ABOUT WORKSHOP

India is a member of almost all international conventions. The obligation of the member state arising out of the conventions can be enforced on the basis of reciprocity only. No right or obligation is enforceable unilaterally. Therefore to pass own laws on Intellectual property is in the interest of every country. In 1999, a considerate passage of major legislations with regard to protection of Intellectual property rights in harmony with international practices and in compliance with India's obligations under TRIPS. These include,

1. The Patents (Amendment) Act, 1999 to amend the patents act of 1970 that provides for establishment of a mailbox system to file patents and accords exclusive marketing rights for five years.
2. The Trade marks Act,1999 which replaced the Trade and Merchandise ACT,1958
3. The Copyrights (Amendment) Act, 1999.
4. A sui generis legislation for the protection of geographical indications called the Geographical Indications of Goods (Registration and protection) Act, 1999.
5. The Industrial Designs Act, 2000 which replaced the Designs act, 1911.
6. The patents (Second Amendment), 1999 further to amend the patents Act, 1970.

This was a beginning of a new era in the field of Intellectual property. To streamline and strengthen the Intellectual property administration system in the country the government has taken several measures. Projects relating to the modernization of patent information services and trademarks registry have been implemented with the help from WIPO/UNDP. The government has implemented projects for upgrading of patent office's incorporating several components such as human resource development, recruiting additional examiners, infrastructure support and strengthening by the way of computerization and re-engineering work practices and eliminating backlog of patent applications, an amendment to the patent rules also was a notified to simplify the

procedural aspects. The first Indian patent laws were first promulgated in 1856. From time to time these were modified. New patent laws Indian Patent Act 1970 were made after the independence. The Act has now been radically amended to become fully compliant with the provisions of TRIPS. The most recent amendment was made in 2005 which were preceded by the amendments in 2000 and 2003.

ABOUT WORKSHOP

Motivated by concerns that the patent system is hindering innovation, particularly for small inventors, this study investigates the bright side of patents. We examine whether patents help startups grow and succeed using detailed micro data on all patent applications filed by startups at the U.S. Patent and Trademark Office (USPTO) since 2001 and approved or rejected before 2014. We leverage the fact that patent applications are assigned quasi-randomly to USPTO examiners and instrument for the probability that an application is approved with individual examiner's historical approval rates. We find that patent approvals help startups create jobs, grow their sales, innovate, and reward their investors. Exogenous delays in the patent examination process significantly reduce firm growth, job creation, and innovation, even when a firm's patent application is eventually approved. Our results suggest that patents act as a catalyst that sets startups on a growth path by facilitating their access to capital. Proposals for patent reform should consider these benefits of patents alongside their potential costs.

ABOUT WORKSHOP

The protection of intellectual property rights has been considered as an engine of economic growth in developed and developing economies. In this study, we analyze the impact of intellectual property rights on economic growth for a balanced panel of 38 countries (11 from high income countries; 16 from middle income countries; and 11 from low income countries) over the period of 1975-2005 by utilizing Ginarte and Park Index of Intellectual property rights (2005). The empirical results reveal that intellectual property rights contribute significantly to economic growth. But the impact is found to be more significant in high income countries as compared to middle and low income countries. Similarly, the effect is stronger in case of upper middle income countries as compared to lower middle income and low income countries.

RESOURCE PERSONS 1:

Dr. M. Kantha babu received his BE in Mechanical Engineering from Coimbatore Institute of Technology, Coimbatore. He has completed MS by Research and PhD from Indian Institute of technology, madras. Based on his research work he had so far published more than hundred technical publications in reputed International/National Journals and Conferences and applied few patents, Patent Design and Copy Rights. Presently , he his handling Govt. sponsored Projects more than 1.50 Crores. He is the Principle Investigator for a DST and BRNS sponsored project and also acting as Co-coordinator of UGC Sponsored Special Assistance Programme for 'Abrasive Waterjet Machining System'. He has teaching and research experience of more than 25 years. Presently he is working as Professor in the Department of Manufacturing Engineering, College of Engineering Guindy, Anna University and Director, Center for Intellectual Property Rights (CIPR) Anna University, Chennai. He is recipient of 'Indian National Science Academy' award.

RESOURCE PERSONS 2:

Dr.Venkat Reddy.D, an Ex member of the Indian Air Force, is the founding partner and the guiding force of this firm. He is a well known personality in the field of Intellectual Property Related matters, Constitutional Law, Law related to Mines and Geology. He is also a guest faculty to Osmania University, Hyderabad Central University, NALSAR, JNTU Kakinada, CDTS(Central Detective Training School), ICSI Chapter of Hyderabad and other educational institutions spread over India which stands as evidence for his unremitting passion for teaching. He is also a member of International Trademark Association(INTA), Vice President of International Association for Protection of Intellectual Property(AIPPI-Indian group). He is a life member of the Federation of Telangana and Andhra Pradesh Chambers of commerce and Industries(FTAPCCI) and is a life member of the National Institute for Human Resource Development. Dr. Reddy holds a doctorate in Trademark Law from Osmania University.

ABOUT WORKSHOP

Patent law is the branch of intellectual property law that deals with new inventions. Traditional patents protect tangible scientific inventions. Such as circuit boards, car engines, heating coils, or zippers,... once granted, patent gives the inventors the exclusive right to sell their invention for 20 years.

Terms to Know

- **Application:** The collection of documents which must be filed at the U.S. Patent and Trademark Office (USPTO) in order to obtain a patent.
- **Agent:** Someone who is not an attorney but who is authorized to file patent applications on behalf of inventors.
- **Claims:** The section of the patent application that defines the new and non obvious part of the invention and the part of the invention which can later be protected.
- **Counterpart:** A patent application before the USPTO concerning an invention that is already patented in another country. Typically, the same person files both patent applications.
- **Infringement:** Making or selling a patented device without license from the patent owner.
- **Prior Art:** The state of the industry before the patent was filed. Things that are considered prior art are not eligible for patent protection because they are not new.
- **Patent Prosecution:** The process of applying for and receiving a patent.
- **Patent Litigation:** The process of defending a patent against infringement.

ABOUT WORKSHOP

Intellectual Property Rights (IPR) are a set of exclusive rights protected by law which are accorded to creators or persons over their creations for a certain time of period. An IP right holder can realize value from its intellectual assets through utilizing it internally for its own processes or share it externally through provision of goods and service to customers. The latter can be achieved through legal mechanisms such as licensing or assignment. In today's globally competitive environment, intellectual property has placed itself on a pedestal in the context of economic growth and is becoming increasingly important. Intellectual Property (IP) is the fuel that powers the engine of prosperity, fostering invention and innovation. The increasing significance of intangible assets in the global economy is forcing business organizations to actively manage their IP as a key driver for building and sustaining their competitive advantage and achieving superior performance. IPRs are now being used not only as a tool to protect creativity and generate revenue but also to build strategic alliances for socio-economic and technological growth. Accordingly, in order to foster the protection of innovations and creativity, the Intellectual Property Office under the Ministry of Commerce and Industry is dedicated to mobilize the use of such technological advancement for the economic development of the country. The generation of IP largely takes place at the state level through small, medium and big industries, academic institutions and individuals. Most State have not yet evolved their IP strategies and ecosystems in terms of effective facilitating of services among MSMEs and start-ups, creating awareness, conducting training programmes, systems for utilization of IPR etc. states needs to maximize the benefits from their intellectual property by stimulating higher levels of innovation through a judicious system of rewards, ensuring timely and effective legal protection for IPRs and leveraging strategic alliances for enhancing the value of the intellectual property created in the state.

ABOUT WORKSHOP

When you buy a house, a systematic check to verify who the real owner is done in order to prevent bad surprises. Curiously enough, this type of systematic check is not common practice in the immaterial world. When an organization invests large sums of money in research and development (R&D) activities, it seldom verifies if the technology it wants to develop already exists and if it is owned by someone else.

To know what has been developed before you initiate R&D work you need to perform a so-called prior art search to detect all existing similar developments or inventions. Usually, researchers rely on classic sources to access this information such as scientific publications, conference documentation, contacts with peers, the internet, etc. In the process, patents are often overlooked because scientists consider patents to be more of a business instrument than a source of information. Patents, however, not only offer a huge insight into existing technologies but also provide essential information on who owns a technology and who the major players are in a particular field.

When do I need prior art information?

Before starting your research

Whenever you enter a research project it's a must to conduct a prior art analysis. This analysis can save you huge sums of money by detecting existing developments. It can also show you the best partners with whom you can collaborate. By basing your R&D WORK on what exists, you can embark on genuinely innovative work.

During your research

PRINCIPAL
Annamacharya Institute of
Technology & Sciences
Piglipur, Batasingaram (P),
Hayathnagar (M) R.R. Dist., HYD-501 512

It is most likely that your work, even based on an initial analysis, will venture into unexplored territories. In addition, during your research, new publications are made. Therefore, a permanent technology watch, detecting the latest publications in your research field, will keep you up-to-date on the progress made by others.

