint.
    b) Cathodic protection (Sacrificial anode process and Impressed - voltage process).

UNIT – III: POLYMERS

3.1. Explain the concept of polymerization
3.2. Describe the methods of polymerization a) addition polymerization
    b) condensation polymerization with examples.
3.3. Define the term plastic
3.4. List the Characteristics of plastics.
3.5. State the advantages of plastics over traditional materials
3.6. State the disadvantages of using plastics.
3.7. Types of plastics with examples.
3.8. Distinguish between thermoplastics and thermosetting plastics
3.9. Explain the methods of preparation and uses of the following plastics:
    1. Polythene, 2. PVC, 3.Teflon, 4. Polystyrene 5. Urea formaldehyde 6. Bakelite
    (only flow chart for Bakelite i.e. without chemical equations).
3.10. Define the term natural rubber
3.11. Explain preparation of natural rubber
3.12. State the structural formula of Natural rubber
3.13. List the Characteristics of natural rubber
3.14. Explain the process of Vulcanization
3.15. List the Characteristics of Vulcanized rubber
3.16. Define the term Elastomer
3.17. Describe the preparation and uses of the following synthetic rubbers a) Butyl rubber,
    b) Buna-s and c) Neoprene rubber.
3.18. Define fibre.
3.19. Explain the preparation and uses of fibres –Nylon 6,6 and Polyester

UNIT – IV: FUELS

4.1. Define the term fuel
4.2. Classify the fuels based on physical state - solid, liquid and gaseous fuels with examples.
4.3. Classify the fuels based on occurrence- primary and secondary fuels with examples.
4.4. List the characteristics of a good fuel
4.5. Advantages of gaseous fuels
4.6. Define Calorific value- HCV and LCV.
4.7. Calculate the oxygen required for the combustion of Methane and Ethane fuel gases.
4.8. State the composition and uses of the following gaseous fuels:
    a) water gas, b) producer gas, c) natural gas, d) coal gas, e) Bio gas and f) acetylene

UNIT – V: Electro Motive Force

5.1. Define Galvanic cell
5.2. Explain the construction and working of Galvanic cell
5.3. Distinguish between electrolytic cell and galvanic cell
5.4. Explain standard electrode potential
5.5. Explain standard hydrogen electrode
5.6. Define electrochemical series and explain its significance.
5.7. Define and explain emf of a cell.

5.8. Solve the numerical problems on emf of cell
5.9. Explain Batteries (Cells) and types of batteries with examples –working and applications of
     Dry cell (Leclanche cell), Lead storage battery, Ni-Cd cell
5.10. Explain working and advantages of Fuel cell (Hydrogen - Oxygen Fuel Cell)

UNIT – VI: ENVIRONMENTAL STUDIES-II
6.1. Define air pollution
6.2. Classify the air pollutants- based on origin and states of matter
6.3. Explain the causes of air pollution
6.4. Explain the effects of air pollution on human beings, plants and animals
6.5. Explain the green house effect - ozone layer depletion and acid rain
6.6. Explain the methods of control of air pollution
6.7. Define water pollution
6.8. Explain the causes of water pollution
6.9. Explain the effects of water pollution on living and non living things
6.10. Explain the methods of control of water pollution.

Internal evaluation:

Test	Units	Marks	Pattern
Mid Sem 1	1 and 2	20	Part A- 5 Short answer questions Part B- 2 Essay questions out of 3 Questions Part C- 2 Essay questions out of 3 Questions
Mid Sem 2	3 and 4	20	Part A 5 Short answer questions Part B 2 Essay questions out of 3 Questions Part C- 2 Essay questions out of 3 Questions

PART-A

Answer **all** questions, each carries **two** marks   10 X 2 =20

1. Write any four characteristics of metals.
2. Define corrosion.
3. Define addition polymerization.
4. Define calorific value.
5. Define galvanic cell.
6. Define emf.
7. Define standard electrode potential.
8. Define global warming.
9. Define primary pollutant. Give example.
10. Define water pollution.

PART-B

Group - I

Answer any **two** questions, each carries **five** marks   2 X 5 = 10

11. Distinguish electrolytic cells from galvanic cells.
12. Write any five effects of air pollution on human beings.
13. Write a brief note on depletion of ozone layer.

Group - II

Answer any **two** questions, each carries **five** marks   2 X 5 = 10

14. Write about roasting and calcination.
15. Write any five advantages of plastics.
16. Explain the construction of standard hydrogen electrode.

PART-C

GROUP - I

Answer any **two** questions, each carries **ten** marks   2 X 10 = 20

17. (a) Explain the significance of electro chemical series .
    (b) Calculate the emf of the following cell if the standard reduction
        potentials of Zn and Cu are -0.76 V and +0.34 V respectively.
        $$Zn \mid Zn^{2+} \mid\mid Cu^{2+} \mid Cu$$

18. (a) Explain about the working and applications of Ni-Cd cell.
    (b) Explain about the working of Hydrogen- Oxygen fuel cell and its
        advantages.

19. (a) Write a brief note on acid rain.
    (b). Write about the role of Cottrell electrostatic precipitator and Zoning of
        industries in controlling air pollution.

GROUP - I

Answer any **two** questions, each carries **ten** marks   2 X 10 = 20

20. (a) Explain the process of concentration of sulphide ore by froth flotation
        process.
    (b) Explain the impressed voltage method of protecting metal from
        corrosion.

21. (a) Write the preparation method and uses of nylon 6,6 and polyester.
    (b) Calculate the volume of oxygen required at STP for complete
        combustion of one mole of methane.

22. (a) Write any four effects of water pollution.
.   (b) Explain any three methods of controlling water pollution.

Course Title:	**Levelling Surveying**		Course Code	:	**18C-205C**
Semester:		**II Semester**	Course Group	:	**Core**
Teaching Scheme in Hrs(L:T:P):		**36:24:0**	Credits	:	**3**
Type of Course	:	**Lecture+Assignments**	Total Contact Hours	:	**60 Periods**
CIE	:	**60 Marks**	SEE	:	**40 Marks**

Pre requisites

This course requires the basic knowledge of Surveying.

