HU-101 : BASIC ENGLISH

Course Title	Basic English	Course Code	HU-101
Semester	I	Course Group	Foundation
Teaching Scheme in Minutes (L:T)	3: 2	Credits	2.5
Methodology	Communicative Language Teaching + Assignments	Total Contact Hours	75
CIE	60 Marks	SEE	40 Marks

Prerequisites: Basic knowledge of English Language

COURSE CONTENTS

MODULE 1: VOCABULARY THROUGH READING - I

Duration: 15 Periods (L 9 P 6)

1. How to Learn a New Word

    a. Spelling, pronunciation, syllabification, word class, inflections and the other forms of the word
    b. Meanings, usage, derivatives, phrasal verbs, idiomatic expressions and context for using the word
    c. Compound words, etymology, synonyms, antonyms and collocations.

2. Synonyms, Antonyms and One-Word Substitutes

3. Reading – I

    a. Purpose of Reading
    b. Types of Reading
    c. Types of Paragraphs and Questions (Factual, Inferential, Vocabulary-based and Experiential)

4. Reading – II

    Passages on Innovation, Science and Technology, History, Biography, Travel Writing, Nature Writing, Journal, Story, Process, Cause and Effect, Problem Solution, Evaluation of ideas, Reasons and Conclusion, etc.

MODULE 2: SPEAKING - 1

Duration: 10 Periods (L 6 P 4)

1. Need for English
2. Classroom English
3. Expressing Likes and Dislikes
4. Expressing Feelings

MODULE 3: GRAMMAR - I

Duration: 15 Periods (L 9 P 6)

1. Basic Sentence Structures
2. Tenses-I
3. Tenses-II
4. Voice

MODULE 4: SPEAKING – II

Duration: 10 Periods (L 6 P 4)

1. Introducing Oneself
2. Talking about daily routine
3. Fixing, Cancelling and Rescheduling Appointments
4. Extending, Accepting and Declining Invitations

MODULE 5: GRAMMAR - II

Duration: 15 Periods (L 9 P 6)

1. Adjectives
2. Prepositions
3. Asking Questions –I
4. Asking Questions - II

MODULE 6: WRITING - I

Duration: 10 Periods (L 6 P 4)

1. Paragraph Writing – I
2. Paragraph Writing – II
3. Letter Writing – I
4. Letter Writing – II

COURSE OUTCOMES

CO	At the end of the course, the students will have the ability to:
CO 1	Apply newly acquired vocabulary in contextually relevant scenarios, analyze provided passages for comprehension and formulate responses accordingly.
CO 2	Recall the uses of English, construct the frequently used sentences in classroom and express their likes, dislikes and feelings in different contexts.
CO 3	Construct various forms of sentence structures correctly and use different forms of tenses and suitable voice in various contexts.
CO 4	Introduce oneself, discuss one's daily routine, fix appointments and extend invitations.
CO 5	Describe objects using suitable adjectives, select the appropriate prepositions for different contexts and ask dichotomous and informative questions.
CO 6	Convey ideas in the form of paragraphs and compose formal and informal letters.

CO-PO Matrix

CO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	Mapping POs
CO 1	-	-	-	-	2	2	2	5, 6 and 7
CO 2	-	-	-	-	2	2	2	5, 6 and 7
CO 3	-	-	-	-	1	3	2	5, 6 and 7
CO 4	-	-	-	-	2	2	3	5, 6 and 7
CO 5	-	-	-	-	1	2	3	5, 6 and 7
CO 6	-	-	-	-	2	2	3	5, 6 and 7

CONTINUOUS INTERNAL EVALUATION (CIE)

Test	Modules	Marks	Pattern
Mid - I	1. Vocabulary Through Reading - I 2. Speaking- I	20	Part A: 4 short answer questions Part B: 2 short essay questions with internal choice Part C: 2 essay questions with internal choice
Mid - II	1. Grammar – I 2. Speaking- II	20	Part A: 4 short answer questions Part B: 2 short essay questions with internal choice Part C: 2 essay questions with internal choice
Slip Test - I	1. Vocabulary Through Reading - I 2. Speaking- I	5	2 questions out of 3 questions
Slip Test - II	1. Grammar – I 2. Speaking- II	5	2 questions out of 3 questions
Assignment	One assignment per one semester	5	Different assignments of higher order questions that develop problem solving skills and critical thinking should be given
Seminars	One seminar per one semester	5	Oral presentations using audio–visual equipment, charts, etc.
	Total	**60**	

MID EXAMINATIONS

MID SEM - I EXAM					
Sl. No.	Module	R	U	A	Remarks
1	Module - I	1, 2	5 (a) 5 (b)	7 (a) 7 (b)	
2	Module - II	3, 4	6 (a) 6 (b)	8 (a) 8 (b)	
Total Questions		4	4	4	

MID SEM - II EXAM					
Sl. No.	Module	R	U	A	Remarks
1	Module - III	1, 2	5 (a) 5 (b)	7 (a) 7 (b)	
2	Module - IV	3, 4	6 (a) 6 (b)	8 (a) 8 (b)	
Total Questions		4	4	4	

SEMESTER END EXAMINATION

SEMESTER END EXAM						
Sl. NO.	Module	Question to be set for SEE			U	A	Remarks
		R			U	A	
1	I	4	1		9 (a)	13 (a)

					11 (b)	15 (b)	
6	VI			7, 8	10 (b)	14 (b)	
					12 (a)	16 (a)	
					12 (b)	16 (b)	
Total Questions		8			8	8	

Legend:

Remembering:	**One mark**
Understanding:	**Three marks**
Application:	**Five marks**

Suggested Student Activities:
- Practice conversation / dialogue / speech and answer the questions.
- Seminars.
- Review a movie.
- Narrate a story.
- Prepare chain stories.
- Vocabulary building games.
- Speak about incidents /events /memories /dreams/role model.
- Interviews of famous personalities.
- Collect the biographies of unsung heroes.
- Reading for main ideas and specific details.
- Describe pictures.
- Collect the letters written by famous persons and analyze them.
- Describing a process.
- Give directions using maps.

Time: One Hour   **Total Marks: 20**

                              PART - A   **1 X 4 = 4 Marks**

Instructions: a) Answer all the questions. b) Each question carries one mark.

1. Write a sentence each using the following words.
    a. Report
    b. Illustrate
2. Find one-word substitute for the following one.
    A person who always looks at the brighter side of life.
3. Describe two qualities you dislike in your neighbour.
4. Write how you feel if you get selected for your college cricket team.

                              PART – B   **2 X 3 = 6 Marks**

Instructions: a) Answer the following questions. b) Each question carries three marks.

5. a) Read the following passage and answer the questions given below:

A dictionary serves as an efficient tool and forms the important reference material as a part of language learning. It provides spelling, pronunciation, stress and different connotations of the words in different contexts. Some dictionaries give etymology and word formation. A dictionary can be general or specialized, translating or giving lexical meanings within a single language. Dictionaries can assist the learning of vocabulary and is especially of great help to students who are learning a language.

    a) What do dictionaries generally provide?
    b) Find a synonym for 'origin of a word' from the passage.
    c) How do dictionaries assist in learning a language?

                              (OR)

b) Discuss any six ways of learning new vocabulary.

6. a) Explain any three problems one might face while learning English and suggest solutions to each of them.

                              (OR)

    b) Express any three features you like and three features you dislike in your hostel.

Instructions: a) Answer the following questions. b) Each question carries five marks.

7. a) Read the following passage and answer the questions given below it**.**

   Dreams have always held a universal fascination. Some primitive societies believe that the soul leaves the body and visits the scene of the dream. Generally, dreams are accepted to be illusions, having much in common with day-dreams, the fantasies of our waking life. When dreaming, one tends to believe fully in the reality of the dream world, however inconsistent, illogical, and odd it may be. Although most dreams apparently happen spontaneously, dream activity may be provoked by external influences.

   'Suffocation' dreams are connected with the breathing difficulties of a heavy cold, for instance. Internal disorders such as indigestion can cause vivid dreams, and dreams of racing fire-engines may be caused by the ringing of an alarm bell. Experiments have been carried out to investigate the connection between deliberately inflicted pain and dreaming. For example, a sleeper pricked with a pin perhaps dreams of fighting a battle and receiving a severe sword wound. Although the dream is stimulated by physical discomfort, the actual events of the dream depend on the associations of the discomfort in the mind of the sleeper.

   a). What may be the cause for the dream of racing fire-engines?
   b). What was the belief of primitive societies about the dreams?
   c). What happens when one is dreaming?
   d). Find a suitable word in the passage for the following phrases. "inability to
        breathe or feeling uncomfortable due to less air"
   e). What could be the actual reasons for getting dreams?

(OR)

   b) Explain any five features of a new word that you wish to learn with the help of
        a dictionary. Give an example of each of those features.

8. a) Identify any ten problems that you face while learning English.

(OR)

   b) Express any ten common sentences used by the teacher in the classroom.

BOARD DIPLOMA EXAMINATION (C-24)
MID SEMESTER EXAMINATION -II
HU-101 BASIC ENGLISH

Time: One Hour   **Total Marks: 20**

PART - A   **1 X 4 = 4 Marks**

Instructions: a) Answer all the questions. b) Each question carries one mark.

1. Write a sentence for the following sentence structure.

   a) S + V

2. Change the following sentence into passive voice.

   a) Pranav ate a mango.

3. Write a sentence for fixing an appointment with a general physician.

4. How do you invite your friend to play cricket with your team.

PART-B   **2 X 3 = 6 Marks**

Instructions: a) Answer all the questions. b) Each question carries three marks.

5. a) Fill in the blanks with the suitable verb forms:

   i) My father _____(watch) TV when I entered house.

   ii) Jahnavi _____ (go) to railway station before I went home.

   iii) My brother _____(be) a good cricket player.

                         (OR)

5. b) Change the following sentences into passive voice.

   a) He plays cricket

   b) Ramya has bought vegetables.

   c) Balu is singing songs.

6. a) You have recently joined the cricket academy. Introduce yourself to your new
      friends.

                         (OR)

6. b) You have an appointment with a general surgeon. Cancel the appointment with
the doctor as you are suffering from fever.

PART-C   **2 X 3 = 6 Marks**

Instructions: a) Answer all the questions. b) Each question carries five marks.

7. a) Fill in the blanks with the suitable verb forms:

     i) My father _____(go) for a walk every day.

     ii) My sister _____ (buy) a book yesterday.

     iii) My brother _____(play) cricket for three hours.

     iv) The starts _____(be) bright.

     v) I _____(finish) my homework just now.

<div align="center">(OR)</div>

7. b) Write a sentence each for the following sentence structures.

     a) S + V + SC

     b) S + V + O

     c) S + V + O + O C

     d) S + V

     e) S + V + D O + I O

8. a) Write about your daily routine in 10 sentences.

<div align="center">(OR)</div>

8. b) Your brother's wedding is fixed. Extend the invitation to your favorite teacher.

     Write a conversation between you and your teacher.

Time: Two Hours   **Total Marks: 40**

                              PART-A   **1 X 8 = 8 Marks**

Instructions: a) Answer all the questions. b) Each question carries one mark.

1. Write an antonym for the underlined word in the following sentence.

   a) Ramya is a <u>generous</u> person who supported many charities for over 20 years.

2. Write a sentence using the following sentence structure.

   a) S + V + O

3. Make 'Yes/No' question using the following statement.

   a) He has come to college today.

4. A student does not know the meaning of a difficult word. How does he / she ask the teacher?

5. Fill in the blank with a suitable preposition.

   a) He came to college _____ foot.

6. Identify the adjectives in the following sentences.

   a) Srinivas has a costly watch.

   b) Pavani sold a small bag to Radha.

7. Write any two salutations generally used in the formal letter.

8. Identify the central idea of the following paragraph.

   An anecdote is a quick story about something of interest, usually with a singular theme or lesson. Anecdotes are no different than the stories told among friends, but when they're used in literature, they can accomplish more than merely passing the time.

                              PART-B   **3 X 4 = 12 Marks**

Instructions: a) Answer all the questions. b) Each question carries three marks.

9. a) How do you feel in the following situations?

   i.   India won the cricket world cup.

    ii.   Your friend's grandmother passed away yesterday

    iii.   Your sister did not return from college until late evening.

<p align="center">(OR)</p>

b) Describe your friend using six suitable adjectives.

10 a) Change the following sentences into passive voice.

    i. Bees make honey.

    ii. Prasad stole my calculator.

    iii. I will complete my assignment tomorrow.

<p align="center">(OR)</p>

b) Write a paragraph on your polytechnic in 50 words.

11. a) Change the following sentences into 'Wh' questions using the hints given in brackets

    i.   I bought a camera yesterday. (Use 'what')

    ii.   He was born in Sircilla on 28th December, 2002 (Use 'when')

    iii.   He went to Hyderabad to buy books. (Use 'why').

<p align="center">(OR)</p>

b) Fill in the blanks with suitable prepositions.

    i.   He is suffering _____fever.

    ii.   His grandmother died _____ Covid-19.

    iii.   He is good_____ mathematics.

12. a) Write a letter to your Principal requesting him / her to permit you to participate in the National seminar to be conducted in New Delhi.

<p align="center">(OR)</p>

b) Write a paragraph in 50 words about your fresher's day party.

<p align="center">**PART-C**   **4 X 5 = 20 Marks**</p>

Instructions: a) Answer all the questions. b) Each question FIVE mark.

13. a) Write any of the five aspects of learning a new word.

<p align="center">(OR)</p>

b) Read the following passage and answer the questions given below.

I just returned from the greatest summer vacation. It was so fantastic. I never wanted it to end. I spent eight days in Paris. My best friends, Harish and Umesh came with me. We had a beautiful hotel room in the Latin Quarter, and it wasn't even expensive. We had a balcony with a wonderful view.

We visited many famous tourist places. My favorite was the Louvre, a well-known museum. I was always interested in art, so that was a special treat for me. The museum is so huge; you could spend weeks there. Harish got tired walking around the museum and said "Enough! I need to take a break and rest."

We took lots of breaks and sat in cafes along the river Seine. The French food we ate was delicious. The fruits were tasty too. Umesh's favorite part of the vacation was the hotel breakfast. He said he would be happy if he could eat tartines like those forever. We had so much fun that we're already talking about our next vacation!

     a) Which city did they visit for summer vacation?

     b) How long was the summer vacation?

     c) What did their hotel room have?

     d) Who got tired walking in the Louvre Museum?

     e) What did Umesh enjoy the most?

14. a) Write your mother's daily routine in 100 words.

<center>(OR)</center>

  b) Write a letter to the newspaper editor about the problem of street dogs in your colony.

15. a) Frame two 'Yes/No' questions and three 'Wh' questions from the following passage.

For a year Gopal Krishna Gokhale studied in the Deccan College, Poona. Then he went to Elphinstone College, Bombay, for his final B.A. There he took mathematics as an optional subject and eventually became interested in it. He came under the influence of a distinguished English professor who further quickened his interest in his studies. Under this professor's guidance he made so much progress that he gained a scholarship of twenty rupees a month. It was not a small sum for him who had always been poor. The scholarship was a veritable boon to him made him very happy.

In 1884 he took his B.A. in the second division. He then joined the College of Science and Engineering at Poona. A short time after doing so, he learnt that he

could study law in the Deccan College. But he did not know how to do it, because he wanted to earn his living while he was a student. Soon an opening offered itself to him. He was appointed a teacher in the New English School, Poona, on thirty-five rupees a month. He made up his mind to take the law course while working as a teacher.

(OR)

b) Describe your mobile phone using at least ten adjectives in 100 words.

16. a) Write a paragraph on different types of pollution in 100 words.

(OR)

b) Write a letter to your school friend sharing your experiences at your polytechnic.

