Soft-skills and Life Skills for Civil Engineering

BY

D Vasanth Choudary

ANNAMACHARYA INSTITUTE OF TECHNOLOGY AND SCIENCES – Hyderabad

351

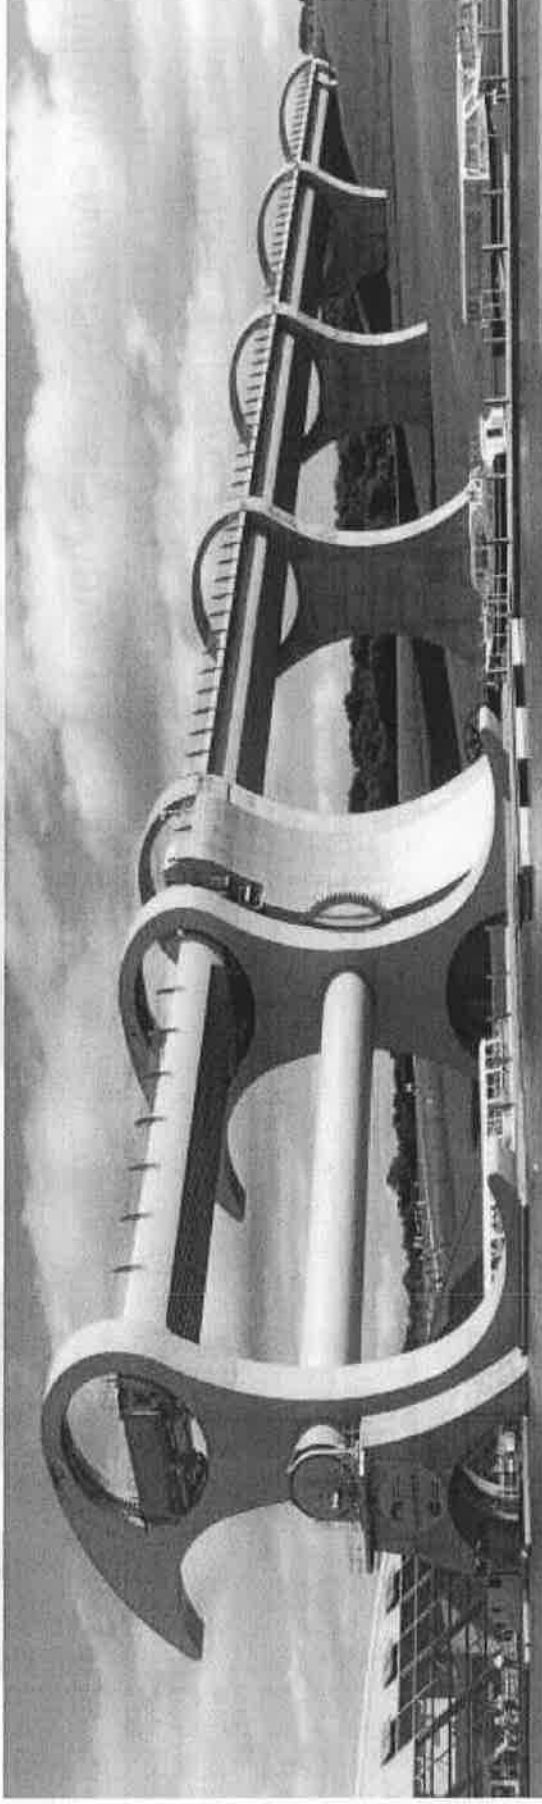

Contents :

- **Introduction**
- **Importance**
- **Skill set under human skills**
 - **Communication skills**
 - **Negotiation skills**
 - **Organisational skills**
 - **Leadership skills**
- **Conclusion**
- **References**