Course Outcomes

Upon completion of the course the student shall be able to

CO1 :	Illustrate the basics in leveling and types of leveling Instruments
CO2 :	Compute the Reduced Levels by different methods
CO3 :	Calculate errors due to curvature and refraction, familiarize with precautions and corrections in levelling
CO4 :	Explain the different methods of levelling carried out in the field
CO5 :	Explain different methods of drawing contours and their applications in Civil engineering
CO6 :	Explain the use and working principle of various minor instrument

Course Content and Blue Print of Marks for SEE

Module	Unit No	Unit Name	Hours/Periods	Questions to be set for SEE			Marks Weightage	Weightage %
				R	U	A		
PART-A	1	Introduction to levelling	8	1	0	0	02	2
	2	Concept and calculation of Reduced levels	12	1	1	1	17	15
PART-B	3	Errors, precautions and corrections in levelling	06	1	1	0	07	7
	4	Methods of levelling	14	1	0	1	12	11
PART-C	5	Permanent adjustments of a level &Contouring	14	3	3	3	51	46
	6	Minor Instruments	06	3	1	1	21	19
		Total	60	10	6	6	110	100

Upon completion of the course the student shall be able to

Familiarize with principleand operations of levelling

1.1   Define levelling and list the types of levelling instruments

1.2   Define the important terms in levelling

1.3   List the component parts of a dumpy level and their functions

1.4   Explain the steps involved in Temporary adjustments of a dumpy level.

1.5   List various types of levelling staves

Explain the different methods of calculating Reduced Levels

2.1   Tabulate the levelling field data

2.2   Compute reduced levels by height of instrument and Rise and fall methods, and apply check

2.3   Compare height of instrument and Rise and fall methods.

2.4   Calculate the missing entries

Explain the errors in levelling and the methods to correct them

3.1   List the Errors in levelling and the precautions to avoid the errors

3.2   State the effect of Errors due to curvature and refraction

3.3   Compute the Error due to curvature, refraction and combined error and the correction to be applied

Elaborate the different methods of levelling

4.1   Explain the methods of Levelling

4.2   Describe in detail the procedure of conducting profile levelling and reciprocal levelling

4.3   List the errors eliminated in reciprocal levelling

4.4   Derive the formula for true difference in elevation anderror between two points in reciprocal levelling

4.5   Calculate true difference in elevation and error in reciprocal levelling

Explain the Permanent adjustments of a level and methods of contouring

5.1   List the fundamental lines of dumpy level and state the relationship among them

5.2   Explain permanent adjustments of a dumpy level(Two peg method)

5.3   States the Characteristics and uses of Contour maps.

5.4   Explain the method of Contouring.

5.5   Explain the method of aligning a road, railway and Canal using Contour Map

Explain Uses and working principles of minor instruments

6.1. Electronic Planimeter

6.2. Pentagraph

6.3. Clinometer

UNIT 1: Introduction to Levelling   **Duration: 8Periods(L: 6.0 – T:2.0)**

    a)   Levelling - Types of levelling instruments - component parts of a dumpy level and their functions - Definitions of important terms used in Levelling - level surface, level line, axis of telescope, line of collimation, back sight, fore sight, intermediate sight, change point.

    b)   Temporary adjustments of a dumpy level

    c)   Types of Levelling Staves

    d)   Bench marks - different types of bench marks

UNIT 2:Concept and Calculation of Reduced Levels   **Duration: 12Periods((L:9.0 – T:3.0)**

    a)   Booking of readings in field book

    b)   Determination of Reduced levels by height of instrument and Rise and Fall methods - Comparison of methods - Problems

    c)   Problems on missing entries

UNIT 3: Errors, precautions and Corrections in Levelling   **Duration: 06Periods(L: 4.5 – T:1.5)**

    a)   Errors in levelling -Personal, natural and instrumental errors – Precautions

    b)   Errors due to curvature and refraction and combined correction – problems

UNIT4: Methods of Levelling   **Duration: 14Periods((L:10.5 – T:3.5)**

    a)   Classification of Levelling - Detailed description of profile levelling andreciprocal levelling - Problems on Reciprocal levelling.

UNIT 5:Permanent Adjustments of a level and Contouring   **Duration: 14Periods((L:10.5 – T:3.5)**

    a) Permanent adjustments of a dumpy level (Two peg method)

    b) Contouring - Characteristics-Uses

    c) Methods of contouring: Squares method,Cross sections method - interpolation of contours-tracing contour gradient.

UNIT 6: Uses and working principles of minor instruments   **Duration: 06Periods(L:4.5 – T:1.5)**

    a) Electronic Planimeter

    b) Pentagraph

    c) Clinometer

Seminars	1	5	
	Total	60	

Corse Code:18C-205C   Duration:1 ½ hours
Course Name: Surveying-II   Max.Marks:40

PART-A

Answer **all** questions, Each Question carries two marks   **5x2 = 10 Marks**

1) Define leveling and list the instruments used in leveling.
2) Define the terms a) Level surface   b) Level line   c) Horizontal line.
3) Define the terms a) Change point   b) Line of collimation c) Height of instrument.
4) List any three points to be remembered while recording in a level field book.
5) Find the level difference between the points A and B if B.S and F.S readings taken on them respectively are 2.105 and 3.220 m.

PART-B

Answer any **two** questions. Each question carries five marks   **2x 5 = 10 Marks**

6) Draw a neat sketch of dumpy level and label the parts.
7) Briefly explain the temporary adjustments of a level
8) Compare collimation method with rise and fall method in leveling.