SC-102 : BASIC ENGINEERING MATHEMATICS

Course Title	Basic Engineering Mathematics	Course Code	SC-102
Semester	I	Course Group	Foundation
Teaching Scheme in Periods (L : T : P)	4:1:0	Credits	2.5
Methodology	Lecture + Tutorial	Total Contact Periods	75
CIE	60 Marks	SEE	40 Marks

Pre requisites:
This course requires the basic knowledge of Algebra, Trigonometry in Mathematics at Secondary school level

Course Outcomes (COs):
At the end of the course, the student will have the ability to:

CO 1	Solve the problems using concepts of Logarithms and Partial fractions.
CO 2	Determine the Inverse of a square matrix using Algebra of Matrices and Determinants.
CO 3	Solve the problems using the concept of Trigonometric ratios of Allied and Compound angles
CO 4	Solve the problems using the concepts of Multiple and sub-multiple angles; and Transform sum or difference of Trigonometric ratios into products and vice versa.
CO 5	Solve the engineering problems involving Inverse Trigonometric functions and understand the Properties of Triangles.
CO 6	Solve the triangle ABC to Apply the Properties of triangles; and solve the system of linear equations that arise in various engineering problems using the concept of Matrices and Determinant

Course Content:

Unit – I Algebra: **Duration: 10 Periods (L: 08– T: 02)**

Logarithms: Definition of Logarithm and its properties - Natural and Common Logarithms - Meaning of e - Exponential functions - Logarithm as a function and its graphical representation – Solve simple Problems related to Logarithms.

Partial Fractions: Rational, Proper and Improper fractions of polynomials- Reduction of Improper fractions into Proper fractions of polynomials - Resolving Rational fractions into their Partial fractions covering the types mentioned below:

(i) $\frac{f(x)}{(x\pm a)(x\pm b)}, a \neq b;$ (ii) $\frac{f(x)}{(x\pm a)(x\pm b)(x\pm c)}, a \neq b \neq c;$

(iii) $\frac{f(x)}{(x\pm a)^2};$ (iv) $\frac{f(x)}{(x\pm a)^2(x\pm b)}, a \neq b;$

(v) $\frac{f(x)}{(x\pm a)(x^2\pm bx \pm c)},$ where a, b, and c, are constants and $(x^2 \pm bx \pm c)$ cannot be factorised.

Unit – II Matrices and Determinants: **Duration: 15Periods (L: 12 – T:03)**

Matrices: Definition of Matrix-order Of Matrix-Type of Matrices with examples - Algebra of matrices: sum, difference, scalar multiplication and product of Matrices - Equality of two matrices- Properties of Algebra of Matrices - Transpose of a Matrix-Symmetric and Skew-Symmetric Matrices.

Determinants: Determinant of a square Matrix of order 2×2 - Determinant of a square Matrix of order 3×3 by using Laplace's expansion -Properties of Determinants -Singular and non-singular Matrices- Minor and cofactor of an element of a square matrix - Adjoint of a square matrix- Multiplicative inverse of a square matrix.

Unit-III Trigonometry – I   **Duration: 12Periods (L: 10 – T: 02)**

Trigonometric Ratios of Allied Angles: Angle measurement- Relation between Degree and Radian-Notational conversions- Trigonometric Ratios-Trigonometric identities (statements only)-Signs of Trigonometric Ratios in different quadrants - Trigonometric Ratios of standard Allied angles- Related problems.

 Compound Angles: Definition of Compound angles -Trigonometric Ratios of Compound angles (without proof) and identities - Related problems.

Unit-IV Trigonometry – II   **Duration:13 Periods (L: 10 – T: 03)**

 Multiple and sub-multiple angles: Trigonometric Ratios of Multiple angles 2A and3A - Trigonometric Ratios of Sub-multiple angle ($\frac{A}{2}$)- Related identities and problems.

Transformations: Transformation of products into sums or differences and vice versa - Trigonometric identities under the conditions $(A + B + C) = 90^0$ and $(A + B + C) = 180^0$ -Related problems only

Unit – V Trigonometry – III   **Duration: 12Periods (L: 10– T: 02)**

Inverse Trigonometric Functions: Basic concepts of Inverse Trigonometric functions along with their domains and ranges -Properties of inverse Trigonometric functions and identities - Related problems.

Properties of Triangles: Elements of a Triangle -Sine rule -Cosine rule - Projection rule - The law of tangents -Related problems.

Unit - VI Applications of Trigonometry and Matrices:

Duration: 13Periods (L: 10– T:03)

Solutions of Triangles: Solutions of triangles in the following cases: (i) when three sides (SSS) (ii) when two sides and an included angle (SAS) and (iii) when one side and two angles (SAA) are given..-Simple problems

Solutions of system of Simultaneous Linear Equations using Matrices and Determinants:

Solutions of system of simultaneous two linear equations in two unknown variables and three linear equations in three unknown variables by using Cramer's rule and Matrix Inversion Method -Elementary Row operations - Solutions of system of three simultaneous linear equations in three unknown variables by using Gauss-Jordan Method.

Reference Books:
1. Text Book of Matrices – by Shanti Narayan and Dr. P. K. Mittal.
2. Plane Trigonometry - by S.L.Loney.
3. NCERT Mathematics Text Books of Class XI, XII (Part – I).
4. Intermediate Mathematics Text Book I A (Telugu Academy).

Suggested E-Learning references:
1.https://www.khanacademy.org/
2. https://www.wolframalpha.com/
3. https://onlinecourses.nptel.ac.in/
4. http://tutorial.math.lamar.edu/

Suggested Learning Outcomes:

At the end of the course, the student will have the ability to:

1.0. Apply the concepts of Logarithms and Partial fractions in engineering problems.

1.1 Define Logarithm.

1.2 Distinguish Natural Logarithms and Common Logarithms.

1.3 State Properties of Logarithms.

1.4 Explain the meaning of e and Exponential functions.

1.5 Define Logarithm as a function and explain its graphical representation.

1.6 Simplify Logarithmic expressions in engineering problems by using Properties of Logarithms.

1.7 Solve Logarithmic Equations by using Properties of Logarithms.

1.8 Define the Rational fraction of polynomials with examples.

1.9 Classify Rational fractions of polynomials

1.10 Define Proper rational fraction of polynomials with examples.

1.11 Define Improper rational fraction of polynomials with examples.

1.12 Reduce Improper rational fractions into the Proper rational fractions by using division method.

1.13 Resolve Rational fractions of the type: $\frac{f(x)}{(x\pm a)(x\pm b)}$ into Partial fractions, where a and b are Constants with $a \neq b$.

1.14 Resolve Rational fractions of the type: $\frac{f(x)}{(x\pm a)(x\pm b)(x\pm c)}$ into Partial fractions, where a, b and c are constants with $a \neq b \neq c$.

1.15 Resolve Rational fractions of the type: $\frac{f(x)}{(x\pm a)^2}$ into Partial fractions, where a is constant

1.16 Resolve Rational fractions of the type: $\frac{f(x)}{(x-a)^2(x-b)}$ into Partial fractions, where a and b are constants with $a \neq b$.

1.17 Resolve Rational fractions of the type: $\frac{f(x)}{(x\pm a)(x^2\pm bx\pm c)}$ into Partial fractions, where a, b And c are constants and ($x^2 \pm bx \pm c$) cannot be factorised further.

2.0   Determine the Inverse of a square matrix using Algebra of Matrices and Determinants.

2.1 Define Matrix.

2.2 Classify the types of Matrices with examples.

2.3 Define Equality of two Matrices

2.4   Compute the sum of two Matrices.

2.5   Compute the difference of two Matrices.

2. 6 Compute the scalar multiplication of a Matrix.

2.7   Compute the product of two Matrices.

2.8   State the properties of Algebra of Matrices such as Commutative, Associative, Identity and Distributive properties with examples and counter examples.

2.9   Define Transpose of a Matrix and write its properties.

2.10 Define Symmetric and Skew-symmetric Matrices with examples.

2.11 Resolve a Square Matrix into a sum of Symmetric and Skew- symmetric Matrices with examples.

2.12 Expand the Determinant of a square of order 2×2.

2.13 Expand the Determinant of a square of order 3×3 using Laplace's expansion.

2.14 State the Properties of Determinants.

2.15 Apply the Properties of Determinants to solve the problems.

2.16 Distinguish Singular and Non-singular Matrices.

2.17 Define minor and co-factor of an element of square Matrices of orders 2×2 and 3×3 with examples.

2.18 Compute Adjoint of a square Matrices of orders 2×2 and 3×3.

2.19 Compute multiplicative inverse of non-singular square matrices of orders 2×2 and 3×3.

3.0 Calculate Trigonometric ratios of Allied and Compound angles and solve the problems using these concepts.

3.1   Define Trigonometric ratios.

3.2   State Trigonometric identities.

3.3   Define Degree measure and Radian measure.

3.4   State the relation between Degree and Radian.

3.5   Convert Degree into Radian and vice-versa and related problems.

3.6   State signs of the Trigonometric ratios in different quadrants.

3.7 . Formulate Trigonometric ratios of standard Allied angles i.e.($90^0 \pm \Theta$), ($180^0 \pm \Theta$),($270^0 \pm \Theta$),

($360^0 \pm \Theta$) and (– Θ).

3.8 Solve the problems on Trigonometric ratios of Allied angles.

3.9 State the Trigonometric ratios of compound angles i.e. Sin (A±B), Cos (A±B), Tan (A±B) and

Cot (A±B)).

3.10 Derive the identities i.e., sin (A+B). sin (A − B) = $\sin^2 A - \sin^2 B$, etc.,).

3.11 Calculate the values of $\sin15^0$, $\cos15^0$, Tan 15^0, $\sin75^0$, $\cos75^0$, Tan75^0 etc., by using 3.9

3.12 Solve the problems by applying 3.9 and 3.10.

4.0 Solve the problems using the concepts of Multiple and sub-multiple angles; and Transform the sum or difference of Trigonometric ratios into products and vice versa.

4.1 Derive the formulae for Trigonometric ratios of multiple angles 2A and 3A.

4.2 Derive the formulae for Trigonometric ratios of sub multiple angle $\frac{A}{2}$.

4.3 Derive useful identities i.e. $\sin^2 A = \left(\frac{1-\cos 2A}{2}\right)$, $\cos^2 A = \left(\frac{1+\cos 2A}{2}\right)$ etc..

4.4 Solve the problems by using 4.1, 4.2 and 4.3

4.5 Derive the formulae on transforming sum or difference of two Trigonometric ratios into a product and vice versa.

4.6 Solve the problems by applying 4.5.

4.7 Prove the Trigonometric identities under the conditions

(A + B + C) = $90^0$and (A + B + C) = 180^0.only

5.0 Solve the engineering problems involving Inverse Trigonometric functions and understand the Properties of Triangles.

5.1 Explain the concept of the inverse Trigonometric function by selecting their domains and ranges

5.2 List the Inverse Trigonometric functions along with domain and range.

5.3 State the properties of Inverse Trigonometric functions.

5.4 Derive the Inverse Trigonometric identities i.e $\sin^{-1}x + \cos^{-1}x = \frac{\pi}{2}$ etc

5.6 Derive formulae like $\tan^{-1}(x) + \tan^{-1}(y) = \tan^{-1}\left(\frac{x+y}{1-xy}\right)$ where x≥0, y≥0, xy<1 etc.,

5.5 Solve the simple problems

5.6 List the elements of a triangle.

5.7 Explain the Sine rule, Cosine rule, Projection rule and the law of tangents.

5.8 Solve the problems using 5.7

6.0 Apply the Properties of triangles to solve the triangle ABC; and apply the concepts of Matrices and Determinants to solve the system of linear equations that arise in various engineering fields.

6.1 Solve the Triangle ABC, when three sides are given.

6.2 Solve the Triangle ABC, when two sides and an included angles are given.

6.3 Solve the Triangle ABC, when one side and two angles are given.

6.4 Solve the system of two linear equations in two unknown variables using Cramer's rule.

6.5 Solve the system of three linear equations in three unknown variables using Cramer's rule.

6.6 Solve the system of two linear equations in two unknown variables using Matrix Inversion

   Method

6.7 Solve the system of three linear equations in three unknown variables using Matrix Inversion

   Method.

6.8 State elementary row operations.

6.9 Solve the system of three linear equations in three unknowns by Gauss- Jordan Method.

Suggested Student Activities:
1. Student visits Library to refer Standard Books on Mathematics and collect related material.
2. Quiz
3. Group discussion
4. Group Tests
5. Formulae Tests
6. Surprise tests
7. Seminars
8. Home Assignments.
9. Mathematics- for preparing competitive exams and solve some arithmetical ability exam questions

<u>**Duration: 1: 00 Hour**</u>   **Max. Marks: 20**

PART-A

Instructions: 1. Answer **ALL** questions. $04 \times 01 = 04$

                          2 Each question carries **ONE** mark.

1. Write $log\ 21 + log\ 5$ as a single Logarithm.
2. Define Proper fraction.
3. If I=$\begin{pmatrix} -1 & 0 \\ 0 & -1 \end{pmatrix}$ then find I^2.
4. If $A = \begin{pmatrix} sin\ \theta & cos\ \theta \\ -cos\ \theta & sin\ \theta \end{pmatrix}$, then find the value of $|A|$.

PART-B

   Instructions: 1. Answer All questions. $02 \times 03 = 06$

                          2. Each question carries **THREE** marks.

5(a) Find the value of $log_{\frac{1}{3}}\left(\frac{1}{9}\right)$.

                                              OR

5(b) If $\frac{3x-1}{(x-2)(x-3)} = \frac{-5}{(x-2)} + \frac{A}{(x-3)}$, then find the value of A.

6(a) If $A = \begin{pmatrix} 2 & 3 \\ 4 & 1 \end{pmatrix}$, then find AA^T.

                                              OR

6(b) If $\begin{vmatrix} 4 & 3 & P \\ 5 & 3 & 1 \\ 2 & 1 & 6 \end{vmatrix} = 0$, then find the value of "P".

PART C

7(a) Resolve $\frac{2x}{(x+1)(x^2+1)}$ into Partial fractions.

OR

7(b) Find the value of x, if $log_4(x) + log_4(x - 12) = 3$.

8(a)If $A = \begin{pmatrix} 1 & 2 & -1 \\ 3 & 0 & 2 \\ 4 & 5 & 0 \end{pmatrix}$ and B $= \begin{pmatrix} 1 & 0 & 0 \\ 2 & 1 & 0 \\ 0 & 1 & 3 \end{pmatrix}$, then verify that $(AB)^T = B^T A^T$.

OR

8(b) Find the inverse matrix of $A = \begin{pmatrix} 1 & 3 & 3 \\ 1 & 4 & 3 \\ 1 & 3 & 4 \end{pmatrix}$.

Duration: 1: 00 Hour   **Max. Marks: 20**

PART-A

Instructions: 1. Answer **ALL** questions. $04 \times 01 = 04$

                       2 Each question carries **ONE** mark.

1. Find the value of $\sin\left(\frac{3\pi}{2}\right)$.

2. If $tan\,\theta = \frac{-3}{4}$, θ lies in the second quadrant then find the value of $\cos 2\,\theta$.

3. Write the formula for $\sin 3A$.

4. Express $2\sin 7\,\theta \sin 3\,\theta$ as a sum/difference.

PART-B

Instructions: 1. Answer All questions. $02 \times 03 = 06$

                       2. Each question carries **THREE** marks.

5(a) If $\tan A = \frac{1}{2}$ and $\tan B = \frac{1}{3}$, then find $\tan (A - B)$.

                                        OR

5(b) Show that$\frac{\cos\ 19° - \sin\ 19°}{\cos\ 19° + \sin\ 19°} = \tan 26^{0}$.

6(a) Prove that$\frac{\sin 5x + \sin\ 3x}{\cos 5x + \cos 3x} = \tan 4\,x$.

                                        OR

6(b) Prove that$\frac{1 + \cos\ 2\theta}{\sin\ 2\theta} = \cot \theta$.

PART C

Instructions: 1. Answer All questions. $02 \times 05 = 10$

                       2. Each question carries **FIVE** marks.

7(a) Prove that $\cos A + \cos(120° + A) + \cos(120° - A) = 0$.

                                        OR

7(b) Evaluate$\sum \frac{\sin (A+B) \sin (A-B)}{c\,os^{2}\,A \cos^{2}\,B}$.

8(a) If $A + B + C = \frac{\pi}{2}$, then prove that $\cot A + \cot B + \cot C = \cot A \cot B \cot C$.

                                        OR

8(b) Prove that $\cos 1\,0° \cos 3\,0° \cos 5\,0° \cos 7\,0° = \frac{3}{16}$.