Before exploiting a product or process

As the technology you want to commercialize can be owned by third parties, a deeper “freedom to operate” search is necessary before commercially exploiting a new product or process. This search, detecting valid patents that can hinder the exploitation of your invention, is for instance necessary if you want to market your invention. It is important to stress that even if you have a granted patent on your invention, it does not exclude your product being partially or fully covered by another patent. This often happens because patents are rights to exclude others from using an invention and because patents can be granted on improvements of an initial basic invention.

There are many other situations where this information can be useful. For example, to acquire statistical analysis on the most innovative companies in a field, to cancel a granted patent used against you by detecting new invalidating prior art that has not been considered in the patent grant process, etc.

How to proceed?

Prior art searches can have serious financial consequences as they can put into question a research program or the commercialization of a new product or process. While one can adopt, in an initial phase, an amateurish approach, the complete analysis must be left to information specialists using professional tools. This should not prevent you, however, from conducting a pre-analysis yourself to get an indication of how active a field is and who the major players are

As per your request regarding the workshop on "Protection of Product and Graphic interface of Software Applications". It will be important for all teachers in the department to attend the workshop to enhance their ideas about IPR. The workshop place in seminar Hall on "09-02-2016 to 12-02-2016. Please move ahead for conducting the workshop.

Your consideration will be highly appreciated. I look forward to hearing from you

ABOUT WORKSHOP

Visual part of computer applications or operating system through which a user interacts with a computer or software. It determines how commands are given to the computer or the program and how information is displayed on the screen. Patents protect concepts, methods of manufacture, and the way a product works. One advantage of patent protection is that a patent can protect a product irrespective of the appearance of the product, thus giving broader protection than a design registration. As per Indian Law, under the Design Act Of 2000, Industrial Design protection is a type of intellectual property right that gives the exclusive right to make, sell, and use articles that embody the protected design, to selected people only. Design protection provides geographical rights, like patents and Trademarks do.

STANDING COMMITTEE (SCT)

The Standing Committee on the Law of Trademarks, Industrial Designs and Geographical Indications (SCT) is the forum where WIPO's member states and observers meet to address issues relating to the development of the international legal framework for industrial designs. SCT members are currently seeking agreement on a number of key issues relating to international designs.

DESIGN LAW, TREATIES AND DOCUMENTS

The treaties that WIPO administers, together with national and regional laws, make up the international legal framework for industrial designs.

ABOUT WORKSHOP

The National Intellectual Property Rights Policy (IPR Policy) has generated unprecedented responses within and outside India. According to news reports, the US Department of Commerce is assessing India's IP policy. The commerce minister also made it clear that the adoption of the policy is an attempt to clear India's stands prior the prime minister's US visit. It is very clear that the IPR policy would figure prominently in the US india bilateral discussions in the coming week. Through the IPR policy contains measures on various IPR rights; it predominantly focuses on measures related to patents. The Indian Patents Act 1970 denied product patent protection to pharmaceuticals, which in turn played a key role in building self-sufficiency in the medicine manufacturing.

While introducing the product patent protection to pharmaceutical inventions, India incorporated many public interest safeguards in the Patents Act to address concerns of unaffordable prices of patented medicines. As a result, the Patents Act effectively prevents multiple patenting of known a molecule, a common practice of pharmaceutical Multinational Corporations (MNCs) to extend the patent monopoly over the molecule. Similarly, Patents Act also allows generic companies to seek license from the patent office to produce patented medicines(compulsory license) under various grounds, including if the patented medicine is not available at an affordable price.

Therefore, India's Patents Act is viewed as a model patent law by many developing countries. Patents laws of Philippines and Argentina contain similar provisions against obtaining of patents on known a molecule. Similarly, South Africa and Brazil are expected to incorporate certain provisions of the Indian Patents Act.

A 3-Day workshop on "Industrial Property-The Carriage for Success" (12-12-2016 to 14-12-2016)

A Three day workshop on "Industrial Property-The Carriage for Success" was conducted by the Department Electronics and communication engineering on 12/12/2016 to 14/12/2016. The resource persons was Sri. Aditya Venkateswara V.C, Examiner, Indian Patent office, Kolkata, Sri VSSSRK, Raju Bhupathi Raju, Patent & Trademark Attorney, Mr. N.R. Meena, Assistant Controller of Patents & Designs, Department of Industrial Policy and Promotions, Ministry of Commerce and Industry, GOI, New Delhi, Intellectual Property Rights (IPR) and Industrial Properties are concerned with the protection of tangible and intangible property. The resource Person gave an opinion that IPR provides rewards and recognition to inventor/contributor for their research, legal protection encourages innovation, economic growth, new jobs and industries, improve quality of life, provides an environment where creativity flourishes and everyone is benefited. IPR protection plays a key role in gaining modest advantage in terms of technological gains for achieving higher economic growth in a market driven economy. The main aim of this workshop is to impart greater awareness about the issue of Intellectual Property Right (IPR)/Industrial Properties, which has gained a special importance for all the domains of socio-economic development. It aids to understand of patentability criteria in details and viable aspect of the patent. The workshop mainly focused on topics like importance of intellectual property (IP), Intellectual property rights (IPR), the need to promote and protect IP, Patents, Trademarks, Industrial designs, Geographical Indications, Copy rights.

A three day workshop on "Management of Intellectual Property Rights- Modularity and IP Protection" conducted from 06/03/2017 to 08/03/2017. The workshop showcased the fact, how intellectual property rights (IPR) have become important in the face of changing trade environment which is characterized by the following features namely global competition, high innovation risks, short product cycle, need for rapid changes in technology, high investments in research and development (R & D), and a need for highly skilled human resources. With the opening up of technology development and services intellectual property rights (IPR) have become more susceptible to infringement leading to inadequate return to the creators of knowledge. The resource persons Sri.V.K.Sukhwani, Professor GEC UJJAIN .Mr.Tabrez Ahmad, Co-chairman, ASSOCHAM and Mr.D.P.Vaidya.Director, ASSOCHAM, highlighted that developers of such products and technologies would like to ensure R& D costs and other costs associated with introduction of new products in the market are recovered and enough profits are generated for investing in R&D to keep up the R&D effects.

A three-day workshop on "IP litigations-The Legal Mistakes Made"

(13-06-2017 to 15-06-2017)

A three-day workshop on "IP litigations-The Legal Mistakes Made" conducted from 13-06-2017 to 15-06-2017. The resource person **Sri.M.Baskaran**, Branch Head allinnov Research and development private limited, Hyderabad, **Mr. Mukesh Kalra**, Joint Secretary –International trade, Federation of Indian micro and small & medium Enterprises(FISME). **Ms.Madhuri Anand**, Research Officer, MHRD Chair on IPR, Cochin University is Science and technology, made an overview of patent, design and IPR in totality and called upon the delegates to make themselves aware of the benefits of filing applications for patents and industrial design with IP office and making a commercial use of it. **Mr.M.Baskaran** said that Indian universities are lagging behind in filing patents for innovation as focus is more on publishing research papers than going for patenting innovation. He said, we need national policy for strengthening the IP concept in the country, which is currently not there. This is more a sociological problem. Since childhood are not allowed to question. This is the reason why innovative ideas do not get encouraged as inquisitiveness is not encouraged. An inquisitive mind is the basis for innovation. He said, he urged the universities to reward patent work in way of promotions and increments. He also said that Pune should be the place where more intellectual property should be getting generated. "India's trademark registration is fifth in the world, which is a good thing that happened. In Asia, India is second highest in terms of trademark registration after china. Registering one's own trademark is a very important step as it is the identity of the company." He said

ABOUT WORKSHOP

Intellectual Property (IP) allows consumers to make choices between competing entrepreneurs, and the goods and services they sell. Therefore, IP is inherently pro-competitive as it ensures the protection of differentiated, intangible business assets. Without IP, less efficient manufacturers and service providers would try to lure clients by copying the goods and services of more efficient competitors. The latter would lose any incentive to improve or to offer new products and services. Society as a whole would lose. But IP only perform that crucial role of ensuring competition when it protects genuine differences.

IP in the right dosage: It is inherently pro-competitive but sometimes IP in the right dosage can generate an embarrassment to consumer right of free choice. This happens when IP rights are abused, or used in a way contrary to the objectives of the law. It may also happen that IP in the right dosage can be associated with certain circumstances that make it difficult, impossible and inconvenient for competitors to seek alternative ways of attracting consumers. For example, when patented technologies become industrial standards, or when the obtaining of test data implies the risk to the health and well being of humans and animals.