PART-C

Answer any **two** questions. Each question carries five marks   **2x 5 = 10 Marks**

9) The following readings were observed successively with a leveling instrument. The instrument was shifted after the fifth and eleventh readings. Draw up a page of level book and determine the R.Ls of various points if the R.L of the first reading was taken as 146.440. Use Rise and fall method.
   0.585, 1.010, 1.735, 3.295, 3.775, 0.350, 1.300, 1.795, 2.575, 3.375, 3.895, 1.735, 0.635 and 1.605.

10) Levels are taken on a continuously sloping ground at a common interval of 30m with 4meter staff . Calculate the R.Ls by Height of Instrument method and apply usual check.
    0.855, 1.545, 2.335, 3.115, 3.825, 0.455, 1.380, 2.055, 2.855, 3.455, 0.585, 0.105, 1.850, 2.755 and 3.845.
       Take the R.L of first station as 380.500.

11) A page of level field book partly defaced is reproduced below. Supply the missing entries at places marked with X.

Station	B.S	I.S	F.S	Rise	Fall	R.L	Remarks
1	3.250					100.000	B.M
2	1.755		X		0.750		C.P
3		1.950					
4	X		1.920				C.P
5		2.340		1.500			
6		X		1.000			
7	1.850		2.185				C.P
8		1.575					
9		X					
10	X		1.895	1.650			C.P
11			1.350	0.750			

Corse Code:18C-205C   **Duration:1 ½ hours**
Course Name: Surveying-II   **Max.Marks:40**

PART-A

Answer **all** questions, Each Question carries two marks   **5x2 = 10 Marks**

1) State any two instrumental errors and two personal errors in levelling.
2) What is the curvature and refraction correction in levelling? Give their values
3) State any four precautions that are to be taken while doing levelling
4) List any four methods of levelling.
5) Write any four natural sources of errors in levelling

PART-B

Answer any **two** questions. Each question carries five marks   **2x 5 = 10 Marks**

6) On the top of a hill, a luminous object is visible just above the horizon at a certain station at the sea level. The distance to the top of hill from the station is 50 km. Find the height of the hill.
7) Briefly explain the procedure of reciprocal leveling with help of a neat sketch.
8) Explain briefly (a) Check Levelling (b) Fly Levelling

PART-C

Answer any **two** questions. Each question carries ten marks   **2x 10 = 20 Marks**

9) The following readings were observed at stations A and B in a reciprocal leveling. Find
   a) RL of B b) True difference of elevation between A and B. The distance between A   and B is 1000 m. Take R.L of
   A as 150.500 m. Also find correction due to curvature and refraction effects.

Instrument at	Reading on	
	A	B
A	1.560	2.760
B	0.520	1.650

10) The line of sight from two station A and B just touches the sea level. If the height of A and B above sea level are 75 and 100m respectively, find the distance AB
11) Explain briefly the procedure of plotting a longitudinal Section in levelling.

Corse Code:18C-205C   **Duration:3 hours**
Course Name: Surveying-II   **Max.Marks:80**

PART-A

Answer **all** questions   **10x2 = 20 Marks**

1) Define the terms a) Contour line   b) contour interval
2) Show the conventional contours of a) Valley (b) Over hanging Cliff
3) List any two uses of Clinometer
4) State the principle of Planimeter
5) State the principle of pentagraph
6) **Define the terms a) Vertical line   b) Datum   c) Elevation**
7) **List the checks to be applied in Rise and Fall method of calculating reduced levels**
8) **State the formulae for corrections of curvature and refraction in leveling**
9) **State the difference between Simple Levelling and Differential Levelling**
10) **State the difference between line of collimation and axis of telescope**

PART-B

GROUP-I   Answer any **two** questions   **2 x 5 = 10 Marks**

11) Draw the figure of a clinometer and name the parts
12) State any five uses of contour maps
13) Explain the direct method of locating contours
GROUP-II   Answer any **two** questions   **2 x 5 = 10 Marks**
14) **List any five points to be remembered while recording a level field book**
15) **Briefly explain the procedure of reciprocal leveling with help of a neat sketch.**
16) What are the fundamental lines of a dumpy level ? State the relationship between them

PART-C

GROUP-I   Answer any **two** questions   **2 x 10 = 20 Marks**

17) A levelling instrument was setup exactly between two pegs A and B 100m apart. The staff readings on A and B were 1.885 and 1.795 respectively. The instrument was then setup at a distance of 10m from A on the line AB. The respective staff readings were 1.650 and 1.580. Calculate the correct staff readings at A and B when the line of Collimation is perfectly horizontal.
18) Explain the procedure for tracing Contour gradient
19) Explain the constructional features of Pentagraph with help of neat sketch

GROUP-II   Answer any **two** questions   **2 x 10 = 20 Marks**

20) **The following consecutive readings were taken with the level and a 4 m levelling staff on continuously sloping ground at a common interval of 30m**

0.595 on P,0.985,1.950,3.645,2.845,0.960,1.030 and 2.555 on Q.

The elevation of P is 520.450. Make up a level book and calculate the R.L of points by height of collimation method. Also determine the gradient of the line PQ

21)Explain the procedure for plotting the working profile of a given road

22) Explain the procedure of conducting two peg test

CO-PO Mapping Matrix

	Course Outcomes	CL	Linked PO	Teaching Periods
CO1	Illustrate the basics in leveling and types of leveling Instruments	R	1,2,3,4,9	8
CO2	Compute the Reduced Levels by different methods	R/U/A	2,3,9	12

SEE Question Paper Pattern:
Maximum Marks: 80, Time: 3 Hours
Part A (Short answer questions):
Consists**8** Short Questions, students have to attempt **6** Questions and Each Question Carries **5** Marks.**(6 X 5 = 30 M)**
Part B (Essay type answer questions):
Consists**7**Essay type Questions, students have to attempt **5** Questions and Each Question Carries **10** Marks.**(5 X 10 = 50 M)**

Course Outcomes (CO)

Upon successful completion of the course, the students will be able to attain the following Course Outcomes (CO):

	Course Outcome
CO1	Apply the principles of Projection of solids also draw the projections of solids.
CO2	Appreciate the need of Sectional views also draw the sectional views and true sections of the engineering components.
CO3	Escalate the need of auxiliary views and draw the auxiliary views of the given engineering components.
CO4	Gainthe knowledge of Isometric views of engineering components also draw the isometric views of given components.
CO5	Grasp the knowledge and draw the development of surfaces of different engineering components

Course Contents

1.0   Projection of solids   (09 Hours)

Projection of regular solids
(a)   Axis perpendicular to one of the planes
(b)   Axis parallel to VP and inclined to HP and vice versa.