<u>**Duration: 2:00 Hours**</u>   <u>**Max. Marks: 40**</u>

PART-A

Instructions: 1. Answer **ALL** questions. $08 \times 01 = 08$

2. Each question carries **ONE** mark.

1. Define Natural Logarithm.
2. Find the value of $\cos\ (-510°)$.
3. Write the value of $\sin^{-1}(\theta) + \cos^{-1}(\theta)$.
4. List the elements of a triangle.
5. State the law of tangents.
6. Find the value of $\cos(\cos^{-1}(30°))$.
7. Write the augmented matrix of the system of equations $3x + 2y - z = 4, 2x - 3y + 5z = 7$ and $x - y + z = 3$.
7. What is the formula for the solution of triangle ABC when two sides and an included angle are given?

PART-B

Instructions: 1. Answer All question. $04 \times 03 = 12$

2. Each question carries **THREE** marks.

9(a) Resolve $\frac{1}{(x+9)(x+7)}$ into partial fractions.

OR

9(b) Prove that $tan^{-1}\left(\frac{1}{3}\right) + tan^{-1}\left(\frac{1}{7}\right) = tan^{-1}\left(\frac{1}{2}\right)$.

10 (a) Prove that $\frac{\cos(A-B)}{\cos A \sin B} = \tan A + \cot B$.

OR

10(b) Find the angle C in any triangle ABC if $b = \sqrt{2}, c = \sqrt{3}, B = 45°$.

11(a) In any triangle ABC, show that $\sin A + \sin B + \sin C = \frac{S}{R}$.

OR

11(b) Prove that $sin^{-1}\left(\frac{1}{\sqrt{5}}\right) + tan^{-1}\left(\frac{1}{3}\right) = \frac{\pi}{4}$.

12(a) Using the method of determinants find the value of x from $x + y + z = 2, x + 2y + 3z = 1$

and $3x + y - 5z = 4$.

OR

12(b) In any triangle ABC find the side c, if $a = 2, A = 30°$ and $C = 60°$.

PART C

Instructions: 1. Answer All questions $04 \times 05 = 20$

2. Each question carries **FIVE** marks

13(a) Resolve $\dfrac{2x}{x^2 + 2x + 1}$ into partial fractions.

OR

13(b) If $tan^{-1} x + tan^{-1} y + tan^{-1} z = \pi$, then prove that $x + y + z = xyz$.

14(a)If $cos\ x + cos\ y = \dfrac{1}{3}$ and $sin\ x + sin\ y = \dfrac{1}{4}$, then find $tan\left(\dfrac{x+y}{2}\right)$.

OR

14(b) Solve the triangle ABC, with $a = 2, b = \sqrt{2}, c = \sqrt{3} + 1$.

15(a)If $cos^{-1}\dfrac{x}{a} + cos^{-1}\dfrac{y}{b} = \theta$, then show that $\dfrac{x^2}{a^2} - \dfrac{2xy}{ab}cos\ \theta + \dfrac{y^2}{b^2} = sin^2\ \theta$.

OR

15(b) Show that $\sum a\ sin(B - C) = 0$.

16(a) Solve the system of simultaneous equations $x + 2y - z = -3, \quad 3x + y + z = 4$ and

$x - y + 2z = 6$ by using Gauss-Jordan method.

OR

16(b) Using Matrix inversion method, solve the system of simultaneous equations $x + y + z = 6$,

$x - y + z = 2$ and $2x + y - z = 1$.

SC-103 : BASIC PHYSICS

Course Title:	**Basic Physics**	Course Code :	**SC-103**
Semester:	**I Semester**	Course Group :	**Foundation**
Teaching Scheme in Periods(L:T:P):	**4:1:0**	Credits :	**2.5**
Type of Course :	**Lecture+ Tutorials**	Total Contact Periods :	**75 Periods**
CIE :	**60 Marks**	SEE :	**40 Marks**

Pre requisites

This course requires the basic knowledge of Science and Mathematics

Course Outcomes

Upon completion of the course, the student shall be able to

CO1	Identify the need of dimensional analysis and error measurements of physical quantities.
CO2	Apply vector concepts viz addition, multiplication to explain resultant of vectors, work done by force, power, torque and areas of triangle and parallelogram.
CO3	Analyze the kinematic equations forprojectiles and objects moving on horizontal and inclined frictional surfaces.
CO4	Make use of the fundamental propertieselasticity, surface tension and viscosity of solids and fluids to solve problems in mechanics.
CO5	Developthe knowledge associated with laws of conservation of energy and Renewable Energy sources such as Solar energy and Wind energy for sustainable environment.
CO6	Utilize the principles of thermal expansion to explain thermostat and identify the significance of laws of thermodynamics.

CO	Basic and Discipline Specific Knowledge	Problem Analysis	Design/Development of Solutions	Engineering Tools, Experimentation and Testing	Engineering Practices for Society, Sustainability and Environment	Project Management	Lifelong Learning	Linked PO

Course contents:

Unit 1   Units, Dimensions and Measurements

Duration: 12 periods (L:10 – T:2)

Physical quantity, Fundamental and derived quantities, unit-definitions- SI units - Advantages of S.I. units, Dimensions and dimensional formula - units and dimensional formulae for physical quantities - Dimensionless quantities - Principle of homogeneity – numerical problems, Applications of dimensional analysis -problems- Limitations of dimensional analysis –accuracy, precision of instruments, Errors in measurement.

Unit 2   Vectors

Duration: 13 periods (L:10 – T:3)

Scalar and Vector quantities – definition and examples, Graphical representation of a vector, Classification of vectors - numerical problems.Triangle law of vectors, Parallelogram law of vectors – statement- expression for magnitude and direction of

resultant vector –derivation- illustrations (working of sling and flying bird), Representation of a vector in terms of unit vectors $\hat{i}, \hat{j}$ and $\hat{k}$– numerical problems.

Scalar product of vectors- application to work done by a force and power – properties of scalar product – Numerical problems.

Vector product of vectors– application to torque –areas of triangle and parallelogram - properties of vector product -numerical problems.

Unit 3   Mechanics

Duration: 13 periods (L:10 – T:3)

Equations of motion in a straight line, acceleration due to gravity, equations of motion in vertical motion, Projectile motion of a body- examples, Oblique projection-expression for path of a projectile-derivation-Maximum height, Time of ascent, Time of descent, Time of flight, Horizontal range and maximum horizontal range of a projectile in oblique projection - related numerical problems

Friction – causes-types- Normal reaction, angle of repose and coefficient of friction-laws of static friction, expression for acceleration, displacement and time taken to come to rest by a body on a rough horizontal surface –derivation-numerical problems, expressions for acceleration of a body on a rough inclined surface - advantages and disadvantages of friction, methods of minimizing friction.

Unit 4   Properties of Matter   **Duration: 12 periods ((L:10 – T:2)**

Elasticity and elastic bodies-definition- examples, Stress and Strain-expressions-numerical problems, types of stress and strain, Elastic limit-definition, Hooke's law, stress and strain curve,Young's modulus of a wire – derivation-numerical problems, Cohesive and Adhesive forces, Surface tension- explanation and illustrations, capillarity and angle of contact-definitions, formula for determination of surface tension of a liquid based on capillary rise method – outline and related numerical problems, effect of temperature and impurity on surface tension of a liquid, Viscosity-explanation- Newton's formula for viscous force-derivation- coefficient of viscosity-numerical problems-Poiseuille's equation for coefficient of viscosity- related numerical problems, effect of temperature on viscosity of liquids and gases, importance of viscosity in lubricants.

Unit 5   Work and Energy

Duration: 12 periods (L:10 – T:2)

Work, Power and Energy-explanation-numerical problems, Potential energy and Kinetic energy-explanation- examples, expressions for Potential energy and Kinetic energy and related numerical problems, Work-Energy theorem – statement-proof-related numerical problems, law of conservation of energy-statement-examples-proof in case of a freely

falling body - solve related numerical problems, law of conservation of energy in the case of simple pendulum, Non-renewable and Renewable energy sources-explanation-sources, Solar water heater and Wind mill.

Unit 6   Thermal Physics

Duration: 13 periods (L:10 – T:3)

Transmission of heat -Thermal expansion of solids and three coefficients of expansion of solids – applications, thermal conductivity of a solid – expression, principle of bimetallic strip, bimetallic thermostat, Boyle's law in gases –explanation- its limitations-related numerical problems, concept of Absolute Zero, Absolute scale of temperature, Charles' laws in gases in terms of absolute temperature – related numerical problems, Ideal gas equation-derivation- related numerical problems, gas equation in terms of density- solve related numerical problems, Isothermal and Adiabatic processes, internal energy and external work done – explanation, expression for work done by the gas –derivation- related numerical problems, 1st law of thermodynamics-explanation-list of applications, first law of thermodynamics to isothermal and adiabatic processes, 2nd law of thermodynamics –explanation- list of applications

2. Engineering Physics by R.K. Gaur, S.L. Gupta, Dhanpatrai Publications, New Delhi.
3. Intermediate Physics, Telugu Academy, TS, Hyderabad.
4. Fundamentals of Physics by Halliday and Resnick.
5. Physics Part-I & II, NCERT

E-learning resources:

Hyper Physics website: http://hyperphysics.phy-astr.gsu.edu/

Learning Outcome:
Upon completion of this course the student will be able to

Unit 1   Units, Dimensions and Measurements

1.1   Define Physical quantity, Fundamental quantity, derived physical quantity and Unit.
1.2   List SI units of fundamental physical quantities with their symbols (Base and Supplementary quantities).

1.3   Outline advantages of S.I. units.

1.4   Define Dimensions and Dimensional formula of a physical quantity.

1.5   List SI units and dimensional formulae of physical quantities (Area, Volume, Density, Velocity, Acceleration, Momentum, Impulse, Force, Work, Energy, Power, Pressure, Stress, Modulus of Elasticity, Angular velocity, Torque, Frequency, Surface Tension, Coefficient of viscosity, Universal Gravitational constant, Wavelength, Planck's constant)

1.6   List dimensionless quantities.

1.7   Explain principle of homogeneity of dimensions and solve related numerical problems (finding dimensions of terms in an equation).

1.8   List applications of dimensional analysis and solve problems

(1) Correctness of physical equations (i) Displacement $S = ut + \frac{1}{2}at^2$

(ii) Velocity of sound in elastic medium $v = \sqrt{\frac{E}{d}}$ and

(iii) Work done by a gas $W = P(V_2 - V_1)$

(2) Conversion of a unit from SI to CGS (density, force and energy).

(3) Construct arelation between physical quantities. (Time period of simple pendulum $T = 2\pi\sqrt{\frac{l}{g}}$)

1.9 List the limitations of dimensional analysis.

1.10 Explainerror, absolute error and percentage error of a physical quantity. Solve numerical problems on percentage error.

Unit 2   Vectors

2.1   Define Scalar and Vector quantities with examples.

2.2   Represent a vector graphically and label vector characteristics.

2.3   Classify Vectors (Proper vector, Equal vectors, Parallel vectors, Negative vector, Unit vector, Null vector, Collinear vectors, Coplanar vectors and Position vector).

2.4   Explain resolution of a Vector into two orthogonal components and solve related numerical problems.

2.5   Explain Triangle law of vectors.

2.6   Explain Parallelogram law of vectors and develop expressions for magnitude and direction of resultant of two vectors and solve related numerical problems.

2.7   Illustrate parallelogram law of vectors (working of sling and flying bird).

2.8   Explain a vector in terms of unit vectors $(\hat{\imath}, \hat{\jmath}, \hat{k})$ and solve related numerical problems on finding magnitude and unit vector.

2.9   Explain Scalar product of two vectors and solve numerical problems.

2.10 Construct expressions for work done ($W = \vec{F}.\vec{S}$) and power ($P = \vec{F}.\vec{v}$) in vector notation starting from force and solve related numerical problems.

2.11 Identify the properties of scalar product.

2.12 Explain vector product of two vectors and solve related numerical problems.

2.13 Construct an expression for torque in vector notation ($\vec{\tau} = \vec{r}X\vec{F}$) starting from force and position vector and solve numerical problems.

2.14 Outline the expressions for areas of triangle and parallelogram in vector notation and solve numerical problems.

2.15 Identify the properties of vector product.

Unit 3   Mechanics

3.1 Outline the equations of motion in a straight line.

3.2 Explain acceleration due to gravity and extend the equations of motion to freely falling body and body projected vertically upward.

3.3 Explain projectile motion of a body with examples.

3.4 Develop the expression for path of a projectile in oblique projection.

3.5 Develop formulae for Maximum height, Time of ascent, Time of descent, Time of flight, Horizontal range and maximum horizontal range of a projectile in oblique projection and solve related numerical problems.

3.6 Explain friction and causes of friction.

3.7 Classify types of friction.

3.8 Explain the concept of Normal reaction, Angle of repose and Coefficient of friction.

3.9 Outline the laws of Static friction.

3.10 Develop the expression for acceleration of a body on a rough horizontal surface and solve simple numerical problems on   a =- µg and F = µR

3.11 Develop the expressions for displacement and time taken to come to rest by a body over a rough horizontal surface and solve simple numerical problems on

$$s = \frac{u^2}{2\mu g} \text{ and } t = \frac{u}{\mu g}$$

3.12 Develop the expressions for acceleration of a body on a rough inclined surface (moving upward and sliding downward)

3.13 Outline the advantages and disadvantages of friction.

3.14 Identify the methods of minimizing friction.

Unit 4   Properties of Matter

4.1   Define Elasticity and elastic bodies with examples.
4.2   Explain Stress and Strain with their expressions and solve related numerical problems.
4.3   Explain types of stress and strain (longitudinal, shear and bulk).
4.4   Define Elastic limit and explain Hooke's law.
4.5   Explain stress and strain curve of a metallic wire.
4.6   Develop a formula for Young's modulus of a wire having circular cross-sectional area and solve related numerical problems.
4.7   Compare Cohesive and Adhesive forces.
4.8   Explain Surface tension and illustrate Surface tension with examples.
4.9   Explain capillarity and angle of contact.
4.10   Outline the formula for determination of surface tension of a liquid based on capillary rise method with legible diagram (no derivation $T = \frac{hrdg}{2\,Cos\theta}$)and solve related numerical problems.
4.11   Explain the effect of temperature and impurity on surface tension of a liquid.
4.12   Explain Viscosity.
4.13   Develop Newton's formula for viscous force and explain coefficient of viscosity and solve related numerical problems.
4.14   Outline Poiseuille's equation for coefficient of viscosity and solve related numerical problems.
4.15   Explain the effect of temperature on viscosity of liquids and gases.
4.16   Identify the importance of viscosity inlubricants.

Unit 5   Work andEnergy

5.1   Explain the concept of Work, Power and Energy and solve related numerical problems.
5.2   Explain Potential energy and Kinetic energy with examples.
5.3   Develop expressions for Potential energy and Kinetic energy and solve related numerical problems.
5.4   Develop Work-Energy theorem and solve related numerical problems.
5.5   Explain law of conservation of energy with examples.
5.6   Prove law of conservation of energy in the case of a freely falling body and solve related numerical problems.
5.7   Illustrate law of conservation of energy in the case of simple pendulum.
5.8   Explain Non-renewable and Renewable energy sources and list the sources.
5.9   Explain construction and working of Solar water heater and Wind mill with legible diagrams.

Unit 6   Thermal Physics

6.1   Explain modes of transmission of heat.

6.2   Explain thermal expansion of solids and develop three coefficients of expansion of solids and identify the applications.

6.3   Explain thermal conductivity of a solid and develop the expression for it [Q= KA ($\theta_1 - \theta_2$)t].

6.4   Explain principle of bimetallic strip.

6.5   Explain construction and working of bimetallic thermostat as an automatic temperature control device in electrical gadgets.

6.6   Explain Boyle's law in gases and its limitations and solve related numerical problems.

6.7   Explain concept of Absolute Zero using volume and pressure coefficients of a gas [$V_t = V_0(1 + \frac{t}{273})$ and $P_t = P_0(1 + \frac{t}{273})$]and develop Absolute temperature scale.