Importance

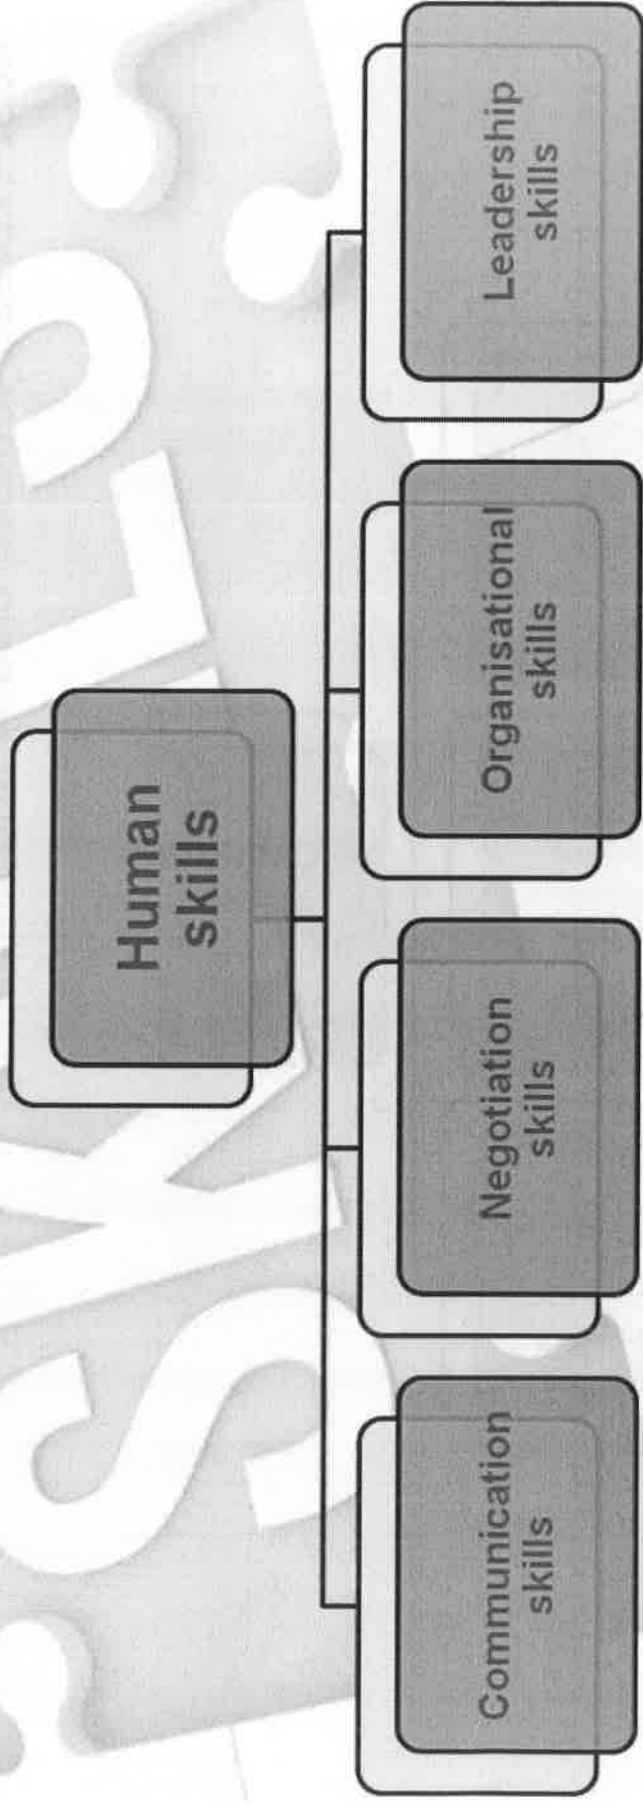

Civil engineers design major construction projects, such as roads, airports, tunnels, dams and bridges. They also supervise project construction and maintenance.

They are often called upon to present reports to the public or government officials. They must possess a very broad skill set, from cost accounting to geology.

Skill set under human skills

Human skills involve the ability to work well with other people both individually and in group. Because managers deal directly with people, this skill is crucial! Managers with good human skills are able to get the best out of their people. They know how to communicate, motivate, lead, and inspire enthusiasm and trust.

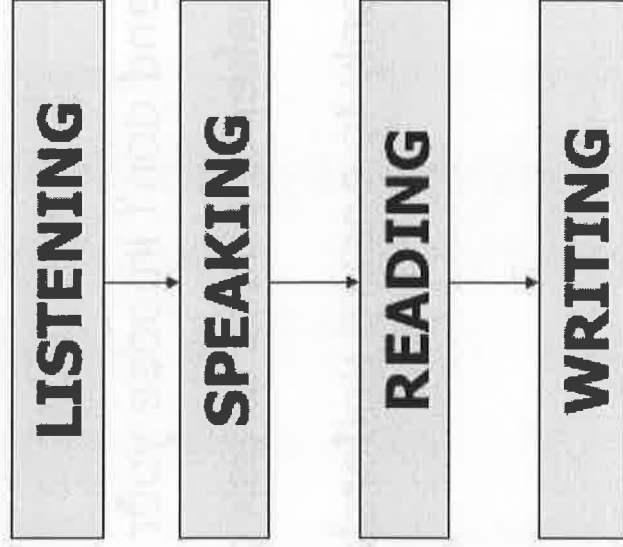

Listening skills

One must be skilled “active listener,” to get the full benefit from the ideas of others and communicate her/his own ideas both orally and in writing.