2.0   Sectional views   (06 Hours)

Need for drawing sectional views – what is a sectional view - Location of cutting plane – Purpose of cutting plane line – Selection of cutting plane to give maximum information (vertical and offset planes) - Hatching – Section of regular solids inclined to one plane and parallel to other plane

3.0   Auxiliary views   (06 Hours)

Need for drawing auxiliary views -Explanation of the basic principles of drawing an auxiliary views - explanation of reference plane and auxiliary plane -Partial auxiliary view.

4.0   Pictorial Drawings   (15 Hours)

Brief description of different types of pictorial drawing viz., Isometric, oblique, and perspective and their use - Isometric drawings: Iso axis, angle between them, meaning of visual distortion in dimensions - Need for an isometric scale, difference between Isometric scale and ordinary scale difference between Isometric view and Isometric projection - Isometric and non-Isometric lines - Isometric drawing of common features like rectangles, circular shapes, non-isometric lines - Use of box and offset methods.

5.0   Development of Surfaces   **(09 Hours)**

Need for preparing development of surface with reference to sheet metal work -Concept of true length of a line with reference to its orthographic projection when the line is (i) parallel to the plane of projection (ii) inclined to one principal and parallel to the other -Development of simple solids like cubes, prisms, cylinders, cones, pyramid (sketches only) -Types of development: Parallel line and radial line development -Procedure of drawing development, drawings of trays, funnels, elbow pipes and rectangular ducts.

Reference Books

Engineering Drawing by Kapildev – (Asian Publisher)
Engineering Drawing by BasantAgarwal& C.M Agarwal - (McGraw-hill)
Engineering Drawing by N.D.Bhatt. (Charotar Publishing House Pvt. Ltd.)
A Textbook on Engineering Drawing by P. Kannaiah, K. L. Narayana, K. Venkata Reddy

Suggested Specific Learning Outcomes

1.0 Apply Principles of Projection of solids

1.1.   Draw the projections of solids to axis of solids parallel to one plane.
1.2.   Draw the projections of solids to axis of solid inclined to other plane.

2.0 Appreciate the need of Sectional Views

2.1   Explain the need to draw sectional views.
2.2   Select the section plane for a given component to reveal maximum information.
2.3   Explain the positions of section plane with reference planes
2.4   Differentiate between true shape and apparent shape of section
2.5   Draw sectional views and true sections of regular solids discussed in 6.0
2.6   Apply principles of hatching.

3.0 Understand the need of auxiliary views

3.1   State the need of Auxiliary views for a given engineering drawing.
3.2   Draw the auxiliary views of a given engineering component
3.3   Differentiate between auxiliary view and apparent view

4.0 Prepare pictorial drawings

4.1 State the need of pictorial drawings.
4.2 Differentiate between isometric scale and true scale.
4.3 Prepare Isometric views for the given orthographic drawings.

5.0 Interpret Development of surfaces of different solids

5.1   State the need for preparing development drawing.
5.2   Prepare development of simple engineering objects (cubes, prisms, cylinders, cones, pyramid) using parallel line and radial line method.
5.3   Prepare development of surface of engineering components like trays,funnel, 90^0 elbow & rectangular duct.

CIE Question Paper Pattern and Syllabus

Unit No	Unit Name Hours	R	U		A		Marks Weightage	Weightage (%)
			SQ	EQ	SQ	EQ

SEE Question Paper Pattern:
Maximum Marks: 80, Time: 3Hrs
Part – A: Short answer questions: 4 X 10= 40 Marks
Part - B: Essay Type Questions: 2 X 20= 40 Marks

Pre requisites

This course requires the Basic CAD Skills and concepts of engineering drawing

CO1	Significance of Layers. Create and assign properties to layers and modify layers
CO2	Importance and advantages of blocks. Use of standard blocks and user defined blocks
CO3	Need of solid modeling and various methods of solid modeling with different surfaces

UNIT -1   **Duration: 06 periods (T:1 + P:4hrs)**

Setting a current layer, layers color, line type, line weight, print style locking and unlocking of layers, the layer visibility and layer printing. Setting of current line type.The loading of additional line types, creating and naming of line type, editing of line type.

UNIT -2   **Duration: 9 periods (T:1.5 + P:6hrs)**

Use the Blocks, Attributes and External references to manage the drawing blocks

The purpose of a block, creating a block, inserting a block, redefining a block, exploding a block

Attribute

Editing attribute definitions, attaching attribute to blocks. Editing attributes attached to blocks, Extracting attributes information.

UNIT -3   **Duration: 15 periods (T:2.5 + P:10hrs)**

3.0 Viewing entities in three dimensions

Setting a new viewing direction
Dynamically setting a view direction

3.1 Creation of three-dimensional entities using different methods

Drawing of two dimensional entities in three dimensional space.
Converting two dimensional planar entities into three dimensional entities by applying elevation and thickness.
Converting two dimensional planar entities into three dimensional entities by revolving or extruding.
Creation of three-dimensional faces, rectangular meshes, ruled surface meshes, extruded surface meshes, revolved surface meshes, three dimensional entities such as boxes, Cylinders, Cones, Spheres, wedges, torus, Regions, extruded solids, revolved solids, composite solids, intersect solids.