COURSE CONTENTS

- Protection of Intellectual property rights
- Competition law
- Enforcement approaches intellectual property rights
- Antitrust policy
- Cross-licensing
- Refusal to license
- Patent pools
- Tying
- Patent litigation more..
- Interaction

A Three day Workshop on "File Sharing and copyrights-Extensive case studies" (19-02-2018 to 21-02-2018)

Resource Person:

1. Dr.Venkat Reddy Donthi Reddy

Dr.Venkat Reddy D, an Ex member of the Indian Air force, is the founding partner and the guiding force of this firm. He is well-known personality in the field of Intellectual property Related matters and constitutional Law.He is also a guest faculty in Osmania university, Hyderabad and central university,NALSAR,JNTU Kakinada,CDTS(central Detective Training School).ICSI chapter of Hyderabad and other educational institutions spread over India which stand as evidence for his unremitting passion for teaching. He is a member of International Trademark Association (INTA), Vice president of International Association for Protection of Intellectual Property (AIPPI-Indian group).He is a life member of the Federation of Telangana and Andhra Pradesh Chambers of commerce and Industries (FTAPCCI) and is a life member of the National Institute for Human Resource Development. Dr.Reddy holds a doctorate in Trademark Law from Osmania University.

Qualifications:

- Diploma in Chemical Engineering
- Diploma in Electronic Engineering
- M.A(public Administration)
- LL.M(Jurisprudence)
- PGDHRD
- PGDCL & IPR
- PGDADR
- Ph.D. in Trademark Law

Areas of Interest:

Intellectual property rights and related rights, Mines and geology,
Constitutional Law, Civil and Criminal Matters.

Areas of Expertise:

IPR Litigation in trial courts, various High Courts and Supreme Court of India, Mines and related cases, Constitutional matters and matrimonial related matters in various High courts.

2. Guttha Venkatapathi Rao

Rtd.Associate Director & Director CPDC, Advanced Systems Laboratory,
DRDO, Hyderabad.

Research Projects handled

- Research and Development leading to product ionization of Military equipment and stores
- Construction Equipment/air Compressors and power generators at R&D Engrs., Pune. Standardized the complete range of air compressors in Armed forces. Developed and product ionized cable winding & dispensing machines for Army Signal Engineers
- Parachutes and recovery systems at ADRDE, Agra. Developed Brake parachutes for MIG & Su-7 aircrafts and led to production
- Advanced Composite Materials and products for Guided Missiles, Military aircraft, Wind Turbine Generators, Othotic and prosthetic Appliances for physically handicapped at DRDL and CPDC. More than 40 varieties of composite products were designed, developed and productonized.
- Conceived, planned, established, commissioned and managed a state-of-art Composite Facility named "Composite Product Development Centre (CPDC)", which is now meeting the needs of the Indian Missile Programme.
- Visiting faculty member at Institute of Armament Technology, Pune. Institute of Technology Management, Mussourie and regular Faculty member for training courses organized for the benefit if armed forces officers on stores preservation and packaging at DMSRDE.
- Conducted Continuing Education Programmers on Composites Technology for the Scientists of DRDO, involving academicians from IITs and R&D institutions as Resource Persons.
- Member Secretary for TIFAC-RCI Programme Management Board under the chairmanship of Dr. kalam, for the commercialization of home grown composite technologies. Configured a National Advanced Composites Mission interfacing DRDO and Industry. Carried out a market survey on Business opportunities for composites.
- Brought out a Composite Product Design Manual in association with Prof.K.A.V.Pandalai(IIT.Chennai)

A three day workshop on "File Sharing and copyrights-Extensive case studies" in association with RVR Associates Hyderabad, organized at Annamacharya Institute of Technology and science from 19-02-2018 to 21-02-2018

Annamacharya Institute of Technology and science in collaboration with RVR Associates had arranged three-day workshop for budding IPR. The main Speakers of the expert talk were Dr.Venkat Reddy Donthi Reddy-managing Partner, from RVR Associates, Hyderabad. The Program started with the speech of Mr.C.Abhishek Reddy, Executive Director of Annamacharya Institute of Technology and Science, telling the faculties about importance of file sharing and copyrights. Organizing committee would like to thank AITH management for their support.

The Expert talk was an inclusion of participate learning and live examples, which has given better exposure to the participants Dr.R.Ramesh Reddy and Dr.B.Sathish were the core committee members for this workshop. The total number of participants from Annamacharya Institute of Technology and science were more than 70.All the faculties were very happy and expecting more workshops like this in future.

ABOUT WORKSHOP

Intellectual Property (IP) allows consumers to make choices between competing entrepreneurs, and the goods and services they sell. Therefore, IP is inherently pro-competitive as it ensures the protection of differentiated, intangible business assets. Without IP, less efficient manufacturers and service providers would try to lure clients by copying the goods and services of more efficient competitors. The latter would lose any incentive to improve or to offer new products and services. Society as a whole would lose. But IP only perform that crucial role of ensuring competition when it protects genuine differences.

IP in the right dosage: It is inherently pro-competitive but sometimes IP in the right dosage can generate an embarrassment to consumer right of free choice. This happens when IP rights are abused, or used in a way contrary to the objectives of the law. It may also happen that IP in the right dosage can be associated with certain circumstances that make it difficult, impossible and inconvenient for competitors to seek alternative ways of attracting consumers. For example, when patented technologies become industrial standards, or when the obtaining of test data implies the risk to the health and well being of humans and animals.

COURSE CONTENTS

- Protection of Intellectual property rights
- Competition law
- Enforcement approaches intellectual property rights
- Antitrust policy
- Cross-licensing
- Refusal to license
- Patent pools
- Tying
- Patent litigation more..
- Interaction

Professional Details

Name : Adithya Nimmagadda
Designation : Assistant Manager
Experience : 6Years (August 2012-Present)
Company : Hyundai Motor India Engineering Private Limited
Team : Infotainment development-Electronics engineering Department

Project Details

1. **Antenna Development & RF Reception, Tuning:** Localized cost-effective antenna development for Indian market without negotiating about receiving quality, Improve design of antenna for reduction of weight. RF Tuning to local specific Radio infrastructure by varying DSP parameters within the defined test course. A detail test course development for testing with different test course conditions.

Responsibilities: Detailed test course for India developed. In antenna developed had a major role in CAD Designing of Antenna. Lead Test Engineer in testing of antenna & tuning the infotainment radio (DSP parameters) according to local receiving power conditions, infrastructure designed.

Duration : January 2013 to August 2016
Role : Group Engineer for testing & tuning

2. **DRM(Digital Radio Mondiale) development:** DRM is a technology initiation from Govt.of India for digital India, where AM(analog) is transforming to DRM(digital)

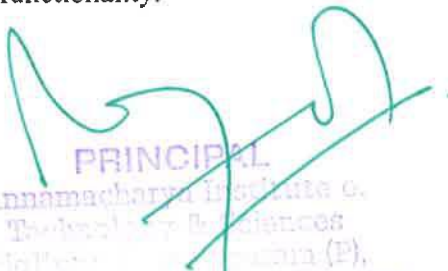

Responsibilities: New Receiver developed for car Infotainment systems which are adaptable to current transmission. Detail Specification developed for functionality of receiver. Test process and course development for DRM Reception Check for receiving quality improvement.

Duration : October 2013 to December 2016
Role : Project Lead

3. **Hyundai iblue (smart phone remote control Application) Development:** It is Smart phone application used by co-passengers for controlling infotainment functions through Bluetooth.

Responsibilities: Android & IOS application code developed with maintaining guidelines. Infotainment system Bluetooth stack is configured, new protocol designed for communication between Smartphone apps, infotainment system. Functional Specification of smart phone app is developed. Menu Tree designed for the App functionality.

Duration : October 2016 to current
Skills Used : Android Studio & Xamarin
Role : Project Lead

PRINCIPAL
Annamacharya Institute of
Technology & Sciences
Hyderabad (P)
511 512

4. **Infotainment GUI Development based on Indian preferences:** Design of Infotainment System UI based on the Indian preferences and traditional practices. Effective flow depth or menu flow design of the infotainment system for improving customer convenience.

Responsibilities: Surveyed on Indian preferences like arts, textiles city architecture, paintings etc and drawn inferences like color palette, texture patterns, and Analyzed improvement points in the existing design of UI. New menu flow and information architecture is designed considering the driving conditions, comfort for customer. Designed the simulated model of UI using Qt.

Duration : November 2016 to December 2017

Skills Used : Qt, Adobe Photoshop, Adobe Illustrator.

Role : project Lead

5. **Infotainment Functionality Quality validation:** Validate infotainment system functionality based on the electronic and functionality specifications. Validation is done specialized equipments along with the simulated vehicle signals in test bench. Validate the system functionality to improve the specifications as per the local market.

Responsibilities: Testing the infotainment systems from proto to SOP stage and reduced the issues. In total supported for 3 different platforms for quality improvement till the date.

Adopted many suggestions as per the Indian customer usage comfort.

Duration : January 2013 to current

Skills Used : Macro codes of C language for vehicle signal simulation

Role : Group Validation Engineer.