Listening Comes First

The First and the foremost communication skill that we learn in our lives is nothing but “LISTENING”

Oratory skills

In the great words of former British Prime Minister Sir Winston Churchill, there is nothing like oratory, it is a skill that can turn a commoner into a king.

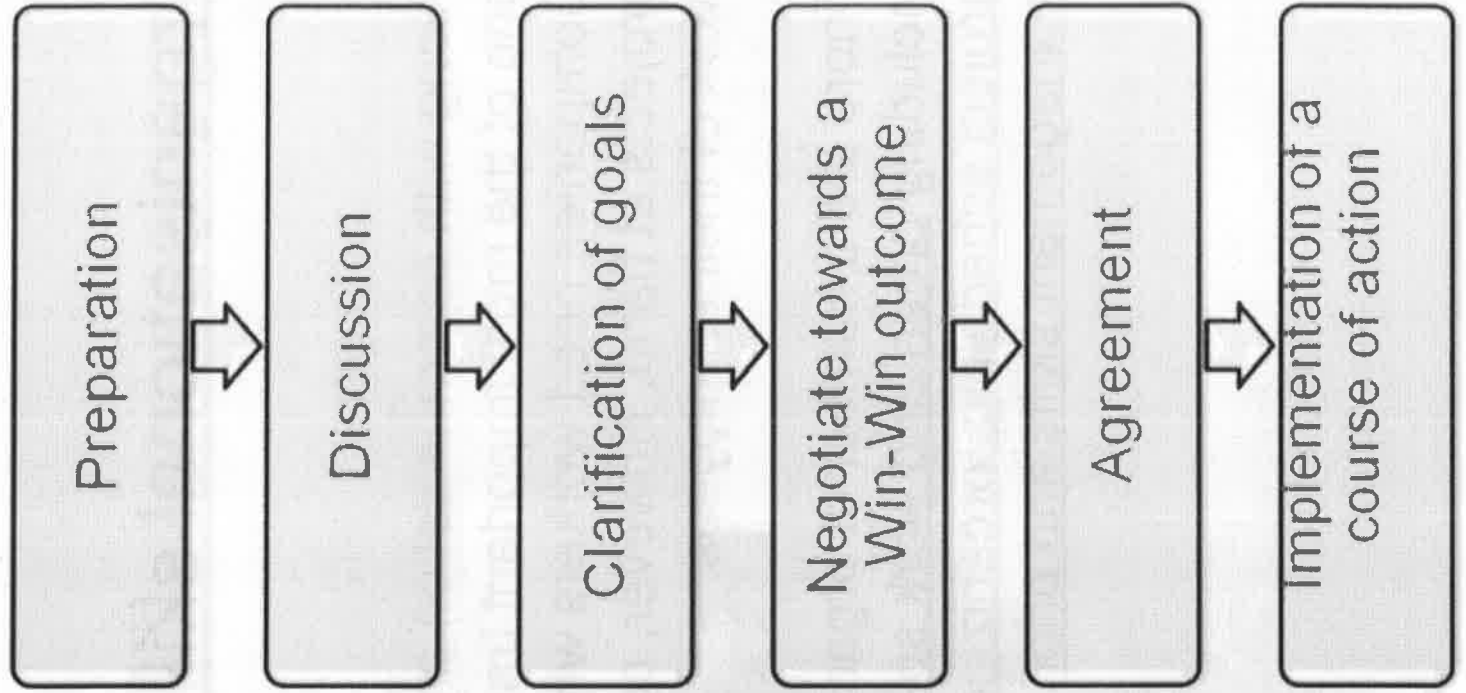

Here are a few ideas for documentation skills to develop:

- Technical Writing.
- Formatting.
- Documentation Strategy.
- Visual documentation.
- Process flow modeling.
- Records Management.
- Metadata Management.
- Note Taking.