3.2 Editing in three dimensions
Rotating in three dimensions, Array in three dimensions (Rectangular and polar).
Mirroring in three dimensions, aligning in three dimensions.

3.3 Editing of three dimensional solids
Sectioning and Slicing of solids, hiding, shading and rendering.

3.4 Selection of material from library
Enable the material library, editing materials and material library.

UNIT- 4

Application of above three units

Recommended Books

1. Auto cad by George Omura
2. 4MCAD User Guide- IntelliCAD Technology Consortium

Suggested learning outcomes

1.0 Organize the information on layers

1.1 Explain the need and importance of Layers.
1.2 Practice creating new layer, naming the layer and assigning properties like Layer colour, Line type and line weight and setting the current layer
1.3 Practice the locking and unlocking of layers
1.4 Practice the Freezing and thawing of layers
1.5 Practice the layer visibility and layer printing
1.6 Practice the loading of additional line types

2.0 Use the Blocks, Attributes and External references to manage the Drawing

2.1 Define a block
2.2 Explain the purpose of a block
2.3 Practice the creating a block
2.4 Practice the inserting a block
2.5 Practice the redefining a block
2.6 Practice the exploding a block
2.7 Define an Attribute
2.8 Practice the editing attribute definitions
2.9 Practice the attaching attribute to blocks
2.10 Edit attributes attached to blocks
2.11 Extract attributes information
2.12 Define external reference
2.13 Practice the Attaching, Removing, and Reloading of external references
2.14 Practice the Binding, Clipping and changing the path of external references

3.0 Understand the concepts of 3D

View entities in three dimensions
3.0.1 To set a new viewing direction
3.0.2 To dynamically set a view direction

3.1 Create three-dimensional entities using different methods

3.1.1 Draw two dimensional entities in three dimensional space.
3.1.2 Convert two dimensional planar entities into three dimensional entities by applying elevation and thickness.
3.1.3 Convert two dimensional planar entities into three dimensional entities by revolving or extruding.
3.1.4 Create three-dimensional faces.
3.1.5 Create rectangular meshes.
3.1.6 Create ruled surface meshes.
3.1.7 Create extruded surface meshes.
3.1.8 Create revolved surface meshes.
3.1.9 Create three dimensional entities such as boxes, Cylinders, Cones, Spheres, wedges, torus, Regions.

3.1.10 Create extruded solids.

3.1.11 Create revolved solids.

3.1.12 Create composite solids.

3.1.13 Create intersect solids.

3.2 Editing in three dimensions

3.2.1 Rotate in three dimensions

3.2.2 Array in three dimensions (Rectangular and polar)

3.2.3 Mirror in three dimensions

3.2.4 Align in three dimensions

3.3 Edit three dimensional solids

3.3.1 Practice Sectioning and Slicing solids

3.3.2 Practice hiding, shading and rendering

4 Practice applications on above units

Exercise	Key components
Layers	• Importance of layers • Creation of new layers and controlling properties of layers
Working with blocks	• Create, insert and explode a block • Attach attribute to blocks • Edit and extract attributes attached to blocks
View entities in three dimensions	• Set a new viewing direction • Set dynamically view direction
Create three-dimensional entities	• Create three-dimensional faces • Create rectangular meshes, ruled surface meshes, extruded surface meshes, revolved surface meshes • Create three dimensional entities such as boxes, Cylinders.
Edit in three dimensions	• Rotate in three dimensions • Array in three dimensions (Rectangular and polar) • Mirror in three dimensions • Align in three dimensions
Edit three dimensional solids	• Practice Sectioning and Slicing solids • Practice hiding, shading and rendering
Practice the selection of material from library	• Enable material library • Edit materials and material library

	Course Outcome	Cognizant Level	Linked PO	Teaching Hours
CO1	Significance of Layers. Create and assign properties to layers and modify layers	U/A	1,2,3,9,10	15
CO2	Importance and advantages of blocks. Use of standard blocks and user defined blocks	U/A	1,2,3,9,10	9

CO3	Need of solid modeling and various methods of solid modeling with different surfaces	U/A	1,2,3,9,10	6
CO4	Create and modify 3D drawings	A	1,2,3,10	15

State Board of Technical Education &Training (TS)

Course Title:	**Levelling Surveying Lab Practice**	Course Code	:	**18C-208P**
Semester:	**II Semester**	Course Group	:	**Core**
Teaching Scheme in Hrs(L:T:P):	**15:0:30**	Credits	:	**1.5**
Type of Course	: **Lecture+Practical**	Total Contact Hours	:	**45Periods**
CIE	: **60 Marks**	SEE	:	**40 Marks**

Pre requisites : This course requires the basic knowledge of Surveying

Course Outcomes

Upon the completion of the course, the student shall be able to

CO1 :	Apply standard practices to perform different operations of Levelling in the field
CO2 :	Calculate the Reduced levels by Differential Levelling and Fly levelling
CO3 :	Conduct Profile Levelling for the given alignment and Reciprocal Levelling in the field to find true difference in elevation
CO4 :	Perform contouring by method of squares and plot the drawings
CO5	Demonstrate the use of minor Instruments

Course Content and Blue Print of Marks for SEE

Unit No	Unit Name	Hours/Periods	Questions to be set for SEE			Marks Weigh tage	Weight age %
			Handling	Manipu lation	Precisi on		
1	Operations of Levelling	9					
2	Differential and Fly Levelling	12					
3	Profile and Reciprocal Levelling	12					
4	Contouring	06					
5	Minor Instruments	06					
	Total	45					100

Suggested Learning Outcomes

Upon completion of the course, the student shall be able to

Perform different operations of levelling

1.1   Identify the component parts of a dumpy level

1.2   Study different types of levelling staves

1.3   Perform temporary adjustments of a dumpy level for taking observations

1.4 Practice taking staff readings and recording them in level field book

Perform Differential and fly levelling

2.1.   Take staff readings for differential levelling and compute the difference in elevation between two stations (take invert levels also)