6.8   Explain Charles' laws in gases in terms of absolute temperature and solve related numerical problems.

6.9   Develop Ideal gas equation andcalculate universal gas constant and solve related numerical problems.

6.10   Translate gas equation in terms of density and solve related numerical problems.

6.11   Explain Isothermal and Adiabatic processes and identify differences between them.

6.12   Explain the terms internal energy and external work done by a gas.

6.13   Develop the expression for work done by the gas [W=P(V_2-V_1)] and solve related numerical problems.

6.14   Explain first law of thermodynamics and list applications of it and solve related numerical problems.

6.15   Solve first law of thermodynamics to isothermal and adiabatic processes.

6.16   Explain second law of thermodynamics and list applications of it.

STATE BOARD OF TECHNICAL EDUCATION & TRAINING, TELANGANA

DIPLOMA EXAMINATION (C 24)
SEMESTER I
MID-I EXAM
SC 103 Basic Physics
Model Question paper

Duration: 1hour   **Max.Marks: 20**

PART-A

Instructions: 1. Answer **ALL** questions.
                2. Each question carries **ONE** mark.   4X1 =4

1. Define fundamental physical quantity.
2. Name the dimensional formula ofPower.
3. How does vector is different from scalar?
4. Define unit vector.

PART-B

Instructions: 1. Answer **ALL** questions.
                2. Each question carries **THREE** marks.   2X3 =6

5(a) Outline advantages of S.I. units.

(OR)

(b) The displacement of a particle moving along x-axis with respect to time is $x=at+bt^2-ct^3$.
Find the dimensional formulae of a, b and c.

6(a) Explain triangle law of vectors.

(OR)

(b) At an airport, a horizontal wind is blowing at 15 ms^{-1} at an angle of 60^0 north of east.
Calculate the components of the wind velocity in the north and east directions.

PART-C

7(a) Apply dimensional analysis to convert unit of energy from SI to CGS.

(OR)

(b)Construct an expression for time period of simple pendulum using dimensional analysis starting from length of pendulum (l) , mass of the bob (m) and acceleration due to gravity (g). Take proportionality constant as 2π.

8(a) Develop expressions for magnitude and direction of resultant of two vectors using parallelogram law of vectors.

(OR)

(b)Apply vector properties to find the angle between $\vec{P} = 2\hat{\imath} - 2\hat{\jmath} + \hat{k}$ and $\vec{Q} = \hat{\imath} - 2\hat{\jmath} + \hat{k}$

STATE BOARD OF TECHNICAL EDUCATION & TRAINING, TELANGANA

DIPLOMA EXAMINATION (C 24)
SEMESTER I
MID-II EXAM
SC 103Basic Physics
Model Question paper

Duration: 1hour   **Max.Marks: 20**

PART-A

Instructions: 1. Answer **ALL** questions.
                       2. Each question carries **ONE** mark.

                                                                                                            4X1 =4

1. What is a projectile?
2. Define Normal reaction
3. Define Elastic limit.
4. Define angle of contact.

PART-B

Instructions: 1. Answer **ALL** questions.
                       2. Each question carries **THREE** marks.   2X3 =6

5(a)A ball is kicked into air with a velocity of 20 ms^{-1} at an angle 30^0 to the Earth's
       surface. Find maximum height reached by the ball. (Takeg = 10 ms^{-2})

(OR)

(b)Outline the laws of Static friction.

6(a)An object of weight 20 N suspended vertically from a crane on a steel cable 4 m long
       and 2 mm in diameter produces an elongation of 0.24 mm. Calculate the stress and
       strain in the cable.

(OR)

(b)Draw a neat diagram for the rise and fall of a liquid in a capillary tube showing meniscus and
       angle of contact.

PART-C

7(a)Develop the expression for path of a projectile in oblique projection.

(OR)

(b)Develop the expression for acceleration of a body moving up on a rough inclined surface

8(a)Develop a formula for Young's modulus of a wire having circular cross-sectional
  area.

(OR)

(b) Develop Newton's formula for viscous force and explain coefficient of viscosity.

****

STATE BOARD OF TECHNICAL EDUCATION & TRAINING, TELANGANA

DIPLOMA EXAMINATION (C 24)
SEMESTER I
SEMESTER END EXAM
SC 103Basic Physics
Model Question paper

Duration: 2 hours   **Max.Marks: 40**

PART – A

Instructions: 1. Answer **ALL** questions.
                        2. Each question carries **ONE** mark.

                                                                                        8X1=8

1. Name the dimensional formulaof universal gravitational constant.
2. Define angle of repose.
3. What is kinetic energy?
4. Name one example of surface tension.
5. Define renewable energy source.
6. What is the principle of working of wind mill?
7. Define convection..
8. Define internal energy.

PART – B

Instructions: 1. Answer **ALL** questions.
2. Each question carries **THREE** marks.

                                                                                        4X3=12

9(a). Explain vector product of two vectors.
                                 (OR)
  (b). A gun fires 120 bullets per minute. Find the power of the gun if the mass of each
        bullet is 3 g and velocity is 500 ms^{-1}.

10(a).Draw a neat diagram to show various forcesacting on a body which is (a) sliding
          downward and (b) moving upward on a rough inclined surface.
                                 (OR)
  (b).Explain principle of bimetallic strip.

11(a). Calculate the work done by a ball of mass 2 kg when its velocity increases from 5
          m/s to 10 ms^{-1} due to applied force.

(OR)

(b). The work done by a person in carrying a box of mass 20 kg through a vertical height of 5 m is 4900 J. Find the mass of the person.

12(a). The volume of a gas at 30^0C is 200 cc. What is the volume of the gas if temperature of the gas is raised to 100^0C at constant pressure?

(OR)

(b). Explain Boyle's law and its limitations.

PART – C

Instructions: 1. Answer **ALL** questions.
2. Each question carries **FIVE** marks.

$4X5 = 20$

13(a). Develop expressions for magnitude and direction of resultant of two vectors using parallelogram law of vectors.

(OR)

(b). Develop Work-Energy theorem.

14(a). Draw a schematic graph of the applied force versus resulting elongation of a metallic wire. Identify the important features in it.

(OR)

(b). Develop the relation between Pressure, Volume and Temperature of an ideal gas.

15(a). Prove law of conservation of energy in the case of a freely falling body.

(OR)

(b). Explain working of wind mill with legible diagram.

16(a). Develop the relation between Pressure, Volume and Temperature of an ideal gas.

(OR)

(b). Explain thermal conductivity of a solid and develop the expression for it.

SC-104 : GENERAL ENGINEERING CHEMISTRY

Course Title	General Engineering Chemistry	Course Code	SC-104
Semester	I	Course Group	Foundation
Teaching Scheme in Periods(L:T:P)	4:1:0	Credits	2.5
Methodology	Lecture + Tutorial	Total Contact Periods	75
CIE	60 Marks	SEE	40 Marks

Prerequisite: Basic knowledge of chemistry in secondary education and appreciate the role of Chemistry and environmental science in different spheres of industries.

Course Outcome: On successful completion of the course, the students will have ability to attain below

Course Outcomes (CO):

CO1	Explain the concept of atomic structure, chemical bonding, oxidation, reduction and oxidation number and apply the knowledge in the selection of engineering materials.
CO2	Explain concept of mole, molarity, normality and colloids and utilize the knowledge in various industrial processes.
CO3	Make use of the different theories of acids and bases, concept of pH, buffer action and apply the knowledge in selection of solutions in industrial areas.
CO4	Extend the knowledge of Ecosystem, Biodiversity, Green Chemistry and Management of e-waste in maintaining the sustainable development of society.
CO5	Identify the hardness and degree of hardness of water and apply the relevant water treatment methods to solve domestic and industrial problems.
CO6	Explain the concept of electrolysis, applications of electrolysis, Faraday's Laws of Electrolysis and apply the knowledge in extraction and purification of metals used for domestic and industrial purposes.

CO-PO-Mapping

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3	-	-	-	-	-	1

CO2	3	1	-	-	1	-	2
CO3	3	1	-	-	-	-	2
CO4	3	-	-	-	3	-	3
CO5	3	1	-	-	3	-	-
CO6	3	1	-	-	-	-	-

COURSE CONTENTS:

UNIT-I:FundamentalsofChemistry L10 + T3 Periods

Atomic Structure: Introduction – Atomic number – Mass number- Isotopes and Isobars -Bohr's Atomic Theory- Quantum numbers-Orbitals - Shapes of s, p and d orbitals – Aufbau principle - Hund'srule-Pauli'sexclusion principle-Electronicconfigurationofelements

Chemical Bonding: Introduction – Electronic theory of valency - Types of chemical bonds Ionic, Covalent,Co-ordinatecovalent and Metallic bond- propertiesofIonicandCovalent   compounds.

Oxidation-Reduction:Electronic concept ofOxidation,Reduction and Redox reaction.

Oxidation number-Calculations.

UNIT-II:SolutionsandColloids

L**10+ T2Periods**

Introduction - Solution – Solubility - Classification of solutions based on solubility and physical state-Atomic weight-Molecular weight, Equivalent weight-Mole concept –Molarity–Normality

Numericalproblemsonmole,   molarity   andnormality   –Colloids-   Typesof   colloids-LyophilicandLyophobiccolloids-PropertiesofColloids -Industrial applications of colloids

UNIT-III:AcidsandBases   L10+ T2 Periods

Introduction - Theories of acids and bases and limitations - Arrhenius theory - Brownsted Lowry theory - Lewis acid base theory - Ionic product of water - pH and related numerical problems-Buffer solutions-buffer action-Applications of buffer solution-Ostwald's theory of indicators.

UNIT-IV: Environmental Science   L10+ T3 periods

Introduction-Environment   –Scopeandimportanceofenvironmentalstudies-   Importantterms-Concept of ecosystem - Producers, consumers and decomposers - Biodiversity, definition an threats toBiodiversity- Green Chemistry– e-waste –Management ofe-waste.

UNIT-V:WaterTechnology   **L10+ T3 periods**

Introduction-Soft and hard water-Causes of hardness–Types of hardness-Disadvantages of hard water using in industries-Degree of hardness-Softening methods-Permutit process, Ion exchangeprocess-Drinking water-Municipal treatment of water for drinking purpose–Osmosis-Reverse Osmosis-Advantages of Reverse osmosis–Desalination by Electro dialysis.

UNIT-VI: Electrochemistry   **L10+ T2Periods**

Conductors, insulators, electrolytes–Types of electrolytes-Arrhenius theory of electrolytic dissociation-Electrolysis–Electrolysis of fused NaCl and aqueous NaCl-Applications ofelectrolysis-Faraday's laws of electrolysis-Numerical problems.

COURSE OBJECTIVES

UNIT- I: FUNDAMENTALS OF CHEMISTRY

1.1 Compare the mass and charge of proton, electron and neutron

1.2 Define and explain atomic number, mass number, isotopes and isobars

1.3 State the postulates of Bohr's atomic theory and its limitations

1.4 Explain Quantum numbersand theirSignificances

1.5 Define an Orbital explain the shapes of s, p and d orbitals.

1.6 Outline the differences between Orbit and Orbital

1.7 Define electronic configuration and apply Aufbau principle,Hund's rule, and Pauli's exclusion principle in writing electronic configuration of elements up to atomic number 30

1.8 Explain the postulates of Electronic theory of valency

1.9 Define chemical bond and list the types of chemical bond

1.10Define ionic bond and explain the Ionic bond formation in NaCl and MgO molecules

1.11 Define and explain the types of covalent bonds

1.12 Explain the covalent bond formation in homo atomic molecules (non-polar molecules):

H_2, O_2, N_2

1.13 Explain the covalent bond formation in hetero atomic molecules(polar molecules): HF and H_2O

1.14 Explain the properties of ionic compounds and covalent compounds

1.15 Compare the properties of ionic compounds and covalent compounds

1.16 Define Co-ordinate covalent bond and explain the bond formation in ammonia boron trifluoride

and Hydronium ion

1.17 Define metallic bond and explain with free electron theory/ electron sea model

1.18Define and explain the electronic concept of oxidation, reduction and redox reaction

1.19 Define oxidation number and list the rules for calculation of oxidation number

1.20 Find the oxidation number of C, N, S, P, Cr and Mn in their compounds

UNIT-II: SOLUTIONS AND COLLOIDS

2.1 Define the terms: solution, solute, solvent, aqueous solution and alcoholic solution with examples

2.2 Define solubility and classify the solutions based on solubility

2.3 Classify the solutions based on the physical state of solution, solute and solvent

2.4 Define atomic weight, molecular weight and equivalent weight

2.5 Find the molecular weight and the equivalent weights of acids, bases and salts

2.6 Explain mole concept and solve the numerical problems on mole

2.7 Define and explain molarity and normality

2.8 Find the relationship between molarity and normality

2.9 Solve numerical problems on molarity and normality of solutions

2.10 Define the terms: true solution, colloids and suspensions with examples

2.11 Classify the colloids and explain their properties

2.12 Compare the properties of Lyophilic Colloid and Lyophobic Colloid

2.13 Explain the general properties of colloids such as a) Tyndall effect b) Brownian movementand c) Coagulation

2.14 Explain in brief any five industrial applications of colloids

UNIT-III: ACIDS, BASES AND BUFFERS

3.1 Explain the postulates and limitations of Arrhenius theory of acids and bases

3.2 Explain the postulates and limitations of Brownsted - Lowry theory of acids and bases

3.3 Explain the postulates and limitations of Lewis theory of acids and bases

3.4 Define and explain the ionic product of water and solve numerical problems

3.5 Define pH and solve numerical problems on pH

3.6. Explain Ostwald's theory of indicators with phenolphthalein and methyl orange indicators as examples

3.7 Define buffer solution and explainthe acidic and basic buffers with examples

3.8 Explain buffer action of Acetate buffer and Ammonium buffer

3.9 Explain general applications of buffer solutions

UNIT-IV: ENVIRONMENTAL SCIENCE

4.1 Define and explain different segments of environment:i) Atmosphere, ii) Hydrosphere, iii) Lithosphere and iv)Biosphere

4.2 Define the terms:i) Pollutant, ii) Contaminant iii) Pollution, iv) Receptor, v) Sink, vi) Particulates, vii) Threshold limit value (TLV), viii) Dissolved oxygen (DO), ix) BOD and x) COD

4.3 Define Ecosystem. Explain the biotic and abioticcomponents of ecosystem.

4.4 Define and explain the following biotic components with examples:

   1) Producers, 2) Consumers and 3) Decomposers

4.5 Define biodiversity and explain the threats to biodiversity

4.6 Explain the methods of conservation of biodiversity

4.7Define and explain the principles of Green chemistry

4.8 Define e-waste and explain the sources of e-Waste

4.9 Explain the effect of e-waste on environment and human beings

4.10 Explain the management of e-waste-Land filling, incineration and recycling.

UNIT V: WATER TECHNOLOGY

5.1 List the various sources of water.

5.2 Define the terms soft water and hard water

5.3 Define hardness of water and name the compounds responsible for hardness

5.4 Define and explain the types of hardness

5.5Identify the disadvantages of using hard waterin industries: i) Boilers ii) Laundry, iii) Textile

   industry, iv) Paper industry, v) Sugar Industry and vi) Pharmaceutical industry

5.6Define degree of hardness and explain different units of hardness - ppm and mg/L solve numerical problems on degree of hardness

5.7 Utilize and explain a) Permutit process and b) Ion-Exchange process in softening of hard water:

5.8 Define desalination of water

5.9 Define Osmosis and Reverse Osmosis (RO)

5.10 Explain the process of conversion of sea water into drinking water by reverse osmosis

5.11 List the applications and advantages of RO.

5.12 Explain the desalination of sea water by Electro dialysis.

5.13 List the essential qualities of drinking water.

5.14 Explain the Municipal treatment of water for drinking purpose with flow chart-

   a) Sedimentation b) Coagulation c) Filtration, d) Sterilization by Aeration and Chlorination

UNIT VI: ELECTROCHEMISTRY

6.1 Define the terms, conductor, insulator, electrolyte and non-electrolyte

6.2 Classify the electrolytes - strong and weak electrolytes with examples.

6.3 Compare and contrast the metallic conductors and electrolytic conductors.

6.4 Explain the Arrhenius theory of electrolytic dissociation.

6.5 Define electrolysis.

6.6 State and explain Faraday's laws of electrolysis

6.7 Define chemical equivalent and electrochemical equivalent and their relation

6.8 Numerical problems based on Faraday's I-law and II- law

6.9 Construct the suitable electrolytic cell to explain the electrolysis of fused NaCl and aqueous NaCl

   (Nelson Cell).

