26, 2022. Electronics and communication and Engineering students show great interest in the program and learn so many new things in the field of computing skills. Cyber security refers to every aspect of protecting an organization and its employees and assets against cyber threats. As cyber attacks become more common and sophisticated and corporate networks grow more complex, a variety of cyber security solutions are required to mitigate corporate cyber risk.

DESCRIPTION

An ICT/Computing skills training program for **Digital Data Computering** skills was developed by Dr.Shaik Mahaboob basha, Asso.prof, Geetanjali institute of science and technology, Nellore, on September 11,2020. Electronics and communication and Engineering students show great interest in the program and learn so many new things in the field of computing skills. Digital data is *all user data that a computer or other technological devices understand*. The binary system represents this data with 0s and 1s, and it encodes into text, video, or audio information. Users can store and transmit digital data using various digital storage and communication technologies, such as hard drives, solid-state drives, USB drives, the internet, and wireless networks. In computing, data is *information that has been translated into a form that is efficient for movement or* processing. Relative to today's computers and transmission media, data is information converted into binary digital form

Time	10.00 am to 4.00 pm
Participants	32 Students

DESCRIPTION

A Computing skills training program was developed by Dr. S.Shrikant On **26.10.2018** mechanical engineering students show great interest in the program and learn so many new things in the field of computing skills. Computing skills as a set of skills that enable a person to interact with an audience and convey their message clearly engage your audience in your presentation. These skills will refine your message delivery and make

options available A decision support system is an informational application as opposed to an operational application. Informational applications provide users with relevant information based on a variety of data sources to support better-informed decision-making. Operational applications, by contrast, record the details of business transactions, including the data required for the decision-support needs of a business.

MBA Students participated in Decision Support System for Management on 04.01.2021