2.2.   Conduct fly levelling and determine RLs of required stations

Conduct Profile and Reciprocal Levelling

3.1.   Conduct profile levelling along a route and compute the RLs at variousstations

3.2.   Conduct profile levelling by taking Cross sections across a route and compute the RLs at various stations

3.3.   Plot the LS and CS along a route from the data

3.4.   Determine the true difference in elevation between two far off stations by conducting reciprocal levelling

Levelling-Contouring

4.1 Contouring by squares

4.2   Contouring by cross-sections

4.3 Location of contour points by direct method

Minor Instruments

Demonstration of

5.1.   Electronic Planimeter

5.2.   Pentagraph

Course Contents

UNIT 1:Operations of Levelling   **Duration :9 Periods**

   a)   Study of dumpy level, levelling staves- performing Temporary adjustments of level.

   b)   Taking staff readings of various stations - booking of readings in level field book.

UNIT 2:Differential and Fly Levelling   **Duration :12 Periods**

   a)   Differential and Fly levelling - calculation of reducing levels by Height of collimation and Rise & Fall methods (inverted levels also)

UNIT 3:Profile and Reciprocal Levelling   **Duration :12 Periods**

   a)   Profile levelling-recording of readings in level field book and calculation of RLs.

   b)   Reciprocal levelling - True difference in elevation and collimation error.

UNIT 4: Contouring   **Duration:6 Periods**

   a)   Contouring by squares

   b)   Contouring by cross-sections

c) Location of contour points by direct method

UNIT 5 : Minor Instruments(Demonstation only)   **Duration:6 Periods**

a) Electronic Planimeter

b) Pentagraph

c) Clinometer

2. http://www.nitttrchd.ac.in/sitenew1/nctel/civil.php

Suggested Student Activities

1 Prepare a spread sheet(Excel) by Rise and Fall method showing the calculation by using formula bar and present it.

2 Prepare a spread sheet(Excel) by Height of Instrument method showing the calculation by using formula bar and present it

3 Conduct a survey camp involving levelling and drawing contour map

4 Tech fest/Srujana

5 Paper/Poster presentation

6 Quiz

7 Group discussion

8 Surprise Test

Semester End Examination <u>Model</u> Question paper

<u>DCE II semester practical Examination</u>

Corse Code:18C-208   P   **Duration:3 hours**

Course Name: Surveying Lab Practice-II   **Max.Marks:40**

<u>*Instructions to the Candidate:*</u>

(i)Answer any <u>One</u> of the following Questions.

(ii) Plot the details of field work for illustration and conclude your observation of the experiment

1) Record the readings taken with the level and a 4 m levelling staff on continuously sloping ground at a common interval of 1m in the field book. Take a bench mark of 100.000m. Calculate the R.L of given points by height of collimation method

2) Note the observed readings taken with the level and a 4 m levelling staff on the given ground in the field book. Take a bench mark of 95.000m. Calculate the R.L of given points by Rise and fall method

3) Find out the true difference in elevation between the two given points 50 m apart.

4) Conduct Profile levelling for the given length of the road and plot the details

5) Conduct Cross sectioning for the given section of road and plot the details

6) Prepare the contour map for the given area with a contour interval of 2 m by method of squares

7) Prepare the contour map for the given area with a contour interval of 1 m by direct method of contouring

8) Prepare the contour map from the given reduced levels with a contour interval of 1 m by interpolation

CO-PO Mapping Matrix

Course Outcomes		CL	Linked PO	Teaching Periods
CO1	Apply standard practices to perform	R/U/A	2,3,4,7,8,9	9

	different operations of Levelling in the field			
CO2	Calculate the Reduced levels by Differential Levelling and Fly levelling	R/U/A	2,3,4,8,9	12
CO3	Conduct Profile Levelling for the given alignment	R/U/A	2,3,8,9	12
CO4	Perform contouring by method of squares and plot the drawings	R/U/A	1,2,3,4,7,8,9	06
CO5	Demonstrate the use of minor instruments	R/U/A	2,4	06

Course Title	Applied Science Lab Practice (Physics Lab)	Course Code	18C-209P(A)
Semester	II	Course Group	Core
Teaching Scheme in Pds/Hrs(L:T:P)	0:1:2 periods	Credits	1.5/2
Type of course	Tutorial & practical	Total Contact Hrs	22.5Pds
CIE	30 Marks	SEE	20 Marks

Pre requisites: Knowledge of basic concepts of basic High school science, basic mathematics

Course objectives: To provide practical knowledge about the basics of Physics instrumentation and calculations/measurements.

Tutorial: 0.83 Hrs/Experiment:

1. Introduction Physics practical and its importance, safety precautions in maintenance of equipment in the laboratory.
2. Maintenance of apparatus and equipment.
3. Follow of Do's and Don'ts.
4. Maintenance of data in manual and record book.
5. Write the procedure of the experiment before the commencement of each experiment.
6. Strictly following of instructions given from time to time by the lecturer-in-charge.
7. Demonstration of each experiment by the lecturer in charge.

Conduct of an experiment: 3periods/experiment.

Course outcomes:

On successful completion of the course, the student will have ability to:

1: Determine the Focal length and focal power of convex lenses using U-V and graphical method.

2: Determine the value of acceleration due to gravity using Simple Pendulum and verify with L-T^2 graph.
3: Determine the velocity of sound in air at room temperature   .
4: Determine the refractive index of a solid using travelling microscope.
5: Practice the mapping of magnetic lines of force-locating neutral points.

References:

1. Basic Applied Physics – R.K. Gaur
2. Laboratory manual for class XI and XII - NCERT

PHYSICS PRACTICALS

List of experiments

Semester II
1. Convex lens-Determination of Focal length and focal power using U-V and graphical method.
2: Simple Pendulum-Determination of the value of acceleration due to gravity and verify with L-T^2 graph.
3: Resonance apparatus-Determination of velocity of sound in air at room temperature .
4: Travelling microscope-Determination of refractive index of a solid.
5: Practice the mapping of magnetic lines of force-location of neutral points

Course Delivery:

The course will be delivered through lectures, class room interaction, group discussions, graded exercises, demonstration and practice.