6.10 Apply the principle of electrolysis in Electrolytic refining of copper metal and Electroplating.

BOARD DIPLOMA EXAMINATIONS (C24)
FIRST SEMESTER EXAMINATION
MIDSEM -I
SC-104-GENERALENGINEERINGCHEMISTRY

Time:1Hour

_____

Max.Marks:20

PART–A

Instructions: Answer all questions. Each question carries one mark   4 x 1 = 4 Marks

1. State Hund's rule.
2. What is the electronic configuration of Cr.
3. Define mole.
4. What are colloids?

PART–B

Instructions: Answer the following questions.
2 x 3 = 6 Marks

Each question carries three marks

5. a) Outline the shapes of s and d orbitals.

(OR)

5. b) Explain the covalent bond formation in Nitrogen molecule by Lewis dot method.

6. a) Classify solutions based on their physical state.

(OR)

6. b) Compare any three properties of lyophilic and lyophobic colloids.

PART – C

Instructions: Answer the following questions.
2 x 5 = 10 Marks

Each question carries five marks

7. a) Identify and explain the nature of bonding in the following molecule 1.MgO, 2.HCl

(OR)

b) Find the oxidation number of 'S' in H_2SO_4, 'Mn' in $KMnO_4$ and Cr' in $K_2Cr_2O_7$

8. a) Find the weight of H_2SO_4 required to prepare 400 ml of 0.5M solution.

(OR)

b) Find the normality of 500 ml solution containing 0.53 grams of Na_2CO_3.

BOARD DIPLOMA EXAMINATIONS (C24)
FIRST SEMESTER EXAMINATION
MIDSEM -II
SC-104-GENERALENGINEERINGCHEMISTRY

Time: 1Hour

Max. Marks: 20

PART–A

Instructions: Answer all questions. Each question carries one mark 4 x 1 = 4 Marks

1. Whatisconjugateacidbasepair?
2. Defineionicproductof water.
3. Definean ecosystem.
4. Whatisthreshold limitvalue?

PART–B

Instructions: Answer the following questions.   2 x 3 = 6 Marks

Each question carries three marks

5. a) .Outlinethelimitationsof Arrheniustheoryofacidsandbases?

(OR)

b) Explain neutralization according to Lewis theory of acids and bases with anexample.

6. a) Explainthetermsproducers, consumersanddecomposerswithexample.

(OR)

b) Explain the effect of e-waste on environment.

PART – C

Instructions: Answer the following questions.   2 x 5 = 10 Marks

Each question carries five marks

7. a) DefinepH. Find thepH of0.5M NaOH solution.

(OR)

8. b) What are buffer solutions? Explain any four applications of buffer solutions.

9. a) What is Biodiversity? Explain the methods of Conservation of Biodiversity.

(OR)

b) What is Green chemistry? Explain any four principles of Green Chemistry.

BOARD DIPLOMA EXAMINATIONS (C24)
FIRST SEMESTER EXAMINATION
SEMESTER END EXAMINATION
SC-104-GENERALENGINEERINGCHEMISTRY

Time:2Hours   Max.Marks:40

PART-A

Instructions: Answer all questions. Each question carries one mark.   8 X 1 = 8 marks

1.   Define atomic mass number.

2.   What is biodiversity?

3.   Define degree of hardness of water.

4.   What are buffer solutions?

5.   Define soft water and hard water.

6.   Name the salts responsible for temporary hardness of water.

7.   Define the terms conductor and insulator.

8.   What is an electrolyte?

PART– B

Instructions:Answerthefollowingquestions.   4x3=12Marks

Each question carries three marks

9. a) StateandexplainHund's rule.

(OR)

b) Interpret any six essential qualities of drinking water.

10. a) .Explainthetermsproducers, consumersanddecomposerswithexamples.

(OR)

b) Explain strong and weak electrolytes? Give examples.

11. a) Definereverseosmosisandpredictitsadvantages.

(OR)

b) Compare temporary and permanent hardness of water.

12. a) Identify the differencesbetweenmetallicandelectrolytic conductors.

(OR)

b) Explain Faraday's Laws of electrolysis.

PART– C

Instructions:Answerthe followingquestions.   4 x5 =20 Marks

Each question carries five marks.

13. a) Find the Molarity and Normality of the two liters of solution containing 10.6 gramsof Na_2CO_3.

(OR)

   b) Find the temporary and permanent hardness of water containing the following salts per liter

      i. $Ca(HCO_3)_2$ =32.4 mg ii.$Mg(HCO_3)_2$=29.2mg iii.$CaSO_4$ =13.6mg iv.$MgCl_2$ =19 mg

14. a) Explain Lewis theory of acids and bases.

(OR)

   b) Explain the process of electrolysis of fused NaCl.

 15. a) Explain the Permutit process of softening of hard water with a neat labeleddiagram.

(OR)

   b) Identify and explain the disadvantages of using hard water in the following industries?

      i).Boilers ii) Laundry iii) Paper industry iv) Textile industry v) Pharmaceuticals

16. a).Explaintheprocessofelectrolyticrefiningofcopper.

(OR)

b)Find the weight of Al deposited on the cathode if 0.5 amperes of electric current is passed through $AlCl_3$ solution for1 hour.

EE-105 : ELECTRICAL ENGINEERING MATERIALS

UNIT - 1:Conducting Materials   Duration: 12 Periods (L: 09 – T:3)

Conducting Materials – Properties -Hardening, Annealing – Its effects- Low Resistive Materials –Requirements – Properties and applications of Copper and Aluminum - Comparison betweenCopper and Aluminum - ACSR Conductors, AAAC, - High Resistive Materials – Requirements-Properties and applications of Manganin, Eureka, Constantan, Nichrome, Tungsten, Mercury andCarbon.

UNIT – 2: Semiconducting Materials   Duration: 12 Periods (L:10 – T:2)

Semiconductors - Intrinsic and Extrinsic semiconductors- `P' and `N' type materials- DistinguishbetweenP-typeandN- typeSemi Conductors.

UNIT – 3: Insulating Materials   Duration: 15 Periods (L:13 – T:2)

Properties-Insulationresistance-FactorseffectingInsulationresistance-ClassificationofInsulating materials - Properties & Applications of Impregnated Paper, Wood,Asbestos, Mica,Ceramic, Glass- Thermo Plastics, Thermo Setting resins – PVC-Effects on PVC- Properties andApplicationsof InsulatingGases (HydrogenandSulphurHexa Fluoride).

UNIT – 4: Di-electric materialsDuration: 11 Periods (L:09 – T:2)

Permittivity of different Di - electric materials- Polarization - Dielectric Loss Applications ofDielectrics.

UNIT – 5: MagneticMaterialsDuration:10 Periods (L:08 – T:2)

Classification of magnetic materials - Soft & Hard magnetic materials- B-H Curves-Hysteresisloop-Hysteresisloss -Steinmetzconstant -EddyCurrentLoss --CuriePoint – Magnetostriction.

UNIT – 5: SpecialPurpose MaterialsDuration:15 Periods (L:13 – T:2)

NeedofProtectivematerials– ListofSpecialPurposeMaterials(Lead,Paints,SteelTapes)-Thermocouple-Bi-metals-Soldering-Fuses-GalvanizingandImpregnating.

Suggested Learning Outcomes

Upon completion of the course, the student shall be able to

C01 - Explain the properties of different conducting materials and their applications

1.1 DefineConducting Materials
1.2 Statethepropertiesofconducting materials
1.3 Definetheterms(a)Hardening(b)Annealing
1.4 ExplaintheeffectsofHardeningandAnnealingoncopperwithregardtoElectricaland Mechanical properties
1.5 StatethemainrequirementsofLowResistivity Materials
1.6 Listsomeexamplesofa) LowResistivityMaterialsb) HighResistivity materials
1.7 MentiontheProperties&ApplicationsofCopperand Aluminium
1.8 DistinguishbetweenCopperand Aluminum
1.9 Mentiontheproperties&applicationsof ACSRConductorsand AAAC.
1.10 StatetherequirementsofHighResistive Materials
1.11 StatethetypesofHighResistive Materials
1.12 Listthe properties&ApplicationsofHighResistive Materials
   (a)Manganin (b)Eureka (c)Constantan (d) Nichrome
   (e)Tungsten(f)Mercury (g)Carbon

C02 - Identify the semiconductor devices and its performance characteristics.

2.1 DefineSemiconducting materials.
2.2 ClassifySemiconducting materials.
2.3 Define(a) Intrinsic Semiconductorsand (b) Extrinsic Semiconductors.
2.4 DistinguishbetweenIntrinsicandExtrinsic semiconductors.
2.5 Explaintheformation of
     (a) P–type semiconductor and (b) N–type semiconductor
2.6 DistinguishbetweenPandN type Semiconductors

C03 - Mention the properties and applications of various insulation materials.

3.1 DefineInsulating Materials.
3.2 Drawenergyleveldiagrams ofconductors,insulatorsand semi-Conductors.
3.3 DistinguishbetweenConductors,Insulatorsand Semiconductors
3.4 Statetheimportantelectrical propertiesofInsulating materials
 (a)Insulationresistance(b)Volume(c)Surfaceresistance
3.5 Explainfactorsaffectinginsulation resistance
3.6 ClassifyInsulatingmaterialsonthe basisof temperaturei.e.,(Y,A,E,B,F,HandClass)
3.7 Classifyinsulating materials
3.8 State the properties and applications of
  (a) Impregnated paper(b) Wood (c)Asbestos(d)Mica(e)Ceramics(f)Glass.
3.9 ExplainThermoplastic&Thermosettingresinswith examples
3.10 Explainthe propertiesandapplicationsof PVC
3.11 Statethe effectsofthefollowingon P.V.C.

(a)Filler(b)Stabilizer(c)Plasticizer(d)Additives.
3.12 State the Properties and applications of the following gases
(a) Hydrogen(b) Sulphur –Hexafluoride(SF$_6$)

C04 - Describe Dielectric materials and their properties

4.1 KnowthePermittivityofcommonlyuseddi–electric materials
(a)Air(b)Bakelite (c)Glass(d)Mica (e) Paper(f) Porcelain (g)Transformer oil
4.2 Explain Polarization
4.3 ExplainDi-electric Loss
4.4 Listanyfourapplicationsof Di-electrics

C05 - Describe Magnetic materials and their properties
5.1 ClassifytheMagneticMaterials
(a) Ferro(b)Para(c)Dia-Magneticmaterialswith examples

5.2 Explain(a)Soft Magnetic materials(b)HardMagnetic materials
5.3 Draw(a)B-H. Curve(b)Hysteresisloop
5.4 ExplainHysteresis loop
5.5 ExplainHysteresislossandStateSteinmetzequation (No-Problems)
5.6 ExplainEddyCurrent Losses
5.7 StateCuriepoint
5.8 Define Magnetostriction

C06 - Distinguish the working function of Special purpose materials

6.1 Statetheneedforprotective materials
6.2 ListthevariousprotectivematerialslikeLead,Paints,SteelTapes etc.
6.3 Explainthethermocouple materials
6.4 Statethe Bi-metals
6.5 Statethesoldering materials
6.6 Definefuse
6.7 Statethedifferenttypesofmaterialsusedfor fuse
6.8 ExplaintheprocessofGalvanizingand Impregnation
6.9 Statethe useofenamelcoatedcopperwires(Thin,MediumandThick)

Suggested Student Activities

1. Visit the Institute's Library / internet center and list the books/journals/ e-books and any other resources available on the topics suggested by the teacher.
2. Prepare charts of various electrical materials and its Applications.

State Board of Technical Education and Training, Telangana
Model Question paper
DEEE I semester
Mid Semester-I Examination

Course Code: EE-105   **Duration:1 hour**
Course Name: Electrical Engineering Materials   **Max.Marks:20 Marks**

PART-A
Answer **all** questions, Each Question carries **ONE** mark   **4x1 = 4 Marks**
1. List the properties of conducting materials.
2. Define hardening and annealing.

3. Define intrinsic semiconductors.
4. What is meant by doping in semiconductor?

PART-B
Answer **TWO** questions. Each question carries **THREE** marks **2x3 = 6 Marks**
5(a). State the requirements of low resistivity materials and high resistivity materials.
(OR)
5(b). List the properties and applications of copper.
6(a). Draw a neat diagram of covalent bond of P-type semiconductor.
(OR)
6(b). compare intrinsic and extrinsic semiconducting materials.

PART-C
Answer **TWO** questions. Each question carries **FIVE** marks **2x5= 10 Marks**
7(a).   Mentiontheproperties&applicationsof ACSRConductorsand AAAC.
(OR)
7(b).   List the properties and applications of Mica.
8(a).   Compare N-type and P-type semiconductors.
(OR)
8(b)   Explain the formation of N-type semiconductor with a neat sketch.

Course Code: EE-105   **Duration:1 hour**
Course Name: Electrical Engineering Materials   **Max.Marks:20 Marks**

PART-A

Answer **ALL** questions, Each Question carries **ONE** mark   **4x1 = 4 Marks**

1. State the effects of additives on PVC

2. State the factors affecting insulation resistance.

3. Define di-electric loss.

4. Define polarization in dielectric materials.

PART-B

Answer **TWO** questions. Each question carries **THREE** marks.   **2x3 = 6 Marks**

5(a). State any three electrical properties of insulating materials
                    (OR)
5(b).State the effect of stabilizers and plasticizers additives on PVC.

6(a).List any three applications of di-electrics.
                    (OR)
6(b).State the permittivity of (a) air (b) paper

PART-C

Answer **TWO** questions. Each question carries **FIVE** marks   **2x5 = 10 Marks**

7(a). Explain thermoplastic and thermosetting resins with examples.
                    (OR)

7(b). State the properties and applications of (a) hydrogen and (b) sulphur hexafluoride.

8(a).Explain the process of polarization in dielectric material.

                    (OR)
8(b) State the permittivity of(a)Bakelite (b) Porcelain (c)Transformer oil

State Board of Technical Education and Training, Telangana
Model Question paper
DEEE I semester
I Semester End Examination

Course Code: EE-105   **Duration:2 hours**
Course Name: Electrical Engineering Materials   **Max.Marks:40 Marks**

PART-A

Answer **all** questions. Each Question carries one mark   **8x1 = 8 Marks**

1.List semiconducting materials with examples.

2. Statetheimportantelectrical propertiesofInsulating materials

3. StateCuriepoint

4. StatethemainrequirementsofLowResistivity Materials.

5. ClassifytheMagneticMaterials

6. Define Magnetostriction

7. State thedifferenttypesofmaterialsusedforfuse

8. StatetheBi-metals

PART-B

Answer **FOUR** questions. Each question carries **three** marks.   **4 x 3 = 12 Marks**

9(a). StatetherequirementsofHighResistive Materials and mention the Types.
(OR)
9(b).Compare (a)Ferro(b)Para(c)Dia-Magneticmaterialswith examples

10(a). Compare thermoplastic and thermosetting resins in five aspects.
(OR)
10(b). Statetheneedforprotective materials.

11(a). State any five properties of soft magnetic materials.
(OR)
11(b). StateSteinmetzequation

12(a). State the use of Enamelled coated copper wires.
(OR)
12(b). List different types ofsoldering materials

PART-C

Answer **FOUR** questions. Each Question carries **FIVE** marks   **4 x 5 = 20 Marks**

13(a)   ListtheapplicationsofPVC.
(OR)
13(b)   Illustrate hysteresis loop with a neat sketch .

14(a)   ClassifyInsulatingmaterialsonthe basisof temperature
(OR)
14(b)   Listthevariousprotectivematerials.

15(a)   Distinguish Hard and Soft magnetic materials .

(OR)

15(b) Explain B-H curve.

16(a) Explain the working of thermo Couple with diagram.

(OR)

16(b) Illustrate the process of Galvanisation and Impregnation.

EE-106 : BASIC ELECTRICAL ENGINEERING

Course Title:	**Basic Electrical Engineering**	Course Code	**EE-106**
Semester	**I Semester**	Course Group	**Core**
Teaching Scheme in Periods (L:T:P)	**60:15:0**	Credits	**2.5**
Methodology	**Lecture + Tutorials**	Total Contact Periods	**75**
CIE	**60 Marks**	SEE	**40 Marks**

Pre requisites

Knowledge of Basic Physics

Course Outcomes

Upon completion of the course, the student shall be able to

CO1	Explain various laws and resistive circuits.
CO2	Practice of electricity bill of domestic consumers
CO3	Explain the heating effects of Electric current and Analysing CFL&LED lamps
CO4	Analyse different terms related to Magnetic field.
CO5	Analyse different terms related to Electro- magnetic induction.
CO6	Analyse principles of Electrostatics

Blue Print of Marks for SEE

	Total	75	8		8	8	

Course Contents

UNIT - 1: Basic Principles of Electricity   Duration: 12 Periods (L: 09 – T:3)

Conductor, Insulator, Semiconductor- Electric Potential–Ohm's law–Resistance–Specific Resistance–Conductivity–Temperature coefficient of Resistance–Resistance in series, parallel and series-parallel combinations.