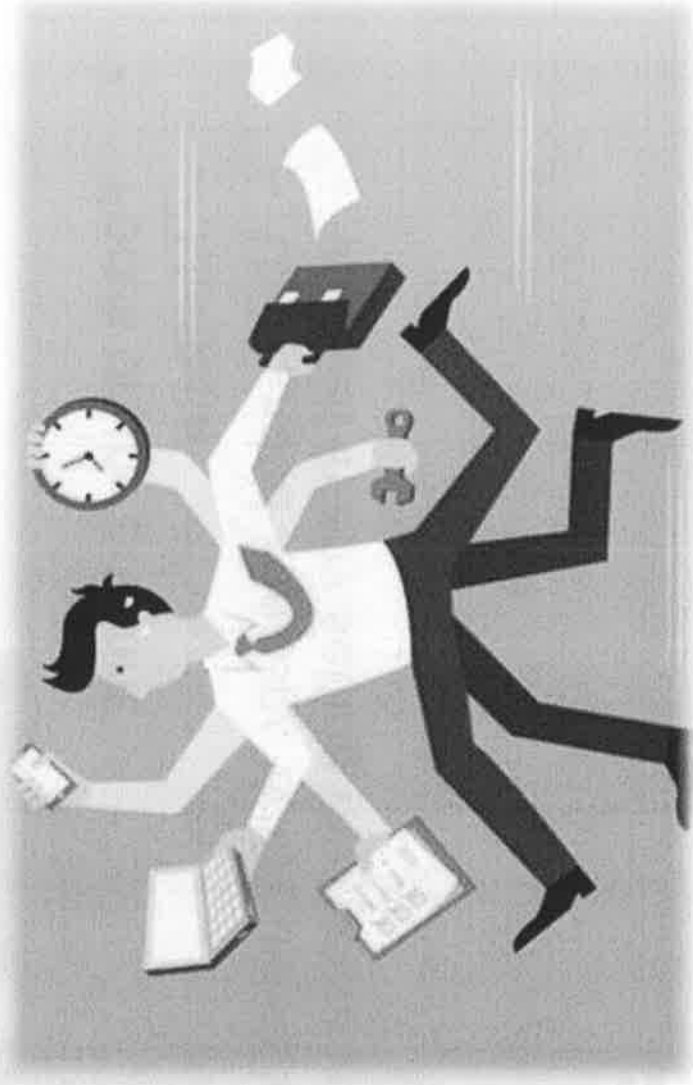

Stages of a navigation process

A word cloud centered around the theme of 'win-win' negotiation. The most prominent words are 'win-win', 'strategy', 'negotiation', 'solution', 'attitude', 'business', 'possible', 'win', 'life', 'positive', 'winner', 'optimism', 'success', 'thinking', 'logic', 'psychology', 'optimists', 'style', 'pessimism', 'health', 'philosophy', 'research', 'best', 'mind', 'one', 'explanatory', 'research', 'win-win', 'strategy', 'negotiation', 'solution', 'attitude', 'business', 'possible', 'win', 'life', 'positive', 'winner', 'optimism', 'success', 'thinking', 'logic', 'psychology', 'optimists', 'style', 'pessimism', 'health', 'philosophy', 'research', 'best', 'mind', 'one', 'explanatory', 'research'.

To master organisational skills one must learn time and stress management.

1. Here are some tips which can help in time management:
 - Creating and keeping deadlines.
 - Small goal setting and meeting goals.
 - Quick decision making.
 - Managing appointments.
 - Team management.
 - Project management.
 - Making schedules.

Most important qualities to develop ones leadership skills:

- Motivating- Leaders need to inspire their workers to go the extra mile for their organization. This can be done by building employee self-esteem through recognition and rewards
- Delegating.
- Positive- You should be able to laugh at yourself when something doesn't go quite as planned; this helps create a happy and healthy work environment
- Trustworthy.
- Creative.
- Advising, assisting and micromanaging.
- Responsible.

- Civil engineers carry a great deal of responsibility as they are ultimately in charge of the entire project's design and implementation. **They must be able to lead a diverse team of professionals, including surveyors, construction managers, technicians, contractors, architects, urban planners, transportation engineers and others, as well as maintain the confidence of governmental planning authorities.** The effectiveness of the civil engineer's leadership skills may be a significant determining factor in keeping a project on time and on budget.
- Negotiation skills come into picture when civil engineers need to crack most economical deals with different machine lending agencies or firms, raw materials suppliers and in getting government tenders.
- To be able to excel in all of the above human skills one must be self disciplined, organized and mentally fit. Therefore, organisational skills are as important as other human skills.

Thank you