Conduction of experiments: 2 periods/Experiment.

Student must perform experiment individually under the supervision of the lecturer-in charge.

On successful completion of the course, the student will have the ability to attain below Course outcomes (CO):

	Course Outcomes	CL	Linked experiments	Linked POs	Teaching Hours
CO 1	Focal length and Focal power of convex lens (Separate & Combination)	U/A		1,2,3,8,9	L:P::1:2
CO 2	Acceleration due to gravity using simple pendulum	U/A		1,2,3,8,9	L:P::1:2
CO 3	Velocity of sound in air – (Resonance method)	U/A		1,2,3,8,9	L:P::1:2
CO 4	Refractive index of solid using traveling microscope	U/A		1,2,3,8,9	L:P::1:2
CO 5	Mapping of magnet lines of force-locating neutral points	U/A		1,2,3,8,9	L:P::1:2
CO 6	Related the answers to the oral questions		Covered in all COs		

Cognitive levels: R=Remember, U=Understand, A=Apply

Scheme of Valuation of SEE		
S.No	Particulars	Marks
1.	Identification of apparatus/equipment/etc	01
2.	Writing procedure	04
3.	Conducting of experiment	10
4.	Results	01

5.	Viva-voce	04
	Total	20

Suggested learning outcomes

Name of the Experiment (No of Periods)	Competencies	Key competencies
1. Focal length and Focal power of convex lens (Separate & Combination)	• Fix the object distance • Find the Image distance • Calculate the focal length and power of convex lens	• Calculate the focal length and power of convex lens • Draw u-v and 1/u – 1/v
2. Simple pendulum – acceleration due to gravity – length of seconds pendulum	• Fix the simple pendulum to the stand • Adjust the length of pendulum • Find the time for number of oscillations • Find the time period • Calculate the acceleration due to gravity • Draw l-T and l-T^2 graph	• Find the time for number of oscillations • Find the time period • Calculate the acceleration due to gravity • Draw l-T and l-T^2 graph
3. Velocity of sound in air –Resonance method	• Arrange the resonance apparatus • Adjust the reservoir level for booming sound • Find the first and second resonanting lengths • Calculate velocity of sound	• Adjust the reservoir level • Find the first and second resonanting lengths • Calculate velocity of sound • Calculate velocity of sound at 0^0 C
4. Refractive index of solid using traveling microscope	• Find the least count of vernier on microscope • Place the graph paper below microscope • Read the scale • Calculate the refractive index of glass slab	• Read the scale • Calculate the refractive index of glass slab

5. Mapping of magnet lines of
 	
    Force – neutral points
	• Draw magnetic meridian
	• Place the bar magnet in NN(North pole of bar magnet pointing North) and NS (South pole of bar magnet pointing North) directions
	• Draw magnetic lines of force
	• Locate the neutral points along equatorial and axial lines
		• Draw magnetic lines of
		  force
		
		• Locate the neutral points
		  along equatorial and
		
		  axial lines

COURSE DESIGN DELIVERY AND ASSESMENT

Course Title: **Applied Science Lab Practice (Chemistry lab)**	Course Code: **18C-209P (B)**
Semester: **II**	Core/Elective: **Core**
Teaching Scheme(L:P): **1:2 Hrs**	Credits: **1.5/2**
Type of Course: **Tutorial & practical**	Total Contact Hours: 22.5 Pds
CIE: **20 Marks**	SEE: **30 Marks**

Prerequisite:
Knowledge of basic concepts of chemistry of secondary education.

Course Objectives:
To provide practical knowledge about the basics of preparation of chemical solutions and quantitative analysis of chemical compounds.

Lecture: 1 Pds /Experiment.

1. Introduction of chemistry practical and its importance, safety precautions in maintenance of cleanliness and orderliness of chemicals in the laboratory.
2. Maintenance of apparatus and equipment.
3. Follow of DO's and Don'ts.
4. Maintenance of data in record book.
5. Write the procedure of the experiment before the commencement of each experiment.
6. Strict following of instructions given from time to time by the staff-in- charge.
7. Demonstration of each experiment by the staff in charge.

Conducting of an experiment: 2 Pds/Experiment.

List of Graded Exercise:

QUANTITAIVE ANALYSIS: (22.5 Pds)

Volumetric analysis by Titrimetric Method:-

Volumetric Analysis -Titration – Standard Solutions- Concentration of solutions-
Indicators- acid base indicators- selection of indicators-end point of titration-Neutralization.

1. Estimate the amount of the Mohr's salt in the given solution.
2. Determination of acidity of water sample.
3. Determination of Alkalinity of water sample.
4. Estimate the amount of the chlorides in the given solution.
5. Determination of p^H of water sample by using p^H meter.

Course Outcomes:

On successful completion of the course, the student will have ability to:

1. Prepare the standard solution.
2. Estimate the amount of the chemical substances in the given sample solutions.

3. Relate the answers to the oral questions.

Reference Books:

1. Vogel's Inorganic Qualitative and Quantitative Analysis.
2. Practical chemistry by O.P.Pande& others.
3. Qualitative and quantitative analysis by Alex.

CHEMISTRY PRACTICALS

List of experiments

Semester II (common-210)

Estimation of Mohr's salt by using standard potassium permanganate solution.

Determination of Acidity by using 0.02N NaOH solution.

Determination of Alkalinity by using 0.02N H_2SO_4 solution.

Determination of chloride content by using Standard $AgNO_3$ solution.

Determination of pH by pH meter.

Course Delivery:

The course will be delivered through lectures, classroom interaction, group discussion, graded exercises, demonstration and assignments.