A Three day Workshop on "Managing IP for Start-Ups –The Road Ahead" (14-05- 2018 to 16-05-2018)

Resource Person:

1. Dr.S.Ramamurthy

Professor & Head

Centre for Knowledge Management Centre for Emerging Technologies

Jain University-Bangalore

- A PhD from IIT(Chennai) with 25years of research and development work
- Inventor of Straight foil bearings with 5 patents(2India,1USA,1European and 1Japan)
- Patent specialist with 20years of experience in prior art searching
- Identification of patentable Inventions

2. Deepak Gupta(Sr.Associate)

Mr.Gupta has exposure to all types of litigations in various courts in the country. Having more than 10years of experience in various fields his experience includes and is not limited to Law like customer, Civil Recoveries, Arbitration Service Matters and other miscellaneous issues before high courts, and other authorities, Litigation before District court, consumer and high courts. Handles issues of Insurance, Banking and Telecom independently. His dedication, hardwork and perseverance have won him some of the best professional achievements of his life. He carries a high level of motivational drive to work and excel.

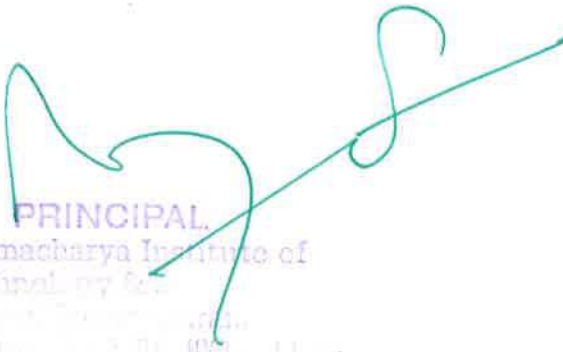

His versatile experience in legal drafting and providing legal opinion regarding various issues and agreements gives him an edge over others. His vast knowledge of field includes an array of statues like statutory compliance of various Companies related to shop Act, Contract Labor Regulation Act, Provident Fund, Employee State Insurance, Bonus Act, and Labor Welfare Act.

A three day workshop on “Managing IP for Start-Ups –The Road Ahead” in association with Astrea Legal Associates, organized at Annamacharya Institute of Technology and science from 14-05-2018 to 16-05-2018

Annamacharya Institute of Technology and science in collaboration with Astrea Legal Associates had arranged three-day workshop for budding IPR. The main Speakers of the expert talk were Mr. Deepak Gupta, Sr.Associate from Astrea Legal Associates and Dr.S.Ramamurthy professor Jain University. The Program started with the speech of Mr.C.Abhishek Reddy, Executive Director of Annamacharya Institute of Technology and Science, telling the faculties about importance of start-ups and their role in creating employment. Organizing committee would like to thank AITH management for their support.

The Expert talk was an inclusion of participate learning and case studies , which has given better exposure to the participants Dr.R.Ramesh Reddy and Dr.B.Sathish were the core committee members for this workshop. The total number of participants from Annamacharya Institute of Technology and science were more than 80.All the faculties were very happy and expecting more workshops like this in future.

ABOUT WORKSHOP

Intellectual Property (IP) allows consumers to make choices between competing entrepreneurs, and the goods and services they sell. Therefore, IP is inherently pro-competitive as it ensures the protection of differentiated, intangible business assets. Without IP, less efficient manufacturers and service providers would try to lure clients by copying the goods and services of more efficient competitors. The latter would lose any incentive to improve or to offer new products and services. Society as a whole would lose. But IP only perform that crucial role of ensuring competition when it protects genuine differences.

IP in the right dosage: It is inherently pro-competitive but sometimes IP in the right dosage can generate an embarrassment to consumer right of free choice. This happens when IP rights are abused, or used in a way contrary to the objectives of the law. It may also happen that IP in the right dosage can be associated with certain circumstances that make it difficult, impossible and inconvenient for competitors to seek alternative ways of attracting consumers. For example, when patented technologies become industrial standards, or when the obtaining of test data implies the risk to the health and well being of humans and animals.

COURSE CONTENTS

- Protection of Intellectual property rights
- Competition law
- Enforcement approaches intellectual property rights
- Antitrust policy
- Cross-licensing
- Refusal to license
- Patent pools
- Tying
- Patent litigation more...
- Interaction

About AITs:

Annamacharya Institute of Technology and Sciences(AITS), is an organization recognized under UGC Section 2(f) and 12(b), and established in the year 2005, which is a fast growing technical institution in Andhra Pradesh under the variety of spices of the well-known Annamacharya Group of Educational Institutions. The Annamacharya Group is synonyms with quality engineering education having its institutions across the length and breadth of Andhra Pradesh. AITs is situated near the world renowned Ramoji Film City, in idyllic spot amidst a vast area of 30 acres with Sylvain surroundings. It now has fully fledged laboratories for all five departments of CSE, ECE, CIVIL, EEE and MECH Engineering. The college, apart from 5 Undergraduate courses, also offers Postgraduate Programs like ECE, ES(ECE),CSE and MBA under the JNTU.

Objective of the Workshop:

Machine Learning (ML) and IOT play a significant role in the modern engineering and information processing systems. It is a rapidly growing field. The Machine Learning is an essential part of pattern recognition, object detection and classification, clustering, data mining and speech recognition etc. In addition, IOT has important significance over machine learning in application of smart city. The aim of this workshop is to provide an exposure to both basics and recent advances in Machine Learning and IOT to the teaching and research community associated with the departments of Electronics, Electrical, Computer Science, IT, Biomedical etc.

A REPORT Of Two Days Workshop On **IOT & Machine Learning**

(3-10-2018 and 4-10-2018)

Three-Day workshop on “**IOT & Machine Learning**” has been conducted by Departments of ECE, Annamacharya Institute of Technology & sciences (3-10-2018 & 4-10-2018). A Total of 30 faculties have registered for this program. **Mohith Singh, Head (Mind Mapperz), New Delhi** was the Chief Guest and other dignitaries for the inaugural function **Dr. P.V Krishnamurthy**, Principal and **Mr. C. Abhishek Reddy**, Executive Director.

DAY 1:

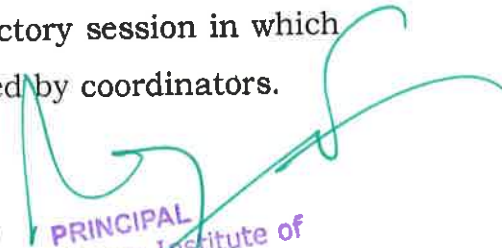

After inaugural session and registration, chief guest addressed the gathering about the two days Workshop on **IOT & Machine Learning**. **Mohith Singh** briefed about the Introduction to IOT, ARDUINO, after a small tea break the speaker continued with Hands on ARDUINO which includes fundamentals of C programming, hello to Microcontroller World, Interfacing Sensors with Arduino, Reading from Sensors. After a lunch break of 1 hour the topics on Basics of Networking was carried on, which included Networking Fundamentals, Types of networks. The last session of the 1st day of workshop was concluded with

Arduino and Bluetooth which the speaker described the Interfacing of Bluetooth module with Arduino and controlling Arduino with Android Device.

DAY 2:

Day 2 started with very interesting Practicals oriented which described on blinking of LED, turn ON/OFF buzzer, transferring data serially from PC to microcontroller after a small tea break the speaker briefed about new topics regarding ARDUINO with Esp8266 that includes Interfacing, Understanding, and Creating the program. After a lunch break of 1 hour, the speaker elaborated a trending topic: Hello to the Online World that includes connecting the ARDUINO+ Esp8266 to other devices, Using ARDUINO to control device via Wifi with Esp8266,

And finally, the programme was concluded with a valedictory session in which speaker was facilitated and a vote of thanks was presented by coordinators.

ABOUT FDP

Today, everyone is focus on Internet of Things (IOT), Machine Learning (ML) and Artificial Intelligence (AI). Statistics shows that a huge data will be growing and most of the devices will be connected on Internet by 2025. The solution is integration of three technologies, namely IOT, ML, and AI. ML algorithms eliminate optimization and estimation of process, and allow to learn the patterns by itself and take autonomous decisions without new set of the rules and regulation. AI eliminates human intervention wherever necessary and possible. IOT collects various parameters from sensors/devices and connect over Internet using various upcoming wireless technologies. In this FDP, various architectures, techniques and algorithms of IOT, ML and AI are to be incorporated for advanced knowledge for various technocrats for future applications.

OBJECTIVE:

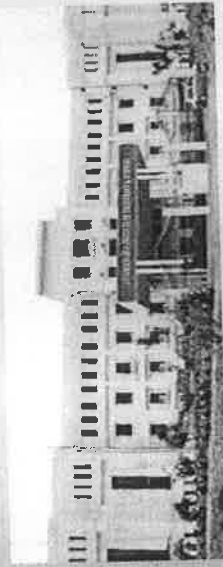

To introduce fundamentals of IOT and ML with its applications.

- The program would help the participants to understand the key concepts and advanced understanding on IOT and ML.
- At the end of workshop, the participants are able to identify of optimized algorithms, technologies to develop any future applications.
- To explore various research opportunities and challenges in the field of IOT, ML and its application

About AITs:

Annamacharya Institute of Technology and Sciences (AITS), is an organization recognized under UGC Section 2(f) and 12(b), and established in the year 2005, which is a fast growing technical institution in Andhra Pradesh under the variety of spices of the well-known Annamacharya Group of Educational Institutions. The Annamacharya Group is synonymous with quality engineering education having its institutions across the length and breadth of Andhra Pradesh. AITs is situated near the world renowned Ramoji Film City, in an idyllic spot amidst a vast area of 30 acres with Sylvain surroundings. It now has fully fledged laboratories for all five departments of CSE, ECE, CIVIL, EEE and MECH Engineering. The college, apart from 5 Undergraduate courses, also offers Postgraduate Programs like ECE, ES(ECE), CSE and MBA under the JNTU.