UNIT – 2: Work, Power, Energy   Duration: 12 Periods (L:10 – T:2)

Units of Work, Power and Energy.– Ratings of different Domestic Appliances- Conversion of Units–Efficiency-Electricity bill of Domestic Consumer.

UNIT-3: Heating Effects of Electric current   Duration: 15 Periods (L:12 – T:3)

Mechanical Equivalent of Heat - Heat produced due to flow of Current in Metal Filament lamps, Electrical Kettle, Electric Cooker, Electric Iron, Geyser- Merits and Demerits of CFL and LED lamps.

UNIT-4: Magnetic Effects of Electric current   Duration: 11 Periods (L:09 – T:2)

Coulombs laws- Permeability - Lines of force –Right hand Thumb rule - Field pattern due to longstraight current carrying conductor - Fleming's Left Handrule-Force between two parallel current carrying conductors –Solve problems - Magnetic circuit-Magnetizing force – Permeability - Flux - Reluctance - Comparison of Magnetic circuit WithElectriccircuit-Magnetic leakage flux andleakage Co-efficient.

UNIT - 5: ElectromagneticInduction   Duration: 15 Periods(L:12– T:3)

Faraday's laws-Dynamically and Statically induced E.M.F -Lenz' sLaw&Fleming's Right Hand rule -Selfand Mutual inductance - Co-efficient of coupling - Inductances in series - Energy stored in amagneticfield - Energystoredper unitvolume - Liftingpowerof magnet-problems

UNIT – 6: Electrostatics and CapacitanceDuration: 10 Periods (L:08 – T:2)
Coulomb'sLawsofElectrostatics–-Permittivity-Electrostaticinduction-Electrostatic field - Lines offorce -Comparison of Electrostatic and Magnetic lines of force - Strength of electric field- Fluxdensity-ConceptofElectricpotential and Potentialdifference–Di-electricstrength–Di-electricconstant–Capacitance.

4. http://electrical4u.com/

Suggested Learning Outcomes

Upon completion of the course, the student shall be able to

C01 - Explain various laws and resistive circuits.

1.1 List merits of Electrical Energy over other types of energy
1.2 Define Electric Current, Potential difference, Voltage and EMF
1.3 Distinguish between DC and AC quantities
1.4 State Ohm's Law and solve problems
1.5 List the limitations of Ohms Law
1.6 Define the terms i) Specific resistance ii) Conductance iii) Conductivity
1.7 Derive the relation R = (ρ L) / a and solve the problems
1.8 Explain the effects of temperature on resistance
1.9 Define temperature Co-efficient of resistance and give its unit
1.10 Develop the expressions for equivalent Resistance with simple SERIES and PARALLEL connections
1.11 Solve problems on equivalent resistance in case of Series-Parallel networks
1.12 State the concept of division of current when two Resistors are connected in parallel and solve the problems

C02 - Practice of electricity bill of domestic consumers

2.1 Define Electric Work, Power and Energy
2.2 State the formula for Electric Work, Power and Energy and mention S.I. System of units for Work, Power and Energy
2.3 Solve problems on Work, Power and Energy in Electrical, Mechanical and Thermal units
2.4 Calculate Electricity bill of domestic consumers as per the Electricity Tariff

C03 - Explain the heating effects of Electric current and analysing CFL & LED lamps

3.0 State the heat produced due to flow of current
3.1 Derive the expression for conversion of Electrical Energy into equivalent Heat energy in kilo calories (Joule's law)
3.2 Define Thermal efficiency
3.3 Solve problems on Electric heating
3.4 Explain the applications of heat produced due to Electric current
   (i) Metal Filament lamp (ii) Electric kettle (iii) Electric Cooker (iv) Electric Iron (v) Geyser
3.5 Mention the merits and demerits of CFL
3.6 Mention the merits and demerits of LED lamp

C04 - Analyse different terms related to magnetic field.

4.1 State Coulombs laws of Magnetism
4.2 Define the terms Absolute and Relative Permeability of medium and give relation between them
4.3 Explain the concept of lines of force & magnetic field
4.4 State Right hand Thumb rule
4.5 Draw the field patterns due to
   (i) Straight current carrying conductor (ii) Solenoid and (iii) Toroid

4.6 Explain the Mechanical force on a current carrying Conductor placed inside a Magnetic field.

4.7   Derive an expression for the magnitude of the force on a current carrying conductor inside a magnetic field.

4.8   State Fleming's Left Hand rule

4.9   Derive an expression for the force between two parallel current carryingconductors andsolveproblems

4.10   Understand the concept of the Magnetic circuit and Define the terms MMF, Flux andReluctance

4.11   CompareMagneticcircuitwith Electriccircuitindifferent aspects.

4.12   Explaintheeffectofair gapina magnetic circuit

4.13   Explainthetermsleakagefluxandleakage co-efficient

C05 - Analyse different terms related to Electro magnetic induction.

5.0   State Faraday's laws of Electro-Magnetic Induction

5.1   ExplainDynamicallyandStaticallyinduced E.M.Fs.

5.2   StateLenz's law

5.3   Explain Fleming's Right Hand rule

5.4   Explaintheconceptof SelfandMutual inductance

5.5   Derive anexpressionforSelfandMutual inductance

5.6   StateCo-efficientof coupling

5.7   Explain the total inductance in series connections (SeriesAidingandSeries Opposition)

5.8   Developanexpressionfor the energystoredinamagnetic fieldandsolve problems

5.9   Developanexpressionfortheenergystored perunitvolume inamagnetic field

5.10   Developanexpressionforliftingpowerofa magnetandsolveproblems

C06 - Analyse principles of Electrostatics

6.0   State Coulomb's laws of Electrostatics and solvetheproblems

6.1   Definethe following terms
(i) UnitCharge(ii)Absolutepermittivity   (iii)Relative permittivity(iv)ElectricFlux
(v) FluxDensity   (vi)Fieldintensity

6.2   CompareElectrostatic andMagneticcircuitsin different aspects.

6.3   Define theconceptofelectricpotentialandpotential difference

6.4   DefineDi-electricstrengthandDi-electric constant

6.5   GivethepermittivityofcommonlyusedDi-electric materials

6.6   DefineCapacitance andstatefactorsaffectingthecapacitanceof a capacitor

6.7   Derivetheformulaforcapacitanceofaparallelplate capacitor

6.8   Statedifferenttypesof capacitorswithits uses

6.9   Deriveanexpressionforequivalentcapacitance
a) When two Capacitors connected in series;
b) WhentwoCapacitorsconnectedin parallel

6.10   Deriveanexpressionforthe Energystoredina capacitorandsolveproblems

Suggested Student Activities

1.   Visit the Institute's Library / internet center and list the books/journals/ e-books and any other resources available on the topics suggested by the teacher.

2.   Prepare charts of various electrical materials and its Applications.

State Board of Technical Education and Training, Telangana
Model Question paper
DEEE I semester

Course Code: EE-106   **Duration:1 hour**
Course Name: Basic ElectricalEngineering   **Max.Marks:20 Marks**

PART-A
Answer **all** questions, Each Question carries **ONE** mark   **4x1 = 4 Marks**

1. State Ohm's law.
2. Compare series and parallel circuits in any three aspects.
3. Define electrical energy and mentions its S.I. unit.
4. Define work.

## PART-B
Answer **TWO** questions. Each question carries **THREE** marks **2x3 = 6 Marks**

5(a). Define specific resistance and state its SI units
(OR)
5(b). Derive an expression for division of current between resistances when
    two resistances are connected in parallel.
6(a). Define electrical power. Mention their electrical and mechanical units
(OR)
6(b). Write the relations between mechanical, electrical and thermal units of work

PART-C
Answer **TWO** questions. Each question carries **FIVE** marks **2x5= 10 Marks**

7(a). Find current when a battery of 60 V is connected between A and B.
(OR)
7(b). List the limitations of Ohm's law
8(a). Two bulbs 60 W, 200 V and 40 W, 200 V are connectedin series across 200 V DC
    supply. Calculate power absorbed by each lamp. If they are connected in parallel across
    200 V, what is the power absorbed by each?
(OR)
8(b). Calculate the monthly electricity bill for a month of 30 days, for thefollowing
    loads in a house.

   (a)Fourlampsof100Weachusedfor8hours/day

   (b)Twofans of 80 Weachusedfor10hours/day

   (c) 1000 Wiron box used for 1 hour /day The cost per unit is ₹ 3·00/-

State Board of Technical Education and Training, Telangana

Course Code: EE-106   **Duration:1 hour**
Course Name: Basic ElectricalEngineering   **Max.Marks:20**
Marks

PART-A

Answer **ALL** questions, Each Question carries **ONE** mark **4x1 = 4 Marks**

1. State how the heat is produced due to flow of electric current.
2. State Joule's law of electric heating
3. State Fleming's left hand rule.
4. Write about Reluctance and its units

PART-B

Answer **TWO** questions. Each question carries **THREE** marks. **2x3 = 6 Marks**

5(a). Write about Thermal Efficiency.

(OR)

5(b). Mentionthemeritsanddemeritsof CFL

6(a).Write about magnetic flux ,magnetic flux intensity with units.

(OR)

6(b).Comparemagneticcircuitwithelectriccircuit

PART-C

Answer **TWO** questions. Each question carries **FIVE** marks   **2x5 = 10 Marks**

7(a).   IllustratetheapplicationsofheatproducedduetoElectriccurrentin
          Metal filament Lamp.

(OR)

7(b).   Mention theapplicationsofheatproducedduetoElectriccurrentin Electric Iron.

8(a).   Derive an expression for force between two parallel current carrying conductors.

(OR)

8(b).   ExplaintheMechanicalforceonacurrentcarryingConductorplacedinside amagnetic
          field.

State Board of Technical Education and Training, Telangana

Model Question paper
DEEE I semester
I Semester End Examination

Course Code: EE-106   **Duration:2 hours**
Course Name: Basic ElectricalEngineering   **Max.Marks:40**
Marks

PART-A

Answer **all** questions. Each Question carries one mark   **8x1 = 8 Marks**

1. Define resistance, and mention its units.
2. List the heat producing appliances.
3. Define Absolute Permittivity
4. Define Fleming's left hand rule.
5. StateLenz'slaw
6. State the co-efficient of coupling
7. List the various types of capacitors
8. State Coulomb's laws of electrostatics

PART-B

Answer **FOUR** questions. Each question carries **three** marks.   **4 x 3 = 12 Marks**

9(a). Two resistors having resistances 6 Ω and 2 Ω are connected in series. What resistance must be
connected across 6 Ω resistor to give the total resistance of the circuit 4 Ω?

(OR)

9(b). Developtheconceptofselfandmutualinductance   .

10(a).Determine the reluctance of a cylindrical steel rod of length 120 mm and diameter 40 mm.

Take the relative permeability of the steel as 1000

(OR)

10(b). CompareElectrostatic andMagneticcircuitsin different aspects.

11(a). Derive an expression for energy stored in a magnetic field

(OR)

11(b). Two coils with a coefficient of coupling 0.6 between them are connected in series so as to magnetize

(i) in the same direction and (ii) in the opposite direction. The corresponding values of total inductances are 2.02 H and 0.53 H respectively. Determine the self-inductance of the two coils and the mutual inductance between them.

12(a). Three capacitors are having capacitances of 2 μF, 4 μF and 12 μF . Calculate equivalent
capacitance when they are connected in (i) series and (ii) parallel.

(OR)

12(b). The capacitance of a capacitor formed by two parallel metal sheets, each 200 cm^2 in area, separated by a dielectric 3 mm thick is 4×10–12 F. Determine relative permittivity of the dielectric.

PART-C

13(a)   Two bulbs rated 60 W at 220 V and 100 W at 220 V are connected in series across a 220 V DC supply. Calculate the power absorbed by each lamp. If the above two bulbs are connected in parallel across the 220V DC Supply, What is the Power absorbed by each lamp.

(OR)

13(b)   A coil has 400 turns. Find the induced e.m.f. in it, if the flux changes from 0·2 mWb to 1 mWb in 0·2 second.

14(a)   Draw the parts of electric iron with a neat sketch.

(OR)

14(b)   Derive the equivalent capacitance when two capacitors are connected in series.

15(a)   Explain dynamically induced emf

(OR)

15(b)   A flux of 0·4 mWb is produced by a current of 10A flowing through a 200 turns coil corresponding to the complete reversed of the current in 0·02 second. Also find the magnitude of the emf induced.

16(a)   Derive an expression for energy stored in a capacitor.

(OR)

16(b)   Two capacitors having capacitances of 4 F and 6 F are connected in series across 120 V DC supply. Calculate (i) total capacitance, (ii) charge on each capacitor and (iii) potential difference across each capacitor.

ME-107 : ENGINEERING DRAWING - I

(This Course is Common to all programs of Diploma in Engineering offered by the State
Board of Technical Education, Hyderabad, Telangana State)

Course Title :	**Engineering Drawing - I**	Course Code	**ME-107**
Semester	**I**	Course Group	**Practical**
Teaching Scheme in Periods (L:P)	**1:0:2**	Credits	**1.25**
Methodology	**Lecture + Practice**	Total Contact Periods:	**45**
CIE	**60Marks**	SEE	**40Marks**

Prerequisites: No prerequisites are required to learn this course.

Course Objectives

  The Course is aimed at developing basic drawing skills so as to enable them to use these skills in the preparation of engineering drawings, their reading and interpretation.

Course Outcomes

  Upon completion of the subject the student shall be able to

CO1	Recognize the importance of Engineering Drawing and usage of the drawing instruments.
CO2	Practice freehand lettering & numbering in different styles.
CO3	Use of different methods of dimensioning systems in Engineering Drawing.
CO4	Construct engineering curves such as parabola, hyperbola, ellipse, involute, cycloid, helix and their tangent lines.
CO5	Apply knowledge of orthographic projection principles to accurately represent the projection of points, lines, and planes onto different planes.
CO6	Explain the principles and conventions of orthographic projection, including the use of multiple views to fully describe an object.

BLUEPRINTFORMARKSINSEE

NOTE:
1. B.I.S Specification should invariably be followed in all the topics.
2. A-3 Size Drawing Sheets are to be used for all Drawing Practice Exercises.

1.0 The importance of Engineering Drawing and Engineering Instruments
(03periods)

Explanation of the scope and objectives of the subject of Engineering Drawing – Its importance as a graphic communication – Need for preparing drawing as per standards –SP-46–1988–Mention B.I.S-Role of drawing in Engineering education–Link between Engineering drawing and other subjects of study.

Engineering drawing Instruments
Classifications: Basic Tools, tools for drawing straight lines, tools for curved lines, tools for measuring distances and special tools like mini drafter & drafting machine – Mentioning of names under each classification and their brief description -Scales: Recommended scales reduced & enlarged -Lines: Types of lines, selection of line thickness - Selection of Pencils -Sheet Sizes: A0, A1, A2, A3, A4, A5, Layout of drawing sheets in respect of A0, A1, A3 sizes, Sizes of the Title block and its contents, Care and maintenance of Drawing Sheet, Drawing plate: Layout of sheet–as perSP-46-1988to a suitable scale.

2.0 Freehand lettering & numbering   (03periods)

Importance of lettering –Types of lettering – Guide Lines for Lettering
Practicing of letters & numbers of given sizes (7mm, 10mm and 14mm)
Advantages of single stroke or simple style of lettering – Use of lettering stencils

3.0 Dimensioning practice   (03periods)

Purpose of Engineering Drawing, Need of B.I.S code in dimensioning –Shape description of an Engineering object -Definition of Dimensioning size description -Location of features, surface finish, fully dimensioned Drawing -Notations or tools of dimensioning, dimension line extension line, leader line, arrows, symbols, number and notes, rules to be observed in the use of above tools -Placing dimensions: Aligned system and unidirectional system (SP-46-1988)-Arrangement of dimensions Chain, parallel, combined progressive, and dimensioning by co-ordinate methods-The rules for dimensioning standard, features: Circles (holes) arcs, angles, tapers, chamfers, and dimension of narrow spaces.