Conduction of experiments: 2Pds/1 hr 40 min./Experiment.

Student must conduct experiment individually under the supervision of the staff-in-charge.

On successful completion of the course, the student will have ability to attain CO:

Course Outcome		CL	Linked Experiments	Linked PO	Teaching Periods
CO1	Estimate the amount of the mohr's salt in the given solution	U/A		1,2,3,8	L:P ::1:2
CO2	Determination of acidity , alkalinity and pH of given water samples/ solutions.	U/A		1,2,3,8	L:P ::3:6
CO3	Estimate the amount of the chlorides in the given solution.	U/A		1,2,3,8	L:P ::1:2
CO4	Relate the answers to the oral questions	U/A	Covered in all CO's		
				Total Hrs	

U = Understand, A = Application

LEVEL 3- HIGHLY ADDRESSED, LEVEL 2-MODERATELY ADDRESSED, LEVEL 1-LOW ADDRESSED

INFORMATION TECHNOLOGY LAB PRACTICE

Course Title : **INFORMATION TECHNOLOGY LAB PRACTICE** Semester : **II** Teaching Scheme in Hrs (L:T:P) : **0:1:2** Type of course : **Tutorial + Practical** CIE : **60 Marks**	Course Code : **18C-210P** Course Group : **Core** Credits : **3** Total Contact Hours : **37.5Hrs/45Pds** SEE : **40 Marks**

Prerequisites

Knowledge of Computer basics and DOS

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

	Course Outcome	CL	Linked PO	Practical hrs
CO1	Demonstrate skills using spreadsheet software	**A**	**1,2,3,4,8,9,10**	15
CO2	Demonstrate skills using presentation software	**A**	**1,2,3,4,8,9,10**	15
CO3	Demonstrate skills using database software	**A**	**1,2,3,4,8,9,10**	15
		Total Sessions		45

Legends: R = Remember U= Understand; A= Apply and above levels (Bloom's revised taxonomy)

Course Content

Spread Sheet

1. Open MS-Excel and identify the components on the screen
2. Create a Worksheet in MS-Excel and save it in .xls or .xlsx format
3. Inserting column and row in Excel
4. Creation of new worksheet in the existing Excel Book file
5. Generate a Chart using the data in Excel-worksheet
6. Automate calculations in a worksheet using formula
7. Sort and filter data in a worksheet
8. Protecting a worksheet, working with multiple sheets
9.

Presentation Software

10. Create a simple Power point presentation for a small topic and saving in .ppt or pptx format
11. Inserting a new slide in the existing PowerPoint file
12. Inserting chart or image in a PowerPoint slide
13. Exercise with animation and sound features in PowerPoint
14. Exercise with Rehearse Timings feature in PowerPoint
15. Exercise in printing the PowerPoint file in (a) Slides (b) Handouts

Database Management System

16. Create a table for given data and save in .mdb or .accdb format
17. Add, Delete and rename fields
18. Use the Primary key field
19. Enter and edit data
20. Use Relationships option
21. Create forms
22. Modify and save forms

23.   Create and use queries
24.   Sort data
25.   Display data
26.   Create and print reports

3. http://www.libreoffice.org/get-help/documentation/

Composition of Educational Components:

Questions for CIE and SEE will be designed to evaluate the various educational components (Bloom's taxonomy) such as:

Sl. No.	Bloom's Category	%
1	Remembrance	20
2	Understanding	20
3	Application	60

Mapping Course Outcomes with Program Outcomes:
(Course Outcome linkage to Cognitive Level)

	Course Outcome	Experiment Linked	Linked PO	CL	Practical Sessions
CO1	Demonstrate skills using spreadsheet software	1,2,3,4,5,6,7,8	1,2,3,4,8,9,10	A	15
CO2	Demonstrate skills using presentation software	9,10,11,12,13,14	1,2,3,4,8,9,10	A	15
CO3	Demonstrate skills using database software	15,16,17,18,19,20,21, 22,23,24,25	1,2,3,4,8,9,10	A	15

U-Understanding; A-application/ Analysis; App-Application

Course-PO Attainment Matrix

Level 3- Highly Addressed, Level 2-Moderately Addressed, Level 1-Low Addressed.

Course Delivery

The course will be delivered through tutorial of one hour and one & half hours of hands on practice per week.

Suggested Student Activities:
1. Create a spreadsheet for the class
2. Create power point presentation for a course
3. Create a database for the class

Format for Student Activity Assessment

      Internal Assesment

Activity	Marks
Writing the experiment, record evaluation	30
Execution of the given experiment	20
Viva-voce	10
Total	60

Model Question Bank

Course Title: **IT LAB PRACTICE**   Course Code: **18CE210P**

1. Using Spreadsheet Application, create a worksheet with five columns. Enter ten records and find the sum of all columns using auto sum feature.

2. You have a monthly income of Rs.10000. Your monthly expenditures are Rent- Rs 3000, Food- Rs. 1500, Electricity- Rs.100, Phone- Rs. 150, and Cable TV-Rs. 200. Prepare a worksheet with the Monthly Income, the Monthly Expenditures listed and summed, monthly savings amount (what's left over each month) calculated, and the amount saved per day (assuming 30 days in a month). Use Spreadsheet Application.

3. Using Spreadsheet Application, create a worksheet containing the pay details (containing Basic pay, DA, HRA ,Other Allowance , Deductions- PF, PT, Insurance, Gross and Net salary) of the employees using formulas.

4. Using Spreadsheet Application, create a Simple Bar Chart to highlight the results of your institute for three years.

5. Using Spreadsheet Application, create a Pie Chart for a sample data and give legends.

6. Using presentation tool, Create a simple Presentation consisting of 4-5 slides about Input and Output Devices.

7. Create a presentation about a book containing Title, Author, Publisher and Contents.

8. Create an automated (timings & animation) Presentation with five slides about different Models of Computers. Use Presentation tool