Objective of the Workshop:

The overarching goal of the workshop was to explore and present technical talks on the state-of-the-art in the development of these systems for different areas of applications of RFID to protect physical as well as intellectual property protection. Due to this concern only authorized people with proper tags must be allowed to enter the premises. The tag holds an integrated circuit that is used to store, process data as well as modulate and demodulate the RF signals being transmitted.

A REPORT
Of
Three Days Workshp
On
RFID Security Access Control System
(12-06-2017 to 14-06-2017)

Three-Day workshop on “RFID Security Access Control System” has been conducted by Departments of ECE, Annamacharya Institute of Technology & sciences (12th June 2017 to 14th June 2017). A Total of 30 faculties have registered for this program. **Dr. (Mrs.) Shaila Dinkar Apte** was the Chief Guest and other dignitaries for the inaugural function **Dr. R.Ramesh Reddy**, Principal and **Mr. C. Abhishek Reddy**, Executive Director.

DAY 1:

After inaugural session chief guest addressed the gathering about the Three days faculty development program on **RFID Security Access Control System**. **Mrs. Shaila Dinkar Apte** briefed about the Introduction to RFID Security Access Control System. After a small lunch break the 1st day of the workshop was concluded with tools & resources used for software and hardware for RFID.

DAY 2:

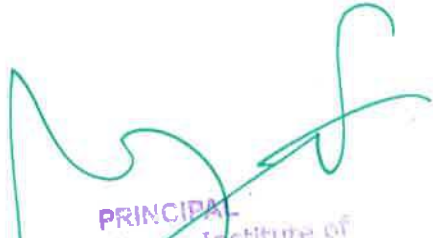

Day 2 started with the Concept used in RFID which includes 8051 Microcontroller, block diagram, pin configuration. After a small tea break the

speaker taught an interesting topic about RS232, MAX232IC, L293D, and LCD. Then after a 45 minutes of lunch break the speaker elaborated the working of RFID, description about Arduino

DAY 3:

The third day was very interesting which started in explaining applications with various examples both for software and hardware and after a small tea break the last topic advantages, disadvantages, future scope was discussed.

The programme was concluded with a valedictory session in which speaker was facilitated and a vote of thanks was presented by workshop coordinators.

ABOUT WORKSHOP

The goal of the workshop was to help chart a broad vision for the future needs for the research and academic communities, this workshop provides knowledge on radio frequency identification (RFID) technology. At the workshop, attendees discussed and debated about the rising demand for secure system that must be dependable and quick respond for the industries and company. RFID (Radio Frequency Identification) is one of the consistent and fast means of identify the material object.

It will provide an overview of the current state of the art, highlighting the latest developments in this domain and to explore innovative approaches in the area. Eminent faculties will share their research based ideas in these specific fields. Participants will have the opportunity to share their technical expertise, gain rich knowledge by various lectures and informal discussions. Research has made some drastic changes which makes its programming a lot shorter and easier which is because of replacing microcontroller with Arduino. Arduino makes the circuit and programming a lot easier to understand.

OBJECTIVE:

Radio Frequency Identification (RFID) is one of the most popular Automatic Identification and Data Capture (AIDC) technologies that facilitate objects identification and information exchange over relatively small and widely separated entities. In this paper, the main aim is to address the privacy and security challenges that RFID Access Control Systems face and solve these challenges without relying on back-end database but only the RF subsystem.

A REPORT Of Three Days workshop On “Future Generation Wireless Network”

(05-11-2016 to 07-11-2016)

Three-Day workshop on “**Future Generation Wireless Network**” has been conducted by Departments of ECE, Annamacharya Institute of Technology & sciences (5th Nov 2016 to 7th Nov 2016). A Total of 30 faculties have registered for this program. **Dr. Swetha Amit, Assistant Professor, Ramaiah Institute of Technology, Bangalore** was the Chief Guest and other dignitaries for the inaugural function **Dr. P.V Krishnamurthy, Principal, AITS** and **Mr. C. Abhishek Reddy, Executive Director.**

DAY 1:

After inaugural session chief guest addressed the gathering about the Three days workshop on **Future Generation Wireless Network.** **Dr. Swetha Amit** briefed out Index Modulation for Next Generation Wireless Communication Systems was discussed which said Emerging wireless network services are expected to pervade domains such as healthcare, transportation, civic services, public safety, education and entertainment, and can thus be considered essential infrastructure much like water, electricity or sewage. After a small lunch break the 1st day of the workshop was concluded with Device to Device Communication.

DAY 2:

Day 2 started Interference and Energy Management Issues in Next Generation Wireless Systems. After a small tea break the speaker taught an interesting topic about Physical Layer Aware Link Layer Protocols. In the Afternoon, complete session was continued with Global Navigation Satellite System: The Principles and Applications, How the GPS work, the architecture, the future work prospective.

DAY 3:

The third day was very interesting which included in explaining "Are we ready yet for a smooth WiFi experience in busy settings?" 802.11ax High Efficiency of Next Generation WiFi was explained and after a small tea break the last topic was energy and spectrum efficiencies trade-off in wireless systems.

The programme was concluded with a valedictory session in which speaker was facilitated and a vote of thanks was presented by workshop coordinators.

ABOUT WORKSHOP

The goal of the workshop was to help chart a broad vision for the future wireless infrastructure needs for the research and academic communities. At the Workshop, attendees discussed and debated the scale, operation, size and technological make-up of this infrastructure, and articulated a vision for future generation wireless network and the associated research and applications that would be enabled.

It will provide an overview of the current state of the art, highlighting the latest developments in this domain and to explore innovative approaches in the area. Eminent Scientists, Academia elites and Industrial representatives share their research based ideas in these specific fields. Participants will have the opportunity to share their technical expertise, gain rich knowledge by various lectures and informal discussions. It is the platform for the exchange of information and ideas on the progress of research and development in future innovative generation wireless network.

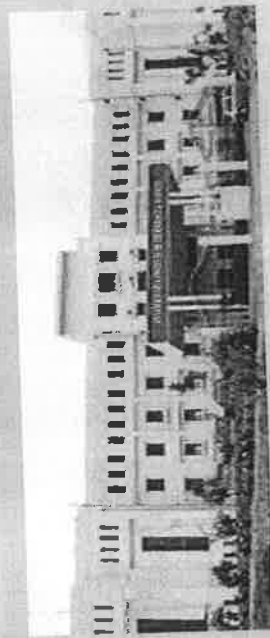

OBJECTIVE:

The overarching goal of the workshop was to help chart a broad vision for the future of wireless networking research. At the workshop, attendees discussed and debated the critical challenges in wireless networking, and articulated a vision for conducting both fundamental and inter-disciplinary research in the area. The participants were clearly briefed on the goal of the workshop. They were explicitly informed that the goal of the workshop was not to end with intellectual discussions, but rather to work as a team to create a common vision of the area that is presented to the community in the form of a report.

About AITs:

Annamacharya Institute of Technology and Sciences (AITs), is an organization recognized under UGC Section 2(f) and 12(b), and established in the year 2005, which is a fast growing technical institution in Andhra Pradesh under the variety of spices of the well known Annamacharya Group of Educational Institutions. The Annamacharya Group is synonymous with quality engineering education having its institutions across the length and breadth of Andhra Pradesh. AITs is situated near the world renowned Ramoji Film City, in idyllic spot amidst a vast area of 30 acres with Sylvain surroundings. It now has fully fledged laboratories for all five departments of CSE, ECE, CIVIL, EEE and MECH Engineering. The college, apart from 5 Undergraduate courses, also offers Postgraduate Programs like ECE, ES (ECE), CSE and MBA under the JNTU.

Objective of the Workshop:

To assimilate the knowledge on antenna design such that the hard work done by the scientists are known and implemented in cases of application to space, missile, submarine, aircrafts, armored tanks. To Explore and elaborate on needs of new trends and possibilities, looking at the development of antenna technologies and architectures for future telecommunications, remote sensing, and scientific applications.

About the Workshop

The purpose of the workshop is to provide an open forum focused on Recent Trends in Microwave Antennas for Multi field Applications such as radar communication, missile/space craft tracking, remote sensing, submarine communication, GPS ,GSM, MEMS/Nanotechnology, antennas.

Participants will have the opportunity to share their technical expertise, gain rich knowledge by various lectures and informal discussions. It is the platform for the exchange of information and ideas on the progress of research and development in innovative antenna technology.

General Information:

- Snacks and Lunch during the Course will be provided.
- No TA and DA will be paid to the participants.