4.0 Geometric Construction   (12periods)

Division of a line: to divide a straight line into given number of equal parts internally examples in engineering application. Construction of tangent lines: to draw tangent lines touching circles internally and externally.
Construction of tangent arcs

a)   To draw tangent arc of given radius to touch two lines inclined at given angle (acute, right and obtuse angles).
b)   Tangent arc of given radius touching a circle or an arc and a given line.
c)   Tangent arcs of radius R, touching two given circles internally and externally.

Construction of polygon: construction of any regular polygon of given side length using general method.

Conical Curves: Explanation of Ellipse, Parabola, Hyperbola, as sections of a double cone and a loci of a moving point, Eccentricity of above curves – Their Engg. Application viz. Projec tiles, reflectors, P-VDiagram of a hyper bolic process.

Conical Curves: Construction of any conic section of given eccentricity by general method. Construction of ellipse by concentric circles method. Construction of parabola by rectangle method.

Construction of rectangular hyperbola.

Special Curves: Involute, Cycloid and Helix, explanations as locus of a moving point, their engineering application, viz, Gear tooth profile, screw threads, springs etc.-their construction

5.0   Projection of points, lines and planes   (09periods)

Projecting a point on two planes of projection -Projecting a point on three planes of projection-Projection of straight line.
a)   Parallel to both the planes.
b)   Perpendicular to one of the planes.
c)   Inclined to one plane and parallel to other planes. Projection of regular planes.
a)   Plane perpendicular to HP and parallel to VP and vice versa.
b)   Plane perpendicular to HP and inclined to VP and vice versa.

6.0   Orthographic Projections   (15 periods)

Meaning of orthographic projection -Using a viewing box and a model – Number of views obtained on the six faces of the box - Legible sketches of 3 views for describing object -Concept of front view, top view, and side view for sketching these views of engineering objects- Explanation of first angle projection.– Positioning of three views in First angle projection-Projection of points as a means of locating the corners of the surfaces of an object – Use of miter line in drawing a third view whenothertwoviewsaregiven-Methodofrepresentinghiddenlines-Selectionofminimumnumberof views to describe full object.

Suggested Learning Outcomes

Upon completion of the subject, the student shall be able to

1.0   Understand the basic concepts of engineering drawing
- **1.1**   State the importance of drawing as an engineering communication medium
- **1.2**   State the necessity of B.I.S. Code of practice for Engineering Drawing.
- **1.3**   Explain the linkages between Engineering drawing and other subjects of study in diploma course.

Use of Engineering Drawing Instruments
- 1. 4   Select the correct instruments and draw lines of different orientation.
- 1.5   Select the correct instruments and draw small and large Circles.
- 1.6   Select the correct instruments for measuring distances on the drawing.
- 1.7   Use correct grade of pencil for different types of lines, thickness and given function.
- 1.8   Select and use appropriate scales for a given application.
- 1.9   Identify different drawing sheet sizes as per I.S. and Standard Lay-outs.
- 1.10   Prepare Title block as per B.I.S. Specifications.

2.0   Write FreeHand Lettering and Numbers
- **2.1**   Write titles using sloping lettering and numerals of 7mm, 10mm and 14mmheight
- **2.2**   Write titles using vertical lettering and numerals of 7mm, 10mm and 14mmheight
- **2.3**   Select suitable sizes of lettering for different layouts and applications
- **2.4**   Practice the use of lettering stencils.

3.0   Understand Dimensioning Practice
- **3.1**   Define "Dimensioning.
- **3.2**   State the need of dimensioning of drawing according to accepted standard.
- **3.3**   Identify notations of Dimensioning used in dimensioned drawing.
- **3.4**   Identify the system of placement of dimensions in the given dimensioned drawing.
- **3.5**   Dimension a given drawing using standard notations and desired system of dimensioning.
- **3.6**   Dimensioning standard features applying necessary rules.
- **3.7**   Arrange dimensions in a desired method given in a drawing.
- **3.8**   Identify the departures if any made in the given dimensioned drawing with reference to SP-46-1988, and dimension the same correctly.

4.0   Apply Principles of Geometric Constructions
   4.1   Divide a given line into desired number of equal parts internally.
   4.2   Draw tangent lines and arcs.
   4.3   Use General method to construct any polygon.
   4.4   Explain the importance of conics.
   4.5   Construct conics (ellipse, parabola and hyperbola) by general method.
   4.6   Construct ellipse by concentric circles method.
   4.7   Construct parabola by rectangle method.
   4.8   Construct rectangular hyperbola from the given data.
   4.9   Construct in volute from the given data.
   4.10   Construct cycloid and helix from the given data.
   4.11   State the applications of the above constructions in engineering practice.

5.0   Apply Principles of Projection of points, lines and planes (06Hours)
   5.1   Visualize the objects
   5.2   Explain the I-angle and III-angle projections
   5.3   Practice the I-angle projections
   5.4   Draw the projection of a point with respect to reference planes (HP&VP)
   5.5   Draw the projections of straight lines with respect to two reference
            Planes (upto lines parallel to one plane and inclined to other plane)
   5.6   Draw the projections of planes (up to planes perpendicular to one plane and
            inclined to other plane)

6.0   Apply principles of orthographic projection
   6.1   Explain the principles of orthographic projection with simple sketches.
   6.2   Draw the orthographic view of an object from its pictorial drawing.
   6.3   Draw the minimum number of views needed to represent complete
            engineering component.

COURSEOUTCOMES (CO)

Upon successful completion of the course, the students will be able to

	Course Outcome	Cognizant Level	Linked Program Objectives (PO)
CO1	Recognize the importance of Engineering Drawing and usage of the drawing instruments.	**R**	**1, 4, 7**
CO2	Practice free hand lettering & numbering in different styles.	**R/U**	**1, 3, 4, 7**
CO3	Use of different methods of dimensioning systems in Engineering Drawing.	**R/U**	**1,3, 4, 7**

CO4	Construct engineering curves such as parabola, hyperbola, ellipse, involute, cycloid, helix and their tangent lines.	R/U/A	1, 2, 3, 4, 7
CO5	Apply knowledge of orthographic projection principles to accurately represent the projection of points, lines, and planes onto different planes.	R/U/A	1, 2, 3, 4,6, 7
CO6	Explain the principles and conventions of orthographic projection, including the use of multiple views to fully describe an object.	R/U/A	1, 2, 3, 4, 7

EE-108 : ELECTRICAL WORKSHOP PRACTICE

Course Title:	**Electrical Workshop Practice**	Course Code	**EE-108**
Semester	**I Semester**	Course Group	**Practical**
Teaching Scheme in Periods (L:T:P)	**15:0:30**	Credits	**1.25**
Methodology	**Lecture + Practical**	Total Contact Periods	**45**
CIE	**60 Marks**	SEE	**40 Marks**

Pre requisites

This course requires the knowledge of basic electricity

Course Outcomes

Upon completion of the course, the students will have the ability to:

	Course Outcome	CL	Linked PO	Teaching Hours
CO1	Identify Tools, Accessories and Perform various joints	R/U/A	1,2,4	09
CO2	Demonstrate various Electrical Wiring Circuits	U/A	3,4	21
CO3	Identify various Soldering Equipment and Perform Soldering	R/U/A	1,3,4,5	9
C04	Build new circuits based on requirement	A	3,6,	6

Suggested Learning Outcomes

C01 -   Identify Tools, Accessories and Perform various joints

1.1 Identify the following electrical wiring tools.

        a) Screw drivers   b) Pliers

        c) Drilling machines & Drilling Bits.   d) Rawl plug jumper

        e) Voltage/line tester   f) Splicers (insulation remover)

        g) Standard Wire gauge

1.2 Identify different types of Electrical Wiring accessories.

        a) Switches   b) Ceiling roses

        c) Lamp holders and adapters   d) Sockets

        e) Plug top

1.3 Identify different types of main switches like

DP mains, 2-pole Isolators, 3-pole isolators, 4-pole isolators, DPDT , TPDT, Change over Switches.

1.4 Identify fuse, 1-pole, 2-pole and 3-pole MCB's, ELCBs and RCCBs

1.5 Identify various types of wires and cables with respect to sizes, rating, purpose and use etc.

1.6 Make straight joint/ married joint

1.7 Make T joint

1.8 Make Western union joint

1.9 Make pigtail joint

C02 -   Demonstrate various Electrical Wiring Circuits

2.1 Make a circuit for two lamps controlled by two switches and Switch controlled 2/3 pin socket with

PVC surface conduit system.

2.2 Make a circuit for stair case wiring.

2.3 Make a circuit for godown wiring.

2.4 Make a circuit for electrical bell connection.

2.5 Make a circuit for ceiling fan with regulator

2.6 Make a connection for Fluorescent Lamp with Choke and Starter

C03 -   Identify various Soldering Equipment and Perform Soldering

3.1 Identify and handle various soldering tools and components

3.2 Practice soldering on PCB.

C04 -   Build Simple circuits based on requirement.

4.1 Construct simple circuits on PCB using Electronic Components

Note :
1.   All experiments to be done on PVC surface conduit.
2.   PVC casing capping may be demonstrated for any one of the exercises.

Model Question paper
DEEE I Semester
Mid Semester-I Examination

Course Code: EE-108   **Duration: 1 Hour**
Course Name: Electrical Workshop Practice   **Max.Marks: 20**

Note: *Answer allotted Question.*

1. Perform married jointing of given wires.

2. Make T joint of given wires

3. Perform Western union jointing of given wires

4. Make pigtail joint of given wires

5. Perform installation of a wiring circuit for one lamp controlled by one switch with PVC surface conduit system.

6. Perform installation of a wiring circuit a circuit for two lamps controlled by two switches with PVC surface conduit system.

Course Code: EE-108   **Duration: 1 Hour**
Course Name: Electrical Workshop Practice   **Max. Marks: 20**

Note: *Answer allotted Question.*

1. Connect a circuit for one lamp controlled by one switch and provision of 2/3pin socket.

2. Perform installation of a circuit for stair case wiring.

3. Connect a circuit for godown wiring.

4. Connect a circuit for electrical bell connection.

5. Perform installation a circuit for ceiling fan with regulator.

Course Code: EE-108   **Duration: 2 Hour**
Course Name: Electrical Workshop Practice   **Max. Marks: 40**

Note: *Answer allotted Question.*

1. Perform married jointing of given wires.

2. Make T joint of given wires

3. Perform Western union jointing of given wires

4. Make pigtail joint of given wires

5. Perform installation of a wiring circuit for one lamp controlled by one switch with PVC surface conduit system.

6. Perform installation of a wiring circuit a circuit for two lamps controlled by two switches with PVC surface conduit system.

7. Connect a circuit for one lamp controlled by one switch and provision of 2/3pin socket.

8. Perform installation of a circuit for stair case wiring.

9. Connect a circuit for Godown wiring.

10. Connect a circuit for electrical bell connection.

11. Perform installation a circuit for ceiling fan with regulator.

12. Perform soldering wherever it is required in a given electronic device.

13. Perform soldering on PCB.

Course Title	Basic Science Lab	Course Code	SC-109
Semester	I Semester	Course Group	Practical
Teaching Scheme in Periods (L:T:P)	**15:0:30**	Credits	1.25
Type of course	Lecture + Practical	Total Contact Periods	45 Periods
CIE	60 Marks	SEE	40 Marks

SC-109 (A) :PHYSICS LAB

Pre requisites:

This course requires the basic knowledge of Science and Mathematics.

Course Outcomes

On completion of the course, the student shall be able to

CO1	Demonstrate the principle of Screw Gauge and calculate accurate measurement of thickness of glass plate and area of cross section of a wire.
CO2	Make use of laws of vector addition to verify Parallelogram law of forces and Triangle law of forces.
CO3	Determine the coefficient of friction between wood and wood and wood and glass surfaces on horizontal plane.
CO4	Calculate coefficient of viscosity of a liquid by capillary method.
CO5	Make use of Quill tube to verify Boyle's law.
CO6	Calculate the surface tension of water using capillary rise method. (Demonstration only)

CO	Basic and Discipline Specific Knowledge PO1	Problem Analysis PO2	Design/Development of Solutions PO3	Engineering Tools, Experimentation and Testing PO4	Engineering Practices for Society, Sustainability and Environment PO5	Project Management PO6	Lifelong Learning PO 7	Linked PO

CO2	3					1	1	1,6,7
CO3	3					1	3	1,6,7
CO4	3					1	3	1,6,7
CO5	3					1	3	1,6,7

Learning outcomes

On successful completion of the course, the student will have ability to:

1. Demonstrate the principle of Screw Gauge and calculate accurate measurement of thickness of glass plate and area of cross section of a wire.
2. Make use of laws of vector addition to verify Parallelogram law of forces and Triangle law of forces.
3. Determine the coefficient of friction between wood and wood and wood and glass on horizontal plane.
4. Calculate coefficient of viscosity of a liquid by capillary method.
5. Make use of Quill tube to verify Boyle's law.

Demonstration Experiment:

1. Calculate the surface tension of water using capillary rise method.

Course Delivery:

The course will be delivered through lectures, class room interaction, group discussions, graded exercises, demonstration and practice.

Tutorial: 1Period /Experiment:

1. Introduction to Physics practical and its importance, safety precautions in maintenance of equipment in the laboratory.
2. Maintenance of apparatus and equipment.
3. Follow of Do's and Don'ts.

4. Maintenance of data in manual and record book.
5. Write the procedure of the experiment before the commencement of each experiment.
6. Strictly following of instructions given from time to time by the lecturer-in-charge.
7. Demonstration of each experiment by the lecturer in charge.

Conduction of experiments: 2 periods/Experiment.

Student must perform experiment individually under the supervision of the lecturer-in charge.

SC-109 (B):CHEMISTRY LAB

Prerequisite: Knowledge of basic concepts of Chemistry of secondary education

Course Objectives: To provide practical knowledge about the basics of preparation of chemical solutions and volumetric analysis of chemical compounds.

Course Outcomes: On successful completion of the course, the student will have ability to attain CO:

CourseOutcome	
CO1	Prepare the primarystandard solution to find out the concentrations of unknown solution.
CO2	Estimate the amount of the HCl in the given sample of solutions by volumetric analysis.
CO3	Estimate the amount of the NaOH in the given sample of solutions by volumetric analysis.
CO4	Find the pH of the unknown solutions collected from different industrial areas and recommend a remedial action.
CO5	Determine the hardness of water sample and recommend a solution for identified hardness

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3	-	-	1	-	1	1
CO2	3	-	-	-	-	1	1
CO3	3	-	-	-	-	1	1
CO4	3	-	-	2	2	1	1
CO5	3	-	-	-	2	1	1

Course Delivery:

The course will be delivered through lectures, classroom interactions, group discussions, demonstrations and practicals.

Conduction of experiments: Lecture 1period+Experiment 2periods.

Student must conduct experiment individually under the supervision of the staff -in-charge.

Lecture and Demonstration:1Period

1. Introduction of chemistry practical and its importance, safety precautions in maintenance of cleanliness and orderliness of chemicals in the laboratory.
2. Maintenance of apparatus and equipment.

3. Follow of Do's and Don'ts.
4. Maintenance of data in record book.
5. Write the procedure of the experiment before the commencement of each experiment.
6. Strict following of instructions given from time to time by the staff-in-charge.
7. Demonstration of each experiment by the staff in charge.

Course Content

Volumetric Analysis: (22.5 Periods)

Volumetric Analysis by Titrimetric Method:

Volumetric Analysis -Titration – Standard Solutions - Concentration of solutions -Indicators - Acid base indicators - Selection of indicators – Endpoint of titration-Neutralization- Harness of water

List of experiments:

1. Preparation of primary standard solution.
2. Estimation of hydrochloric acid by using standard basic solution
3. Estimation of sodium hydroxide by using standard acidic solution.
4. Standardisation of disodium salt of EDTA using standard magnesium sulphate solution.
5. Determination of total hardness of water sample by EDTA method.

Specific Learning Outcomes

Upon completion of the course, the student will have ability to

1. Prepare standard sodium carbonate solution and dilute to desired concentration.
2. Estimate hydrochloric acid present given volume of solution by using standard sodium carbonate solution.
3. Estimate sodium hydroxide present in the given volume of solution by using standard hydrochloric acid solution.
4. Standardisation of disodium salt of EDTA using standard magnesium sulphate solution.
5. Determine the total hardness of watersamplebyusing0.02N disodium salt of EDTA solution.

Reference Books:

1. Vogel's Inorganic Qualitative and Quantitative Analysis.
2. Practical chemistry by O.P. Pande & others.
3. Intermediate Chemistry Lab manual-Telugu academy (Telangana state)

Total		**20**

TIME: 1 Hour   **TOTAL MARKS: 20**

Instructions: (1) Answer both PART-A AND PART-B on **separate** answer sheets.

   (2) Each question carries **TEN** marks.

PART-A (PHYSICS LAB)

Perform ONE experiment allotted by the examiner.   1 x 10 = 10

1. Determine the thickness of given glass plate using Screw gauge.
2. Find the cross sectional area of given wire using Screw gauge.
3. Verify parallelogram law of forces.
4. Verify triangle law of forces.

PART-B (CHEMISTRY LAB)

Perform ONE experiment allotted by the examiner.   1 x 10 = 10

1. Prepare250mlof0.05Msodiumcarbonatesolution.
2. Estimatetheamountofhydrochloricacidpresentin500mlofthe given solutionusing0.02M sodium carbonate solution.
3. Estimatetheamountofhydrochloricacidpresentin250mlofthegivensolutionusing0.05M sodium carbonate solution.

TIME: 1 Hour   **TOTAL MARKS: 20**

Instructions: (1) Answer both PART-A AND PART-B on <u>**separate**</u> answer sheets.

 (2) Each question carries **TEN** marks.

PART-A (PHYSICS LAB)

Perform ONE experiment allotted by the examiner.   1 x 10 = 10

1. Determine the coefficient of friction betweenwooden surface and wooden block.
2. Determine the coefficient of friction between glass surfaces and wooden block.
3. Determine coefficient of viscosity of water using capillary method.

PART-B (CHEMISTRY LAB)

Perform ONE experiment allotted by the examiner.   1 x 10 = 10

1. Estimate the amount of NaOH present in500 ml solutionusing0.02MHCl solution
2. Estimate the amount of NaOH present in 750ml solution using 0.02M HCl solution
3. Find out the Normality of EDTA solution using 0.02N $MgSO_4$ solution

BOARD DIPLOMA EXAMINATION, (C-24)
SEMESTER END EXAMINATION
FIRST SEMESTER EXAMINATION
SC-109 - BASIC SCIENCE LAB

Time: 2 Hours]   [Total Marks: 40

Instructions: (1) Answer both PART-A AND PART-B on **separate** answer sheets.
           (2) Each question carries **TWENTY** marks.

PART-A (PHYSICS LAB)

Perform ONE experiment allotted by the examiner.   1 x 20 = 20

1. Determine the thickness of given glass plate using Screw gauge.
2. Find the cross sectional area of given wire using Screw gauge.
3. Verify parallelogram law of forces.
4. Verify triangle law of forces.
5. Determine the coefficient of friction between wooden surface and wooden block.
6. Determine the coefficient of friction between glass surfaces and wooden block.
7. Determine coefficient of viscosity of water using capillary method.
8. Verify Boyle's law using Quill tube.

PART-B (CHEMISTRY LAB)

Perform ONE experiment allotted by the examiner.   1 x 20 = 20

1. Prepare250mlof0.05Msodiumcarbonatesolution.

2. Estimatetheamountofhydrochloricacidpresentin500mlofthegivensolutionusing 0.02M sodium carbonate solution.

3. FindtheMolarityandestimatetheamountofNaOHpresentin100mlofthegivensolution using0.01M HCl solution.

4. Find out the Normality of EDTA solution using 0.02N $MgSO_4$ solution

5. Determinethe total hardness ofthegiven watersampleusing0.02N EDTA solution.

CS-110 : COMPUTER FUNDAMENTALS LAB

Course Title:	**Computer Fundamentals Lab**	Course Code	**CS-110**
Semester	**I Semester**	Course Group	**Practical**
Teaching Scheme in Periods (L:T:P)	**1:0:2**	Credits	**1.25**
Methodology	**Lecture+Tutorials**	Total Contact Periods	**45**
CIE	**60 Marks**	SEE	**40 Marks**

Pre-requisite: The students should have basic knowledge of English

Pre-requisite: The students should have basic knowledge of using computer

COURSE OUTCOME

CO1	Creating and saving a document, Formatting of text in MS-WORD
CO2	Spell checking, Mail merging and Printing of Documents in MS-WORD
CO3	Creating and Saving a presentation, inserting text and pictures & Formatting the text and pictures, Slide transition and Animation effects in MS-POWER POINT
C04	Building Worksheet & Charts InMs-Excel and Printing Of Worksheet
C05	Creating Database, Tables, Forms, Queries, Reports InMs-Access

Course Contents

Unit-I:Creating, Saving a document, Formatting of text in MS-WORD   Duration: 5 hrs

MS_WORD - Creating and saving a document, Formatting of text

Unit-II: Spell checking, Mail merging and Printing of Documents in MS-WORD **MS Word**
Duration: 10 hrs

MS-WORD - Spell Checking - Mail merging - Printingof Documents

Unit-III: Creating and saving a presentation in MS Powerpoint and Slide transition and Animation effects   Duration: 10 hrs

MS-POWER POINT - Creating and saving a presentation - Inserting text and pictures - Formatting the text and pictures- MS-POWER POINT - Effects of slide transition - Animation effects - Slide show & views of slides

Unit-IV   Building & Charts in MS-Excel and Printing Of Worksheet

	Duration: 10 hrs

Building Worksheets – Building Charts, Printing EXCEL Worksheet

Unit-V Creating Database, Tables, Queries, Forms ,Reports& Printing	
	Duration: 10 hrs

Creating Table, Viewing(ACCESS) – Creating Forms – Creating Queries and Viewing Database
Creating of ACCESS Reports – Printing of ACCESS Tables, Forms, Reports

Specific Learning Outcomes:

1.0 Practice Operation of MS-Word.
- 1.1   Demonstrate starting MS word.
- 1.2   Identify the word screen elements.
- 1.3   Identify the tool bars on the screen.
- 1.4   Demonstrate loading different tool bars for their functionality.
- 1.5   Identify the drop down menus of the main menu and their functionality.
- 1.6   Demonstrate creating a sample text.
- 1.7   Demonstrate text formatting.
- 1.8   Demonstrate page formatting.
- 1.9   Demonstrate selecting, deselecting the text from menu and Copying.
- 1.10   Demonstrate importing text from other packages.

2.0 Spell checking, Mail merging and Printing of Documents in MS-WORD
- 2.1   Demonstrate search and replace of text.
- 2.2   Demonstrate spell checking.
- 2.3   Demonstrate creating tables.
- 2.4   Demonstrate mail merging of documents.
- 2.5   Demonstrate printing documents, merge printing of documents.
- 2.6   Demonstrate word procedure for importing figures, charts from other installed software.

3.0 Practice operation of MS-Power Point and Slide transition and Animation effects.
- **3.1**   Demonstrate starting MS Power Point.
- 3.2   Identify the opening screen elements.
- 3.3   Identify the tool bars in the opening screen.
- 3.4   Demonstrate the selection of the methods of creating a new presentation.
- 3.5   Identify the different Auto Layouts of a slide.
- 3.6   Demonstrate creating a new slide
- 3.7   Demonstrate inserting a new slide.
- 3.8   Demonstrate slide transition effects.
- 3.9   Demonstrate a slide show.

3.10   Demonstrate animation effects.

3.11   Demonstrate creating an organization chart.

3.12   Identify the different slide views.

4.0 Building Worksheets & Charts in MS-Excel

4.1   Start EXCEL from the start

4.2   Identify the various parts of the window.

4.3   Identify the tabs and groups in ribbon layout

4.4   Identify and customizing the quick access toolbar

4.5   Identify the office button and commands of the drop down menu.

4.6   Practice loading of the existing worksheet or create a new worksheet.

4.7   Practice entering into the worksheet.

4.8   Practice formatting the cells.

4.9   Practice formatting the texts in the cells.

4.10   Practice changing the height and width of the cells.

4.11   Practice freezing the rows, columns.

4.12   Practice splitting the screens.

4.13   Enter formulas into the cells.

4.14   Enter formulas with built in functions.

4.15   Create a range name for the cells for group operations.

4.16   Create graph for the data in the worksheet.

5.0   Creating Database, Tables, Queries and Forms

5.1   Practice loading Ms Access from the start menu.

5.2   Create a database table using Database Wizard.

5.3   Enter data into the table.

5.4   Edit data in the table.

5.5   View data from the database.

5.6   Design a query.

5.7   View data using the query.

5.8   Demonstrate creating Forms.

5.9   View the database through Forms.

5.10   Practice navigating through the database through Forms.

5.11   Practice creating Custom Form using Forms Wizard.

5.12   Practice creating Reports using the Report Wizard.

5.13   Practice printing the tables, forms and reports.

1. Create and save a document using MS WORD.
2. Format the Text document.
3. Change the page set-up and Insert Header/Footer.
4. Spell checking in the document.
5. Print the document.
6. Create main document and data file for mail merging.
7. Print the document with mail merging.
8. Create a table in the document.
9. Add row, column to a table.
10. Create and save a new presentation using MS Power Point.
11. Choose Auto Layout for a new slide.
12. Inserting text and pictures into a blank slide.
13. Inserting new slides into the presentation.
14. Applying slide transition effects.
15. Demonstrate a slide show.
16. Set animation to text and pictures in a slide.
17. Set the sounds, order and timing for animation.
18. Create and save a new work book in Excel
19. Operating Mouse to selecting tabs, groups, cells, group of cells
20. Entering and editing Data into Worksheet
21. Formatting the text in the cells
22. Formatting the numbers in the cells.
23. Changing the height and width of cells.
24. Freezing Titles, splitting screen
25. Enter formulae for calculation in the cells.
26. Copying the formula over a range of cells.
27. Inserting built-in functions in to the cells.
28. Create graphs for the data using Chart Wizard.
29. Practice Data Forms in Excel.
30. Printing of worksheet
31. Creating Tables using wizard in Access
32. Creating Tables using Design View in Access.
33. Entering Data into tables
34. Viewing the data in table.
35. Creating a new query using wizard.
36. Creating a new query using design view.
37. Viewing the data using a Select Query.
38. Updating the data in table using Update Query.
39. Linking two Tables on Relational Aspect.

40. Create forms using Form Wizard.
41. Create reports using Report Wizard.
42. Printing the tables, forms and reports

Suggested Student Activities

1. Student visits Library to refer to Manual for the specifications
2. Student inspects the available equipment in the Lab to identify the components
3. Visit nearby Industry to familiarize with fabrication techniques
4. Analyze the connections in the UPS available in the Institution facility
5. Quiz , Group discussion, Surprise test

RECOMMENDED BOOKS:

1. Teach yourself Office 2007 for Windows – Coray Sandler, Tom Badgett, Jan Weingarten, BPB Publications.
2. The ABC s of MS Office 2007– Guy Hard-Davis, BPB Publications.
3. Working in MS Office - Ran Mansfield, Tata McGraw Hill Publications.

STATE BOARD OF TECHNICAL EDUCATION & TRAINING:TS, HYDERABD
CS-110 Computer Fundamentals Lab
I-SEMESTER, MID -I MODEL PAPER

TIME: 1 hr   MARKS: 20
ANSWER ANY ONE QUESTION.
EACH QUESTION CARRIES TWENTY MARKS. 20 x 1 = 20

1. Demonstrate Starting MS word and identify the word screen elements.
2. Draw and explain the groups and commands in Home tab under ribbon in Ms word.
3. Demonstrate text formatting in Ms word.
4. Demonstrate procedure for checking of spelling and grammar using dictionaries.
5. Demonstrate paragraph formatting in Ms word.
6. Draw and explain the groups and commands in page layout tab under ribbon in Ms word.
7. Demonstrate page formatting in Ms word.
8. Demonstrate procedure for creating Mail merging process in Ms word.
9. Demonstrate creating of table and adding rows and columns to the existing table in Ms word.
10. Demonstrate finding and replacing of text & searching for a bookmark.
11. Demonstrate starting of MS Power Point and identify the opening screen elements.
12. Draw and explain the groups and commands in Home tab under ribbon in MS Power Point.
13. Demonstrate different Auto Layouts of a Slide in MS Power Point.
14. Demonstrate Slide Transition effects in Ms Power Point.
15. Demonstrate different Animation effects in Ms Power Point.
16. Draw and explain the groups and commands in Animations tab under ribbon in MS Power Point.
17. Demonstrate different Slide views in MS Power Point.
18. Draw and explain the groups and commands in Review tab under ribbon in MS Power Point.
19. Demonstrate inserting and formatting of text and pictures in MS Power Point.

MODEL QUESTION PAPERS
STATE BOARD OF TECHNICAL EDUCATION & TRAINING:TS, HYDERABD
CS-110 Computer Fundamentals Lab
I -SEMESTER, MID -II MODEL PAPER

TIME: 1 hr   MARKS: 20

ANSWER ANY ONE QUESTION.

EACH QUESTION CARRIES TWENTY MARKS. 20 x 1 = 20

1. Write procedure to open Excel window and Draw and label the parts in Excel window.
2. Draw and Write about groups and commands under Formulas tab under the ribbon in MS-Excel.
3. Write procedure to format the text in the cells.
4. Write procedure to enter formulas with built in functions.
5. Write procedure for creating chart in MS-excel.
6. Write Procedure for formatting numbers in MS-Excel.
7. Write procedure for writing criteria and extract the data.
8. Write procedure for printing of a worksheet.
9. Write procedure for formatting of chart in Ms-excel.
10. Write procedure to jump to different workbooks &import worksheet from different workbook.
11. Write procedure to create a database.
12. Write procedure to create a table using design view.
13. Write procedure to create form using forms wizard.
14. Write procedure for creating reports using report wizard.
15. Write procedure for creating a Custom Form.
16. Write the procedure to create custom reports.
17. Write the procedure to print active sheet.
18. Write the procedure for Printing of reports.
19. Draw and explain the groups and commands in create tab under ribbon in Ms access.
20. Write the procedure for creating Filter by form.

MODEL QUESTION PAPERS
STATE BOARD OF TECHNICAL EDUCATION & TRAINING:TS, HYDERABD
CS-110 Computer Fundamentals Lab
I-SEMESTER, END SEMESTER MODEL PAPER

TIME: 2hr   MARKS: 40

ANSWER ANY ONE QUESTION.
EACH QUESTION CARRIES TWENTY MARKS.

20 x 1 = 20

1. Write procedure for Creating and saving a document and draw and label the different parts of opening screen elements in Ms word.
2. Draw and explain the groups and commands in Home tab under ribbon in MS Power Point.
3. Write procedure for applying sounds, order, timing and effects of animation in a presentation.
4. Write procedure for character formatting in Ms word.
5. Draw and explain the groups and commands in Home tab under ribbon in Ms word.
6. Write procedure for creating main document and data file for mail merging.
7. Write procedure for page formatting in Ms word.
8. Write procedure for checking spelling and grammar using dictionary in Ms word.
9. Write procedure for printing of document in Ms word.
10. Draw and explain the groups and commands in Animations tab under ribbon in MS Power Point.
11. Write procedure to open Excel window and Draw and label the parts in Excel window.
12. Draw and Write about groups and commands under Formulas tab under the ribbon in MS-Excel.
13. Write procedure to format the text in the cells.
14. Write procedure to enter formulas with built in functions.
15. Write procedure for creating chart in MS-excel.
16. Write Procedure for formatting numbers in MS-Excel.
17. Write procedure for writing criteria and extract the data.
18. Write procedure for printing of a worksheet.
19. Write procedure for formatting of chart in Ms-excel.
20. Write procedure to jump to different workbooks & import worksheet from different workbook.
21. Write procedure to create a database.
22. Write procedure to create a table using design view.
23. Write procedure to create form using forms wizard.
24. Write procedure for creating reports using report wizard.
25. Write procedure for creating a Custom Form.
26. Write the procedure to create custom reports.
27. Write the procedure to print active sheet.
28. Write the procedure for Printing of reports.
29. Draw and explain the groups and commands in create tab under ribbon in MsAccess.
30. Write the procedure for creating Filter by form.

Record book: 10 marks   **Viva-voce: 10 marks**