A REPORT Of Three Days Workshop On “Advancement in Microwave Antennas”

(10th Dec 2015 to 12th Dec 2015)

Three-Day workshop on “**Advancement in Microwave Antennas**” has been conducted by Departments of ECE, Annamacharya Institute of Technology & sciences (10th Dec 2015 to 12th Dec 2015). A Total of 30 faculties have registered for this program. **Mr. M.V Subramanyam**, Associate Professor, E.C.E of Santhiram Engineering College, Kurnool was the Chief Guest and other dignitaries for the inaugural function Dr. R.Ramesh Reddy, Principal and **Mr. C. Abhishek Reddy**, Executive Director.

DAY 1:

After inaugural session chief guest addressed the gathering about the Three days workshop on **Advancement in Microwave Antennas**. **Mr. Subramanyam** briefed out basic concepts of antennas such as Introduction to antennas, Propagation of EM waves Radiation pattern, Field regions, and Directivity was discussed. After a small lunch break the 1st day of the workshop was concluded with microwave antennas, Antenna efficiency, antenna gain, Bandwidths and side lobes, impedance, polarization of waves, polarization of antennas, Effective aperture, Friis transmission equation.

DAY 2:

Day 2 started with Smart antennas Micro strip antennas and their applications and after a small tea break he explained about Antennas for special application-GPS & GSM Communication - Bluetooth / Wi-Fi / Wi-max Communication, Satellite communication. In the Afternoon complete session was continued with the rest of the application with MF / HF / UHF / VHF communication, Remote sensing.

DAY 3:

Third day was very interesting where Antenna Temperature were discussed and after a small tea break discussion was Application software and Antenna measurements.

And lastly the programme was concluded with a valedictory session in which speaker was facilitated and a vote of thanks was presented by workshop coordinators.

A REPORT Of Three Days Workshop On Recent Trends in VLSI and System on chip

(17th November 2014 to 19th November 2014)

One-week workshop on "**Emerging Trends in VLSI**" has been conducted by Departments of ECE, Annamacharya Institute of Technology from 17th November to 19th November, 2014. A Total of 30 faculties have registered for this program. **Dr. T.Ravi** – ECE, M.E, Ph.D from Satyabhama Institute of science and Technology was the Chief Guest and other dignitaries for the in augural function were **Dr. R.Ramesh Reddy**, Principal and **Mr. C. Abhishek Reddy**, Executive Director.

DAY 1:

After inaugural session chief guest addressed the gathering about the three day FDP on Recent Trends in VLSI and System on chip.

Dr. T.Ravi briefed out concepts such as VLSI design Technology, design flow and architectural level optimization techniques such as pipelining, parallelism and retying evolution of Electronics & VLSI Design was discussed. Post lunch session was hands-on Verilog/VHDL programming, and Very large scale integration – Monolithic and Hybrid

IC was discussed.

DAY 2:

Day 2 started with VLSI Design isolation, Oxide isolation, Diode Isolation, Building blocks, Layout of Passive element and the concepts of Applications of adaptive signal processing and after a small tea break he explained about design of semiconductor diffused resistors, thin film resistor and Monolithic Capacitor, complete session was hands-on Fabrication of thick oxide MOSFET and CMOS was explained with 3D view.

DAY 3:

Third day was very interesting that was training on Xilinx Spartan ,E-FPGA-based implementation, applications on recent trends in VLSI were discussed and after a small tea break discussion was on recent trends and research issues applications on System On Chip. Afternoon session was hands on training on implementation of various filters, system identification, adaptive filtering using MATLAB.

In the valedictory session speaker was facilitated and a vote of thanks was presented by workshop coordinators.

CIRCULAR

All the staff members are here by informed that we are organizing a three day Workshop on "Recent Trends in VLSI and System on chip" on 17th November 2014 to 19th November 2014.

Venue: Seminar hall

Timings: 1:00 pm to 4:30 pm

All the faculty members are requested to attend the workshop.

To
The Principal
Annamacharya Institute of Technology & Sciences,
Piglipur,
Hyderabad.

Sir,

Sub: Permission for conducting a Workshop on “Recent Trends in VLSI and System on chip”.

We are planning to conduct a three day workshop from 17th November 2014 to 19th November 2014.
Dr. T.Ravi – ECE, M.E, Ph.D from Satyabhama Institute of science and Technology agreed to be the resource person. So, we request you to permit for conducting the workshop.

Thanking you

Yours faithfully

A workshop on "Recent Trends in VLSI and System on chip" (17-11-14 to 19-11-2014)

Date	From	To	SESSIONS
17/11/2014	1:00PM	1:30PM	Inauguration and Introduction to Workshop
	1:30PM	1:45PM	Tea Break
	1:45PM	2:30PM	Session 1: Evolution of Electronics & VLSI Design
	2:30PM	03:30PM	Lunch Break
	03:30PM	04:30PM	Session 2: Very large scale integration – Monolithic and Hybrid IC.
18/11/2014	1:00PM	1:30PM	Session 3: VLSI Design isolation, Oxide isolation, Diode Isolation, Building blocks, Layout of Passive element
	1:30PM	1:45PM	Tea Break
	1:45PM	2:30PM	Session 4: Design of semiconductor diffused resistors, thin film resistor and Monolithic Capacitor. Fabrication of thick oxide MOSFET and CMOS.
	2:30PM	03:30PM	Lunch Break
	03:30PM	05:30PM	Session 5: Design of Silicon Integrated circuits, Concept of buried layer, Initial Artwork, Isolation Diffusion.
19/11/2014	1:00PM	1:30PM	Session 6: Training on Xilinx Spartan ,E-FPGA-based implementation Trends and Applications On Recent trends in VLSI
	1:30PM	1:45PM	Tea Break
	1:45PM	2:30PM	Session 7: Trends and Applications On Recent trends in SoC, training on implementation of various filters, system identification, adaptive filtering using MATLAB
	2:30PM	03:30PM	Lunch Break
	03:30PM	04:30PM	Session 8: valedictory and Felicitating the Resource person

ABOUT WORKSHOP

The success of system-on-a-chip (SoC) hinges upon a well-concerted integrated approach from multiple disciplines, such as device, design, and application. From the device perspective, rapidly improving VLSI technology allows the integration of billions of transistors on a single chip, thus permitting a wide range of functions to be combined on one chip. From the application perspective, numerous killer applications have been identified, which can make full use of the aforementioned functionalities provided by a single chip. From the design perspective, however, with greater device integration, system designs become more complex and are increasingly challenging to design. Moving forward, novel approaches will be needed to meet these challenges. This paper explores several new design strategies, which represent the current design trends to deal with the emerging issues. For example, recognizing the stringent requirements on power consumption, memory bandwidth/latency, and transistor variability, novel power/thermal management, multi-processor SoC, reconfigurable logic, and design for verification and testing have now been incorporated into modern system design. In addition, we look into some plausible solutions. For example, further innovations on scalable, reusable, and reliable system architectures, IP deployment and integration, on-chip interconnects, and memory hierarchies are all anticipated in the near future.

OBJECTIVE:

Introduction to CMOS VLSI design methodologies

- Emphasis on full-custom design
- Circuit and system levels
- Extensive use of Mentor Graphics CAD tools for IC design, simulation, and layout verification
- Specific techniques for designing high-speed, low-power, and easily-testable circuits

SoC designs are optimized to minimize waste heat output on the chip. As with other integrated circuits, heat generated due to high power density are the bottleneck to further miniaturization of components.

ABOUT WORKSHOP

Intellectual property is the area of law that deals with protecting the rights of those who create original works. It covers everything from original plays and novels to inventions and company identification marks. The purpose of intellectual property laws is to encourage new technologies, artistic expressions and inventions while promoting economic growth. When individuals know that their creative work will be protected and that they can benefit from their labour, they are more likely to continue to produce things that create jobs, develop new technology, make processes more efficient, and create beauty in the world around us.

Objectives of the workshop:

- Awareness on Intellectual Property Rights and Patents.
- Academic and industrial research perspective, and IPR.
- Innovative steps to quality and success
- Protecting and exploring IPRs.

Theme of the workshop:

The workshop focuses on following topics:

- Intellectual property rights and patents
- Academic and industrial research perspective of IPR
- Role of IP policy and IP cell

About AITS:

Annamacharya Institute of Technology and Sciences(AITS) an recognized by under UGC Section 2(f) and 12(b), and established in the year 2005, is a fast growing technical institution in Andhra Pradesh under the auspices of the well known Annamacharya Group of Educational Institutions. The Annamacharya Group is synonymous with quality engineering education having its institutions across the length and breadth of Andhra Pradesh. AITS is Situated near the World renowned Ramoji Film City, in idyllic spot amidst a vast area of 30 acres with Sylvain surroundings. It now has full fledged laboratories for all five departments of CSE, ECE, CIVIL, EEE and MECH Engg. The college, apart from 5 Undergraduate courses, has also offering Postgraduate Programs like ECE, EEE, CSE and MBA under the JNTU.H.

Objective of the Workshop:

Intellectual property is the area of law that deals with protecting the rights of those who create original works. It covers everything from original plays and novels to inventions and company identification marks. The purpose of intellectual property laws is to encourage new technologies, artistic expressions and inventions while promoting economic growth. ABOUT WORKSHOP

A trademark is a sign capable of distinguishing the goods or services of one enterprise from those of other enterprises. Trademarks are protected by intellectual property rights. At the national/regional level, trademark protection can be obtained through registration, by filing an application for registration with the national/regional trademark office and paying the required fees. At the international level, you have two options: either you can file a trademark application with the trademark office of each country in which you are seeking protection

Objectives of the Workshop:

- The overall purpose of trademark law is to prevent unfair competition by protecting the use of a symbol, word, logo, slogan, design, domain name.
- Given the increased importance to brand equity.
- The exclusive right to use the claimed trademark

Theme of the Workshop:

The workshop focuses on following topics:

- Using the trademark symbol after a logo or phrase alerts competitors that you have claimed this symbol or phrase as your own, but you don't have to have even formally apply for it.
- Only trademarks that have been officially granted by the Trademark office can use the symbol, which stands for registered trademark.

ABOUT WORKSHOP

Introduction: Industrial Design protection is provided for a shape, configuration, surface pattern, colour, or line which, when applied to a functional article, produces or increases and improves the visual appearance of the design. Industrial Design protection is a type of intellectual property right that gives the exclusive right to make, sell, and use articles that embody the protected design, to selected people only.

Objectives of the Workshop:

- Awareness on Intellectual Property Rights under trade Mark protection.
- Academic and industrial research perspective and IPR.
- Innovative steps to quality and success.
- Protecting and exploring IPRs.

Theme of the Workshop:

- The workshop focuses on following topics:
- It should be novel and original
- It should be applicable to a functional article
- It should be visible on a finished article
- It should be non-obvious

Targeted Audience:

- Faculties, students, Research Scholar and software professional.

Coordinator : U.NARENDER
Assoc. Professor
Department of EEE

ABOUT WORKSHOP

Introduction: Intellectual property (IP) is a term referring to a brand, invention, design or other kind of creation, which a person or business has legal rights over. Almost all businesses own some form of IP, which could be a business asset. India is one of the UK's priority overseas markets. If you plan to do business in India, or if you are already trading there, it is essential to know how to use, guard and enforce the rights you have over the intellectual property (IP) that you or your business own.

This guide explains about IP in general, and gives guidance on how to apply these principles in the Indian market. It describes the issues you may face with IP infringement in India, offers advice on how you can effectively tackle these, and provides links to sources of further help.

Intellectual property rights (IPRs) play a key role in every sector and have become the basis for crucial investment decisions.

IPRs are exclusive rights and therefore there is always a challenge to strike a balance between the interests of innovators and the interests of the society at large.

Another important factor is having an adequate legal framework to protect the interests of innovators and inspire confidence that their intellectual property will be protected, in turn triggering further innovation.

IPR litigation in India is quite diverse owing to the large number of courts, varying degree of experience of the judicial officers in IPR matters and varying manners of practice.

As a result, some courts have become preferred forums over others.

Objectives of the Workshop:

- Awareness on Intellectual Property Rights and Patents.
- Academic and industrial research perspective and IPR.
- Innovative steps to Quality and Success.
- Protecting and exploring IPRs.

Theme of the Workshop:

The workshop focuses on following topics:

- Think about the design of your product, and how easy it would be for somebody to reproduce it without seeing your original.
- Also make sure you educate our employees on IP rights and Protection, Tooling, Samples, Machinery.
- Make sure there are no 'leakages' of packaging that might be used by counterfeiters to pass off fake product.
- Check production over-runs to make sure that genuine product is not being sold under a different name.

Registering and enforcing intellectual property rights in India

To enjoy most types of intellectual property (IP) rights in India, you should register them.

For patents, individual registrations must be made in India, but for rights other than industrial designs you can apply under the terms of the Patent Cooperation Treaty, which is usually easier and quicker.

For trademarks, you should register them within India, either through the domestic trade mark system or under the Madrid system.

For copyright, no registration is required but registering copyrights with the copyright authorities is advisable. 'Priority rights' under the Paris Convention can help in the local registration of trademarks, designs and patents by allowing rights previously registered elsewhere to become effective in India, if filed within a time limit.

A WORKSHOP

On

IPR IN INDIA

(22.10.2018 to 30.10.2018)

Organizing Secretary:

J.SREDDHAR

HOD Dept of EEE

Organized by

**ANNAMACHARYA INSTITUTE OF
TECHNOLOGY & SCIENCES**
Hyderabad

About AITS:

Annamacharya Institute of Technology and Sciences(AITS) an recognized by under UGC Section 2(f) and 12(b), and established in the year 2005, is a fast growing technical institution in Andhra Pradesh under the an spices of the well known Annamacharya Group of Educational Institutions. The Annamacharya Group is synonyms with quality engineering education having its institutions across the length and breadth of Andhra Pradesh. AITS is Situated near the World renowned Ramoji Film City, in idyllic spot amidst a vast area of 30 acres with Sylvain surroundings. It now has full fledged laboratories for all five departments of CSE, ECE, CIVIL, EEE and MECH Engg. The college, apart from 5 Undergraduate courses, has also offering Postgraduate Programs like ECE, EEE, CSE and MBA under the JNTUH.

Objective of the Workshop:

Intellectual property is the area of law that deals with protecting the rights of those who create original works. It covers everything from original plays and novels to inventions and company identification marks. The purpose of intellectual property laws is to encourage new technologies, artistic expressions and inventions while promoting economic growth. When individuals know that their creative work will be protected and that they can benefit from their labour, they are more likely to continue to produce things that create jobs, develop new technology, make processes more efficient, and create beauty in the world around us.

About AITS:

Annamacharya Educational Trust was registered in the year 1997 with Regd. No. 135/IV/97 with its headquarters in Hyderabad, by a group of highly educated and service-minded individuals. The founders started the trust with the noble intention of providing professional, and higher education to the students coming from backward rural areas of Rayalaseema. "VidhanSarovatraPujyathe" The word is part of a Sanskrit shloka and means "a scholar is respected all over the world." The institute approved by All Indian Council for Technical Education (AICTE), New Delhi, Permanent affiliation from JNTUH, recognized by UGC under 2(f) & 12(B), Accredited by NAAC with 'A' Grade.

About Civil Department:

The AITS Hyderabad, Department of Civil Engineering was established in the academic year 2011, with an annual intake of 40 students. The number of students further went up to 120 in the year 2013. The Department has requisite number of faculty members, striving to incorporate excellence in theory and practice. A team of dynamic, dedicated, well qualified and experienced academicians such as Professors, Associate Professors, Assistant Professors & Senior faculty with vast research experience are available in our departments. Apart from that the visiting faculty has been incorporated from various prestigious universities to enrich the students' knowledge base.

About the seminar:

Development of innovative solutions at the construction site: the adoption of a technological or organisational advance requires the commitment of the whole organisation, the innovation team and the wider construction site team. The company must allocate the human and material resources necessary to deliver the innovation. This stage is essential, since it involves adjusting scheduled activities to the real situation

SUBJECT:Request for grant permission to “ A One Day Seminar On Concepts On Geotechnical Engineering Latest Trends Techniques - Civil”. - Reg.,

Respected Sir,

We are willing to organize an expert talk on “A One Day Seminar On Concepts On Geotechnical Engineering Latest Trends Techniques - Civil” by Dr.M.R. Madhav on 22.02.2018 from 10:00 a.m to 3:30 p.m in Seminar hall.

Hence on behalf of Civil Engineering Department I request you to grant the permission to conduct the seminar on the topic mentioned above.

Thanking you sir,

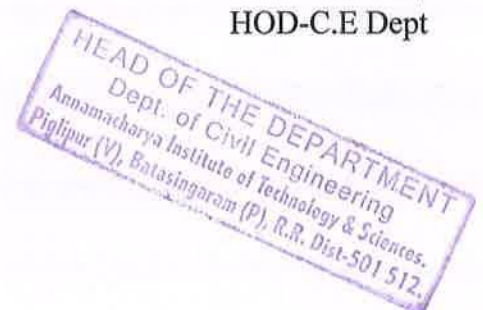

Yours sincerely,

HOD-C.E Dept

Place: Piglipur,

Date: 05/02/2018.

About AITS:

Annamacharya Educational Trust was registered in the year 1997 with Regd. No. 135/IV/97 with its headquarters in Hyderabad, by a group of highly educated and service-minded individuals. The founders started the trust with the noble intention of providing professional, and higher education to the students coming from backward rural areas of Rayalaseema. "VidhvanSarvatraPuiyathe" The word is part of a Sanskrit shloka and means "a scholar is respected all over the world." The institute approved by All Indian Council for Technical Education (AICTE), New Delhi, Permanent affiliation from JNTUH, recognized by UGC under 2(f) & 12(B), Accredited by NAAC with 'A' Grade.

DEPARTMENT OF CIVIL ENGINEERING

THREE DAY SEMINAR

ON

“Advance Surveying Techniques On Tc
Station-Civil”

22nd to 24th JANUARY 2018

About Civil Department:

The AITS Hyderabad, Department of Civil Engineering was established in the academic year 2011, with an annual intake of 40 students. The number of students further went up to 120 in the year 2013. The Department has requisite number of faculty members, striving to incorporate excellence in theory and practice. A team of dynamic, dedicated, well qualified and experienced academicians such as Professors, Associate Professors, Assistant Professors & Senior faculty with vast research experience are available in our departments. Apart from that the visiting faculty has been incorporated from various prestigious universities to enrich the students' knowledge base.

About the seminar:

Development of innovative solutions at the construction site: the adoption of a technological or organisational advance requires the commitment of the whole organisation, the innovation team and the wider construction site team. The company must allocate the human and material resources necessary to deliver the innovation. This stage is essential, since it involves adjusting scheduled activities to the real situation

SUBJECT:Request for grant permission to “Three Day Workshop On Advance Surveying Techniques On Total Station-Civil”. - Reg.,

Respected Sir,

We are willing to organize an expert talk on “Three Day Workshop On Advance Surveying Techniques On Total Station-Civil” by Mr. Ashok from 22.01.2018 to 24.01.2018.

Hence on behalf of Civil Engineering Department I request you to grant the permission to conduct the seminar on the topic mentioned above.

Thanking you sir,

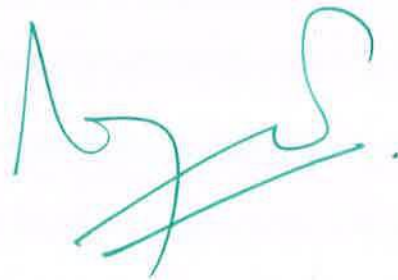

Yours sincerely,

HOD-C.E Dept

Place: Piglipur,

Date: 08/01/2018.

Agenda

Expert talk on

“Three Day Workshop On Advance Surveying Techniques On Total Station-Civil”

**Venue: Annamacharya Institute of Technology and Sciences,
Piglipur, Batasingarm (Panchayath), Hayathnagar (M), HYDERABAD – 501 512**

(22.01.2018, Monday)		
Time	Sessions and Topics	Resource faculty (Shri)
10.00 am-11.00 am.	Inauguration of program. Introduction of the speakers: 1. Dr. S. Nagabhushana Rao, Director 2. Dr. P.V.Krishna Murthy, Principal 3. A.R.K. Murthy, Associate Professor 4. CH. Tilak,HOD,Civil Department	
11.15 am – 12.40 pm	Introduction of expert lecture on “Advance Surveying Techniques On Total Station”	Mr. Ashok
02.00 pm - 03.30 pm.	The Basic functions of Total Station are as below: <ul style="list-style-type: none">• Station Setup- 1. Setup Station with Angle reference 2. Station Setup with One Station and One Back sight Point Topography• Stakeout• Line Offset Cogo-1. Distance Between Two Objects 2. Area Calculation 3. Others. Basic Setup of Machine o Put the Machine on a Tripod and do the leveling and centering.	Mr. Ashok

(23.01.2018, Tuesday)		
Time	Sessions and Topics	Resource faculty (S/Shri)
10.00 am-11.00 am.	Accuracy and measurement of Total station	Mr. Ashok
11.15 am – 12.40 pm	Field work	Mr. Ashok
02.00 pm - 03.30 pm.	Field work	Mr. Ashok

(24.01.2018, Wednesday)

Time	Sessions and Topics	Resource faculty (S/Shri)
10.00 am-11:00 am	Importing the field data to Autocad	Mr. Ashok
11:15 am -12:40 pm	Designing in Autocad	Mr. Ashok
02.00 pm - 03.30 pm	Interactive session with participants and Certificate distribution.	Mr. Ashok

About AITS:

Annamacharya Educational Trust was registered in the year 1997 with Regd. No. 135/IV/97 with its headquarters in Hyderabad, by a group of highly educated and service-minded individuals. The founders started the trust with the noble intention of providing professional, and higher education to the students coming from backward rural areas of Rayalaseema. "VidhanSarovatraPujyathe" The word is part of a Sanskrit shloka and means "a scholar is respected all over the world." The institute approved by All Indian Council for Technical Education (AICTE), New Delhi, Permanent affiliation from JNTUH, recognized by UGC under 2(f) & 12(B), Accredited by NAAC with 'A' Grade.

About Civil Department:

The AITS Hyderabad, Department of Civil Engineering was established in the academic year 2011, with an annual intake of 40 students. The number of students further went up to 120 in the year 2013. The Department has requisite number of faculty members, striving to incorporate excellence in theory and practice. A team of dynamic, dedicated, well qualified and experienced academicians such as Professors, Associate Professors, Assistant Professors & Senior faculty with vast research experience are available in our departments. Apart from that the visiting faculty has been incorporated from various prestigious universities to enrich the students' knowledge base.

About the seminar:

Development of innovative solutions at the construction site: the adoption of a technological or organisational advance requires the commitment of the whole organisation, the innovation team and the wider construction site team. The company must allocate the human and material resources necessary to deliver the innovation. This stage is essential, since it involves adjusting scheduled activities to the real situation

ONE DAY SEMINAR

ON

**“A One Day Seminar On Concepts On Concret
Technologies – Latest Trends Technology”**

16TH JULY 2016

Hyderabad,

05-07-2016.

To,

The Principal,

AITS,

Batasingaram,

Hyderabad.

SUBJECT:Request for grant permission to “A One Day Seminar On Concepts On Concrete Technologies – Latest Trends Technology”. - Reg.,

Respected Sir,

We are willing to organize an expert talk on “A One Day Seminar On Concepts On Concrete Technologies – Latest Trends Technology” by Dr. V. Bikshma on 16/07/2016.

Hence on behalf of Civil Engineering Department I request you to grant the permission to conduct the seminar on the topic mentioned above.

Thanking you sir,

Yours sincerely,

HOD-C.E Dept

Place: Piglipur,

Date: 05/07/2016.

About Civil Department:

The AITS Hyderabad, Department of Civil Engineering was established in the academic year 2011, with an annual intake of 40 students. The number of students further went up to 120 in the year 2013. The Department has requisite number of faculty members, striving to incorporate excellence in theory and practice. A team of dynamic, dedicated, well qualified and experienced academicians such as Professors, Associate Professors, Assistant Professors & Senior faculty with vast research experience are available in our departments. Apart from that the visiting faculty has been incorporated from various prestigious universities to enrich the students’ knowledge base.

About the seminar:

Development of innovative solutions at the construction site: the adoption of a technological or organisational advance requires the commitment of the whole organisation, the innovation team and the wider construction site team. The company must allocate the human and material resources necessary to deliver the innovation. This stage is essential, since it involves adjusting scheduled activities to the real situation

FOUR DAY SEMINAR

ON

“MODERN INNOVATIVE PRACTICES IN
CONSTRUCTION INDUSTRY IN CONCRETE
TECHNOLOGY -CIVIL”

24th TO 27th AUGUST 2015

Hyderabad,

05-08-2015.

To,

The Principal,

AITS,

Batasingaram,

Hyderabad.

SUBJECT: Request to grant permission to “Modern Innovative Practices In Construction Industry In Concrete Technology”. - Reg.,

Respected Sir,

We are willing to organize an expert talk on “**Modern Innovative Practices In Construction Industry In Concrete Technology**” by Dr. B.P.L Swamy, from 24/08/2015 to 27/08/2015.

Hence on behalf of Civil Engineering Department I request you to grant the permission to conduct the seminar on the topic mentioned above.

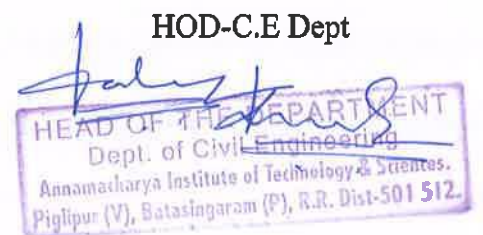

Thanking you sir,

Yours sincerely,

HOD-C.E Dept

Place: Piglipur,

Date: 05/08/2015.

About AITS:

Annamacharya Educational Trust was registered in the year 1997 with Regd. No. 135/IV/97 with its headquarters in Hyderabad, by a group of highly educated and service-minded individuals. The founders started the trust with the noble intention of providing professional, and higher education to the students coming from backward rural areas of Rayalaseema. **“VidhvanSarvatraPuiyathe”** The word is part of a Sanskrit shloka and means “a scholar is respected all over the world.” The institute approved by All Indian Council for Technical Education (AICTE), New Delhi, Permanent affiliation from JNTUH, recognized by UGC under 2(f) & 12(B), Accredited by NAAC with ‘A’ Grade.

About Civil Department:

The AITS Hyderabad, Department of Civil Engineering was established in the academic year 2011, with an annual intake of 40 students. The number of students further went up to 120 in the year 2013. The Department has requisite number of faculty members, striving to incorporate excellence in theory and practice.
